## Capacity Market Rules Change

Reference number (to be  
completed by Ofgem):  
**P079**

<b>Name of Organisation(s) / individual(s):</b> National Grid Electricity Transmission Ltd	<b>Date Submitted:</b> 23/01/2015
<b>Type of Change:</b> <input checked="" type="checkbox"/> Amendment <input type="checkbox"/> Addition <input type="checkbox"/> Revoke <input type="checkbox"/> Substitution	<b>If applicable, whether you are aware of an alternative proposal already submitted which this proposal relates to:</b>  No
<b>What the proposal relates to and if applicable, what current provision of Rules the proposal relates to (please state provision number):</b>  This proposal relates to Rules 3.6.3, 3.7.3 and the definition of Distribution Connection Agreement.	
<b>Description of the issue that the change proposal seeks to address:</b>  The rules and definition set out that a distribution connection agreement is an agreement between a licensed DNO and the CMU. This is an issue for anyone with a private wire connection agreement as they do not have an agreement with the DNO.	
<b>If applicable, please state the proposed revised drafting (please highlight the change):</b>  Amend the definition of Distribution Connection Agreement to reflect that not all CMUs are connected to a licensed DNO's network. Alternatively add a separate definition and reference to a Private Wire Connection Agreement.	
<b>Analysis and evidence on the impact on industry and/or consumers including any risks to note when making the revision - including, any potential implications for industry codes:</b>  The arrangements for capacity providers connected via a private network need to be developed and confirmed within the Rules, an activity not necessarily completely captured during DECC's policy development	
<b>Details of Proposer (please include name, telephone number, email and organisation):</b> James Greenhalgh, Capacity Mechanism Manager, National Grid Electricity Transmission, james.greenhalgh@nationalgrid.com, 01926 656169
