

# Proposal for a Capacity Market Rules Change

Making a positive difference  
for energy consumers

Reference number (to be  
completed by Ofgem):  
**P090**

Name of Organisation(s) / individual(s):  
**DECC**

Date Submitted:  
**12/02/15**

Type of Change:

- Amendment
- Addition
- Revoke
- Substitution

If applicable, whether you are aware of an alternative proposal already submitted which this proposal relates to:

What the proposal relates to and if applicable, what current provision of Rules the proposal relates to (please state provision number):

Definition of 'Non CMRS Distribution CMU'

Description of the issue that the change proposal seeks to address:

Definition of 'Non-CMRS Distribution CMU' should say '...Generating Unit of which exports electricity to a Distribution Network...' instead of '...Generating Unit of which supplies electricity to a Distribution Network'.

This is to align the terminology with elsewhere in the regulations and rules. It will also better align with commonly used terminology, particularly the Balancing and Settlement Code, where electricity is *exported* from a generator to a network and *supplied* to a customer.

If applicable, please state the proposed revised drafting (please highlight the change):

As Above

Analysis and evidence on the impact on industry and/or consumers including any risks to note when making the revision - including, any potential implications for industry codes:

No impact

Details of Proposer (please include name, telephone number, email and organisation):

Thomas Slater, DECC
