

I have spoken to our O&M team and have been informed that they have not been aware of any tampering or vandalism on meters and modems. It should be noted that generally we install meters c/w modems in lofts and thus they are out of occupants way.

In addition we are not consistent regarding using seals on meters/modems; the majority do not have a seal and it would be a major task if we were asked to a retrospective retrofit.

Thank you for organising the meeting; it was very useful to me and I am sure to other participants.

Have a good weekend.

Paul
