Consultation on the addition of new National Transmission System exit points to National Grid Gas Transmission's gas transporter licence and their categorisation

On 26 June 2015, we¹ published a section 23 notice of modification to Part F of Special Condition 5G of National Grid Gas Transmission's (NGG's) gas transporter licence. The modification proposed to add two new exit points to the licence.

EU Gas Regulation² requires us to decide whether any new exit points should be classified as relevant points. For relevant points, NGG is required to make information about capacity available to the public. We agree with NGG's proposal that the new exit points Air Products (Teesside) and Fordoun CNG Station should not be classified as relevant points.

This letter explains the background to the proposed modification and seeks views on it.

Changes to the licence

Table 8 in Part F of Special Condition 5G lists all the National Transmission System (NTS) exit points where exit capacity can be bought by shippers. NTS exit points must be listed in this table to allow NGG to make exit capacity available to NTS users.

On 7 May 2015 NGG requested that two new exit points are added to this table:

Offtake Point	Type of Offtake	Enduring flat Baseline (GWh/d)
Air Products (Teesside)	Direct Connect (DC)	0
Fordoun CNG Station	Direct Connect (DC)	0

NGG is not requesting a revenue driver for either of these new exit points. We propose that these two exit points should be added to the licence. The new draft text can be found in Appendix 1 of this letter. We welcome the views of stakeholders about the inclusion of these exit points.

Classification of relevant points

When proposing to add new exit points to the licence, we must, in accordance with Article 18(3) of the Gas Regulation (EC No 715/2009), consider if they are 'relevant points'.³ This

¹ The Authority is supported by the Office of Gas and Electricity Markets (Ofgem). The terms 'the Authority', 'Ofgem' and 'we' are used interchangeably. Ofgem is the Office of the Gas and Electricity Markets.

² Regulation (EC) No 715/2009 of the European Parliament and of the Council of 13 July 2009 on conditions for access to the natural gas transmission networks and repealing Regulation (EC) No 1775/2005 <u>http://eur-lex.europa.eu/legal-content/EN/TXT/PDF/?uri=CELEX:02009R0715-20130601&qid=1409835755981&from=EN</u> ³ 'Relevant point' is defined in Paragraph 3.2 of Chapter 3 of Annex 1 to the EU Gas Regulation.

requires NGG as the Transmission System Operator to make information on the technical, contracted and available capacities at all relevant points available to the public on a regular basis. Points which are connected to a single final customer are exempt from this obligation, as publishing the information outlined above could have commercial confidentiality impacts. NGG will publish aggregated information for points which fall outside the definition of the relevant point.

We agree that both Air Products (Teesside) and Fordoun CNG Station should not be considered relevant points, as NGG have said they are each connected to single final customers. NGG have said that both should be listed as Industrial Offtakes.

Tables showing all relevant points and non-relevant points can be found in Appendix 1 to this letter. We welcome stakeholders' views about the classification of these exit points.

Consultation

Views on the issues raised in this letter and the accompanying section 23 notice should be made by 24 July 2015 to: <u>david.reilly@ofgem.gov.uk</u> or in writing to David Reilly, Ofgem, 9 Millbank, London, SW1P 3GE. We prefer to receive responses by e-mail.

Please note that any responses to the consultation will be placed on our website unless marked as confidential.

If you have any queries regarding the content of this letter, please contact David Reilly by using the email address above or telephone 0203 263 9648.

Yours faithfully

Paul Branston Associate Partner, Gas Networks Signed on behalf of the Authority and authorised for that purpose
