No.	Condition number	Condition name	Page/Paragraph Ref	Comments	Suggested alternative drafting (please use tracked changes wherever possible)			
1A	C8	Requirement to offer terms	5A	The meaning of this paragraph is not clear, what obligation is Ofgem placing on National Grid?				
1A	C11	Production of information about the national electricity transmission system	3e	The term "provide value" is very loose and it is not clear how this could actually be assessed or what it means.				
1B	Special Condition 2O	Business separation requirements and compliance obligations, and conduct of the System Operator in performing its Relevant System Planning Activities	20.30	'Independent Examiner's report' should the Licence define the report frequency (every two years); if report is not appropriate then NGET could apply for a derogation to produce it.  This would provide comfort to the industry that the business separation requirements and the SO's ability to comply with these requirements are continually assessed as opposed to leaving it to National Grid to make this judgment on its own activities.				

Response template for consultation on licence modifications to enhance the role of the System Operator
