On behalf of Northern Powergrid I would offer the following comments on the proposed new SLC52:

- (1) The reference to “as set out in paragraph 52.2 (b)” at the end of paragraph 52.1 is misleading as only half of what is referred to in paragraph 52.1 is set out in paragraph 52.2(b) – the other half is referred to in paragraph 52.2 (a). The easiest fix would be to remove “(b)” from the end of paragraph 52.1, so that it reads “as set out in paragraph 52.2”. An alternative, wordier fix would be to insert “as set out in paragraph 52.2 (a)” after the word “Practice” in the second line.
- (2) We remain of the view that the word “fullest” in 52.2 (b)(i), 52.3(a)(i) and 52.3(a)(iii) is unnecessary as all the required constraints are delivered by the combination of “minimising” and “extent reasonably practicable”, so that this word can have only a perceived visual effect rather than any actual definitional impact.
- (3) The reference in the first line of paragraph 52.8 to “paragraph 52.9” should be to “paragraph 52.7”.

I am duly authorised to advise you that we do not otherwise wish to make any representation in respect of the statutory consultation.

Regards,

Tony
