

Renewables Obligation Certificate (ROC) and CCL Renewable Levy Exemption Certificate (LEC) issue schedule 2015/2016

Version number: 2

Issue Date: August 2015

Column A sets out the date by which Ofgem must receive monthly import, export and, where appropriate, FMS data for the purposes of issuing ROCs and Renewable LECs*. If any operator experiences difficulty submitting such data to Ofgem, within the timeframes in this schedule, we should be notified **before** the relevant date in column A.

If data for Renewable Obligation Certificates (ROCs) is submitted to Ofgem after the date shown in column A it will be suspended and Ofgem will look for generators to provide reasons as to why the data was submitted late.

Column B sets out the date by which Ofgem intends to issue ROCs.

Column C sets out the date by which Ofgem intends to issue Renewables LECs. Due to recent changes to the CCL scheme (see our [FAQ](#) for more details), LECs cannot be issued on electricity generated on or after 1 August 2015. Residual LECs for electricity generated prior to 1 August 2015 will continue to be issued.

* In the majority of cases, the data should be submitted via the Renewables and CHP Register. In the event of a problem with the Register, information should be emailed to our dedicated email account; for stations claiming ROCs, LECs and REGOs, renewable@ofgem.gov.uk. For stations claiming LECs and/or REGOs only, CCLandREGO@ofgem.gov.uk, or fax the information to us on **020 7901 7387**. If you need to speak to a member of the Renewables team directly please call our dedicated helpline on **020 7901 7310** and choose the appropriate option.

** Operators of microgenerating stations i.e. with a **declared net capacity of 50 kW or less** (or their agents) that have notified Ofgem that they want ROCs to be issued on an annual basis must provide data for gross output and input electricity for the period, 01 April 2015 - 31 March 2016 by 31 May 2016 at the latest. Our generator guidance document, available on our website, provides further information on this.
