Dear Aris,

Notice of proposal to direct modifications to the Common Network Asset Indices Methodology under Part C of SLC51.

SP Energy Networks (SPEN) are pleased to receive positive feedback on the Common Methodology document submitted on the 1st July 2015. The joint DNO working group developed the methodology that was possible for all DNOs to align to. We accept the requests for modifications to the methodology and will work with the joint DNO working group to address the issues raised within the consultation document.

The working group has already convened and is making progress towards the re-submission date of 15th December 2015.

There are concerns that certain issues may not fit within the scope of the Common Methodology (e.g. Risk trade-off mechanisms) however if these are not addressed within the core document the working group will endeavor to provide supporting documentation which will also be submitted on the 15th December.

If you have any queries or require any additional information, please do not hesitate to contact me on the number provided.

Yours sincerely,

Gerard Boyd
