

Proposal for a Capacity Market Rules Change		 Making a positive difference for energy consumers
		Reference number (to be completed by Ofgem): CP112
Name of Organisation(s) / individual(s): E.ON / Steve Davies	Date Submitted: 15th January 2016	
Type of Change: <input checked="" type="checkbox"/> Amendment <input type="checkbox"/> Addition <input type="checkbox"/> Revoke <input type="checkbox"/> Substitution	If applicable, whether you are aware of an alternative proposal already submitted which this proposal relates to: No	
What the proposal relates to and if applicable, what current provision of Rules the proposal relates to (please state provision number): Definition of Mandatory CMU (Rule 1.2)		
Description of the issue that the change proposal seeks to address: <p>The Rules as they currently stand require that any Mandatory CMU that is not taking part in the auction be opted out. This applies even if the Mandatory CMU is not eligible (eg because it is receiving low carbon support). The DECC FAQ of 29th Aug 2014 recognises this (see FAQ#8) and states that the Rules will be amended (but they have not been).</p>		
If applicable, please state the proposed revised drafting (please highlight the change): <p>Amend the definition of Mandatory CMU so that it reads (changes in italic): “means an Existing Interconnector CMU, or an Existing Generating CMU each Generating Unit of which is owned by a licensed generator unless all such Generating Units are Exemptable Generating Plant <i>or are in receipt of Low Carbon Exclusion or a Low Carbon Grant.</i></p>		
Analysis and evidence on the impact on industry and/or consumers including any risks to note when making the revision - including, any potential implications for industry codes: <p>No negative impact. This amendment will make the rules clearer and avoid unnecessary work on the part of Applicants and the Delivery Body.</p>		
Details of Proposer (please include name, telephone number, email and organisation): <p>Steve Davies 02476 183627 Stephen.davies@eon-uk.com E.ON</p>
