

<h1 style="text-align: center;">Proposal for a Capacity Market Rules Change</h1>		 <p>Making a positive difference for energy consumers</p>
		<p>Reference number(to be completed by Ofgem): CP153</p>
Name of Organisation(s) / individual(s): Jill Brown, RWE Supply and Trading GmbH		Date Submitted: 15th January 2016
Type of Change: <ul style="list-style-type: none"> <input type="checkbox"/> Amendment <input checked="" type="checkbox"/> Addition <input type="checkbox"/> Revoke <input type="checkbox"/> Substitution 		If applicable, whether you are aware of an alternative proposal already submitted which this proposal relates to:
What the proposal relates to and if applicable, what current provision of Rules the proposal relates to (please state provision number): Schedule 3: Generating Technology Classes Table 1.1 Wind and Solar should be introduced as Generating Technology Classes so that de-rating factors are published for such technologies.		
Description of the issue that the change proposal seeks to address: Wind and solar technologies currently have no de-rating factors and therefore cannot take part in the Capacity Market nor can they be taken into account when assessing the connection capacity required to be maintained at shared connections.		
If applicable, please state the proposed revised drafting (please highlight the change):		
Analysis and evidence on the impact on industry and/or consumers including any risks to note when making the revision - including, any potential implications for industry codes: This will enable both wind and solar CMUs to participate in the Capacity Market if eligible, but more importantly will enable an assessment of connection capacities where connection agreements are shared with generating CMUs using those technologies.
