

<h2 style="margin: 0;">Proposal for a Capacity Market Rules Change</h2>		 Making a positive difference for energy consumers
		<b>Reference number</b> (to be completed by Ofgem): <b>CP155</b>
<b>Name of Organisation(s) / individual(s):</b> Jill Brown, RWE Supply and Trading GmbH	<b>Date Submitted:</b> 15th January 2016	
<b>Type of Change:</b>  <input checked="" type="checkbox"/> Amendment  <input type="checkbox"/> Addition  <input type="checkbox"/> Revoke  <input type="checkbox"/> Substitution	<b>If applicable, whether you are aware of an alternative proposal already submitted which this proposal relates to:</b>	
<b>What the proposal relates to and if applicable, what current provision of Rules the proposal relates to (please state provision number):</b>  Chapter 1 – General Provisions - Definition of Distribution Connection Agreement.		
<b>Description of the issue that the change proposal seeks to address:</b>  The definition of Distribution Connection Agreement should be changed in order to cover situations where there are shared connections between counterparties, so that both an owner or a dispatch controller can be the counterparty to the agreement with the DNO.		
<b>If applicable, please state the proposed revised drafting (please highlight the change):</b>  Chapter 1 – General Provisions Distribution Connection Agreement “means, for a Distribution CMU, an agreement entered into <del>between</del> <i>with</i> a DNO <del>and the person responsible for that CMU</del> for the connection of that CMU to, and use of, a Distribution Network”.		
<b>Analysis and evidence on the impact on industry and/or consumers including any risks to note when making the revision - including, any potential implications for industry codes:</b>  This proposal will enable Applicants at CMUs with shared connections where the counterparty to the Distribution Connection Agreement is not responsible for that CMU, to participate in the Prequalification process.
