Modifications to the disapplication conditions of the Independent Gas Transporter (IGT) and Independent Distribution Network Operator (IDNO) licences

Following our statutory consultation published on 11 December 2015¹ (the statutory consultation), the Gas and Electricity Markets Authority² (the Authority) has decided to modify the existing disapplication conditions set out in:

- Special Condition 1 of IGT licences' granted or treated as granted under section 7 of the Gas Act 1986 ('the Gas Act') - paragraphs 8 to 13;
- Amended Standard Condition BA2 of the IDNO licence granted or treated as granted under section 6(1)(c) of the Electricity Act 1989 ('the Electricity Act') - paragraphs 6 to 13³.

We received one response to the statutory consultation which is published alongside this letter.⁴ The respondent did not have any further objections to the modifications we proposed. We do not propose any further drafting changes to the proposed modifications set out in our statutory consultation.

The Authority hereby modifies the licences of all IGT and IDNO licences in the manner specified in the attached Notice.

Yours faithfully

James Veaney
Head of Electricity Connections and Constraints Management

¹ [Statutory consultation on amending the disapplication conditions of the Independent Gas Transporter \(IGT\) and Independent Distribution Network Operator \(IDNO\) licences](#)

² References to the "Authority", "Ofgem", "we" and "our" are used interchangeably in this document

³ The modification amends paragraphs 6-12 for Energetics Electricity Ltd, ESP Electricity Ltd, The Electricity Network Company Ltd and Independent Power Networks Ltd.

⁴ The statutory consultation sets out the background to why we are making these modifications to the licences including the reasons and effect of the changes.
