22 June 2016

Dear Rob,

## **RE: Project Nexus consultation on options for a successful implementation**

Thank you for the opportunity to respond to the above consultation proposing an additional delay to the NEXUS programme.

We agree with Ofgem and the conclusions of the PWC analysis that NEXUS implementation be delayed and note the target "go-live" of between 1 February 2017 and 1 April 2017.

We are critically aware of the congestion and potential overlap of IT and system changes that are being progressed by the industry including DCC rollout and the faster switching programme. To ensure all these programmes are efficiently delivered for consumers it is important that these large change programmes are appropriately scheduled and aligned. We trust any clarity as to the exact timing of the implementation will be communicated to all industry participants as soon as possible.

If you require any further information related to our response please contact Ben.Sheehy@cooperativeenergy.coop in the first instance.

Yours sincerely

Pete Westall
