

## Schedule 2C - Summary of February Consultation responses on proposed modifications to the standard conditions of the electricity interconnector licence

### Standard Condition 1: Definitions and Interpretation

Respondent	Ref	Comments	Suggested alternative drafting (tracked changes represent suggested changes)	Ofgem view
FAB Link		Section G should be added to the reference to other sections in paragraph 11, paragraph 11a and paragraph 11b	In Sections A,B,C,D, E- <del>or</del> F, or G	We have proposed changes to paragraph 11 to ensure references made to the different sections includes new Section G

### Standard Condition 1A: Application of Section G – No comments received

### Standard Condition 24: Definitions

Respondent	Ref	Comments	Suggested alternative drafting (tracked changes represent suggested changes)	Ofgem view
FAB Link	Definition of “Relevant Year”	The definition of Relevant Year (in the Proposed new special conditions for Nemo Licence) and for the provision of information to the GB System Operator (in the Proposed modification to the electricity Interconnector licence standard conditions) is the same in name but different in meaning to the rest of the licence. Ofgem should consider introducing a new title to remove any potential misunderstanding	Suggest replace “Relevant Year” with TNUoS Reporting Relevant Year” or similar where appropriate.	We have changed the title of the defined term “Relevant Year” in proposed standard condition 26 to “TNUoS Reporting Relevant Year” in order to differentiate it from the ‘Relevant Year; definition used in the rest of the licence and thereby remove any potential misunderstanding. -

### Standard Condition 25: Cap and Floor Regulatory Instructions and Guidance - No comments received

## Standard Condition 26: Provision of information to the GB System Operator

Respondent	Ref	Comments	Suggested alternative drafting (tracked changes represent suggested changes)	Ofgem view
NGET		It is not clear when the difference between the original and any revised estimates will be accounted for in Standard Condition 26. Para 16 in Nemo Special Condition 10 may cover this with reference to "shall be paid ... in accordance with applicable requirements in the CUSC" however we suggest further clarifying the provisions		Differences between the best estimate and latest best estimate for the $ICF_t$ term (provided by the licensee in accordance with paragraph 2 and 3 of this condition) and revised estimates for the $ICF_t$ term (provided by the licensee in accordance with paragraph 4 of this condition) should be accounted for in arrangements to be set out in, in due course, in the CUSC.
FAB Link	Definition of "Relevant Year"	The definition of Relevant Year (in the Proposed new special conditions for Nemo Licence) and for the provision of information to the GB System Operator (in the Proposed modification to the electricity Interconnector licence standard conditions) is the same in name but different in meaning to the rest of the licence. Ofgem should consider introducing a new title to remove any potential misunderstanding	Suggest replace "Relevant Year" with TNUoS Reporting Relevant Year" or similar where appropriate.	We have changed the title of the defined term "Relevant Year" in this condition to "TNUoS Reporting Relevant Year" to remove any potential misunderstanding
