

Energy Company Obligation

Monthly Update

20 October 2016

Issue 16

Dear Stakeholder

Read on for updates on new scheme developments from October 2016.

We have highlighted that the ECO2 transition (ECO2t) guidance consultation (part 1) has now been published. This outlines our approach to administering proposed changes to the scheme.

Our response to the deemed scores consultation has been published, and the Cavity Wall Insulation (CWI) U-values checklist has also been updated.

The newsletter includes the regular links to the updated ECO delivery statistics, and finally a reminder to fill in the

Other recent developments

Deemed scores

We have published the response to our [deemed scores consultation](#) alongside the final set of deemed scores. This allows industry to start planning, in case BEIS decide to introduce them.

ECO survey

A final call to have your say by responding to our [ECO stakeholder survey](#).

ECO2t consultation events

We are holding three [consultation events](#) in London, Glasgow and Cardiff.

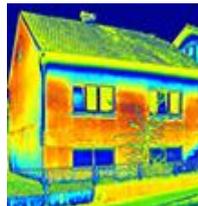

If you'd like to attend these events please email ECO@ofgem.gov.uk.

Installer FAQs

Check out our recently updated [FAQs](#) for installers and industry.

CWI U-values checklist

The CWI [U-values checklist](#) has been updated to reflect changes to the Reduced data Standard Assessment Procedure (RdSAP) conventions 3.08.

About ECO

ECO is a government scheme to reduce carbon dioxide emissions from Britain's domestic housing and support people living in fuel poverty by funding energy efficiency improvements.

It places legal obligations on larger energy suppliers to deliver energy efficiency measures to domestic premises in Great Britain. The scheme began in 2013, and the overall obligation period for the second phase of ECO (ECO2) runs from 1 April 2015 to 31 March 2017.

Ofgem E-Serve is the administrator of ECO while BEIS is responsible for the policy.
