Proposal summary (short summary, suitable for published description on our website)

Allow DSR Tests to take place during prequalification

What the proposal relates to and if applicable, what current provision of Rules the proposal relates to (please state provision number):

Rule 13.2.3 States: "No DSR Test may take place during the Prequalification Assessment Window for any Capacity Auction."

Description of the issue that the change proposal seeks to address:

We see no justifiable reason why DSR Tests should not take place during prequalification, it is up to the Delivery Body to manage its workload. Prequalification is a key period where DSR CMUs will need to be conducting DSR Tests, it is not always possible to conduct these far enough in advance of prequalification.

If applicable, please state the proposed revised drafting (please highlight the change):
Revoke rule 13.2.3

Analysis and evidence on the impact on industry and/or consumers including any risks to note when making the revision - including, any potential implications for industry codes:

This will allow more DSR CMUs to enter prequalification which would otherwise have been unable to complete their DSR Tests in time.

Details of Proposer (please include name, telephone number, email and organisation):
