Latest news and updates

[ECO2 progress reports](#)

Our monthly [ECO2 progress reports](#) show delivery against suppliers' ECO2 targets.

The latest monthly update shows that 48,311 solid wall insulation installations have been approved under ECO2, from April 2015 to March 2017.

[View the charts](#)

[ECO2t monitoring guidance](#)

We have published [guidance](#) for suppliers on technical and score monitoring for measures installed under ECO2t.

We will also shortly publish an updated version of the supplementary guidance for monitoring and pathways to compliance on this page.

[About ECO](#)

ECO is a government scheme to reduce carbon dioxide emissions from Britain's domestic housing and support people living in fuel poverty by funding energy efficiency improvements.

It places legal obligations on larger energy suppliers to deliver energy efficiency measures to domestic premises in Great Britain. The scheme began in 2013, and the overall obligation period for the second phase of ECO runs from 1 April 2015 to 30 September 2018.

Ofgem E-Serve is the administrator of ECO while BEIS is responsible for the policy. You can read about Ofgem's role on the scheme on our [website](#).
