

Received by email dated 26 April 2017

Dear Anna and Steve,

On behalf of The Clwydian Range and Dee Valley AONB Partnership and Joint Committee I would like to fully support your recent proposal to modify existing price controls to include the opportunity to mitigate existing overhead National Grid Powerlines.

It is the first time the 20 Protected Landscapes of national importance can truly see some local benefit to carrying the burden of the infrastructure that benefits the wider Nation. We welcome the enlightened approach from National Grid led by Hector Pearson and welcome the support that Ofgem has given in this project.

I would hope that other Utilities and Regulators will follow suit !

Regards

Howard Sutcliffe
