

Internal Only

Dear Andrew,

Thank you for reading my response to the consultation.

My elderly mother is an owner of a small scale hydro scheme. She sees this 100Kwh scheme as her pension, however, with the potential change to embedded benefits, she will see nearly 10% reduction in her income because of the Triad Cuts. My proposal is that you should only reduce Triads for large scale embedded generators i.e. 1MW plus schemes which clearly cause the most distortion.

Thank you very much.

Raoul
