Int provision of Rules the proposal relates commitment Milestone, Substantial rden is on the applicant to know where s being 'x' months before the start of the d lead to penalties and removal of the CM address: I applicable new build dates in date format dance' is published, this should include the nt Milestone, Long Stop Date, Connection attained, single line diagram submitted, as nical Milestone progress report. The latter of construction after 3,6 and 9 months and there is no definition of when the reporting ates would remove all ambiguity <i>lease highlight the change</i>):	

CM rules and may not enter into a CM agreement as they do not necessarily understand when they are required to achieve certain milestone or submit reports on the build progress. This proposal does not implement any new changes to the rules apart from placing the onus on National Grid's EMR team to publish the appropriate dates alongside the dates they already publish for prequalification, credit cover provision and auction etc. If implemented, this proposal would allow prospective generating stations to make informed decisions and to more accurately forecast their construction plan.
