

Annex 5. UKPN.

Minimum criteria potentially not met (2)

The pilot for the unmetered overhead line connections was extended to include shrouding of live conductors LV. This was added to the pilot as a direct result of consultation with the ICP's during the pilot process. The last consultation has been held on the 7th September 2017 and the pilot will be going to BAU.

Before and during the pilot process UKPN were receptive to any comments or issues we had and responded quickly. I have felt that this process worked for both the DNO and ICP's .
