

Internal Only

On behalf of University of St Andrews, which is one of the largest electricity consumers in Fife, I can confirm that SP Distribution has consistently engaged with us. Their engagement has been robust, positive and solution focussed, and they have followed up on any issues our discussions have highlighted.

They have been responsive and assisted the University in future planning, allowing us to understand electricity distribution issues, and working with us to provide solutions.

This is in stark contrast to Scottish Water or SGN who have refused to discuss distribution issues with us.
