NO

Q1.

Do you agree with our proposal to opt for *SCR Option 3: Ofgem leads an end-to-end SCR process, as outlined on pages 5-6 of the Launch Statement?*

Ecotricity doesn't agree that Ofgem should opt for Option 3, as we believe that Option 2 is the most appropriate option for the SCR.

Option 2 provides some consistency with the current industry change process, yet still allows Ofgem the scope to raise the modifications and have that element of governance as the proposer.

The industry consistently oversee change and have a greater understanding of cross-code relationships, which puts the industry in a better position for this responsibility than Ofgem. The industry would therefore be best placed to coherently oversee the code specific and cross-code implications.

This is why Ecotricity believes Option 2 is the best option for all parties.

Q2.

Do you agree with our proposed governance model for the Target Operating Model, outlined on pages 6-8 of the Launch Statement and detailed in Appendix 2A? This includes the Terms of Reference for the DWG and DAB in Appendices 2C and 2D.

No comment.

Q3.

Do you agree with the Target Operating Model Design Principles, set out in Appendix 2B?

No comment.
