Organisation: National Grid Electricity Transmission

Contact: Mike Oxenham

Is your feedback confidential? YES NO

Q1. Do you agree with our proposal to opt for SCR Option 3: Ofgem leads an end-to-end SCR process, as outlined on pages 5-6 of the Launch Statement?

We are generally supportive of 'Option 3' being the preferred option in this instance.

Q2. Do you agree with our proposed governance model for the Target Operating Model, outlined on pages 6-8 of the Launch Statement and detailed in Appendix 2A? This includes the Terms of Reference for the DWG and DAB in Appendices 2C and 2D.

We agree that Elexon are well placed to lead the development of the TOM and we are generally supportive of the governance model and Terms of Reference in this instance.

We note that Elexon will be responsible for engaging with a wide set of stakeholders and also that there is opportunity for adhoc participation in the DWG as and where there is a requirement for particular expertise. Therefore, we would appreciate involvement in the development of the TOM at any relevant touch points between the TOM design and the roles and responsibilities of the System Operator, such as in relation to transmission network charging. We are happy to work with Ofgem, Elexon and the DWG to better define exactly where these touch points may be as the programme progresses.

Q3. Do you agree with the Target Operating Model Design Principles, set out in Appendix 2B?

We have no concerns with the proposed TOM Design Principles.
