9. General feedback	<p>We have not made any new connections in the licence area(s) in the period but we have made applications for a number of sites and received offers at 11, 33 and 132kV.</p> <p>Positive:</p> <ol style="list-style-type: none"> 1. It is generally possible to have timely and meaningful conversations with the system planners 2. Connection offers are generally clear and comprehensive 3. The information available on the website is comprehensive 4. The network mapping made available to Customers is excellent 5. The publication of Appendix G's relating to GSP's is very useful 			

	<p>Negative:</p> <ol style="list-style-type: none"> 1. They did not consult with stakeholders prior to re-introducing A&D fees (however, of all the DNO's, WPD's new charging regime seems the most considered) 2. They do not offer a formal application service whereby, prior to confirming the import/export capacity required, a customer can ask the DNO to investigate a range of export/import capacity options for a premises and identify the various different connection solutions in detail. 3. Staged payments should be possible on all grid offers. Payment on acceptance must but justifiable. If the works are not going to proceed for sometime it is not reasonable for the DNO to demand that monies associated with works are paid on acceptance.
