

Electricity Network Innovation Competition Full Submission
Supplementary Answer Form

Project: _____

Tick if this answer has been provided verbally: ☐

Project code		Question Number	28
Question date	27/09/2018	Answer date	02/10/18
Submission section question relates to			
Topic	Value for Money		
Question	Can you confirm that the outputs from Method 3 (Uber data) will be made freely available?		
Notes on question			
Answer	<p>The learning from the Uber data, which will provide a detailed picture of how electric Private Hire Vehicles (PHVs) behave and charge during the day across the four network license areas included in the project, will be openly shared and made freely available through reporting and stakeholder forums/workshops and industry presentations.</p> <p>For confidentiality reasons and compliance to GDPR, it will not be possible to share the actual routing (raw) data itself, which will be generated outside of the Project. This is to ensure the data will not be combined with other data sets that could compromise the anonymity of Uber's drivers and customers.</p>
