

Electricity Network Innovation Competition Full Submission
Supplementary Answer Form

Project: Charge: Rfuelling Tomorrow's Electrified Transport

Tick if this answer has been provided verbally: ☐

Project code	SPMV1	Question Number	23		
Question date	23/08/18	Answer date	28/08/18		
Submission section question relates to		N/A			
Topic	b) Value for money				
Question	For Method 2, where batteries are used, who will own them, and how will their costs be recovered?				
Notes on question					
Answer	<ul style="list-style-type: none">• As per our response to Question 17 we are not intending to own batteries in the project• Where a third party organisation provides storage as a solution, they will likely look to recover their costs via normal market arrangement (e.g. FFR, balancing services, etc)• If third party organisations are not willing to provide suitable solutions in the right geographies, the project will seek to deploy a small quantity of small scale batteries as a proof of concept only.
