

Electricity Network Innovation Competition Full Submission
Supplementary Answer Form

Project: Charge: Refuelling Tomorrow's Electrified Transport

Tick if this answer has been provided verbally: ☐

Project code	SPMV1	Question Number	36		
Question date	30/08/18	Answer date	03/09/18		
Submission section question relates to		N/A			
Topic	Partners/external funding				
Question	Please explain how deliverables 6 and 9.4 go beyond the standard learning dissemination requirements of the Governance Document and should be separate deliverables in their own right.				
Notes on question					
Answer	<p>Although Deliverable 6 has a deadline of 31/12/2022 additional reports will be released as a when key milestones are achieved, in particular the output from the different stages of Method 2. The Final Report on Network Trials will not only provide details of the trials and their outcomes, but will produce a set of engineering guidance documents that can be used across other DNOs. It will provide recommendations/policy support which the industry can use to help them with planning and roll out of EV charge infrastructure and the best types of connection arrangements/incentives to have in order to support the roll out. This type of information is not always easily extracted from reports that simply focus on the learning from the trial.</p> <p>We also intend to work closely with network planners from other DNOs as we develop the methodology to help smooth the path for wider adoption of the methods. Dissemination work conducted towards the end of the project (such that feedback cannot be incorporated into the design) significantly reduces the confidence that other DNOs will have in the outputs.</p> <p>We would be happy to amend the deliverable decription to make this clearer for stakeholders.</p>
