| Project code | SPMV1 | Question Number | 26 |
| Question date | 23/08/18 | Answer date | 28/08/18 |
| Submission section question relates to | | N/A | |
| Topic | d) Is innovative | | |
| Question | How was the SGS ANM Strata selected for this project. Was the market surveyed to determine if there is any off-the-shelf products available? | | |
| Notes on question | | | |
| Answer | <ul style="list-style-type: none">• There is no 'off the shelf' product specifically targeted at the management of the specific aspects we wish to demonstrate as this trial; Monitor grid, manage DER, and demonstrate smart interventions.• ANM Strata is the ANM Platform of our chosen partner - SGS• ANM Strata has already demonstrated its ability to manage large volumes of DER in the UK (324 MW connected) including demand, storage and EV.• SPEN have first-hand experience of this product and its ability to provide value for money in innovation projects through flexibility and extensibility.• The use case here is new, so the choice of ANM Strata and SGS means that the consumer will not be funding the development of a new solution – funding will not go towards development work on the platform | | |
