

Electricity Network Innovation Competition Full Submission
Supplementary Answer Form

Project: Charge: Rfuelling Tomorrow's Electrified Transport

Tick if this answer has been provided verbally: ☐

Project code	SPMV1	Question Number	22
Question date	23/08/18	Answer date	28/08/18
Submission section question relates to		N/A	
Topic	b) Value for money		
Question	How will the SGS ANM Strata be integrated with the existing SP systems? Does this trial lock SP into using the SGS product for all its schemes or does SGS ANM Strata act on a feeder or substation area rather than the system as a whole?		
Notes on question			
Answer	<p>SGS have provided costs required to pull together the bid based on their extensive experience working with a range of Network Operators. The ANM strata solution has been designed to provide standard interfaces which enable the integration with existing SPEN systems. In addition the flexibility of the solution ensures that offerings from other vendors can be integrated into the platform.</p> <p>ANM Strata can be applied on a per feeder basis ensuring that any trials will not lock in SPEN into using SGS products for BaU adoption. A tendering process would be conducted for any post trial BaU adoption, ensuring best value for money and the lowest overall cost for customers.</p>
