Dear Chiara,

**Enabling the competitive deployment of storage in a flexible energy system: Changes to the electricity distribution licence**

Scottish and Southern Electricity Networks (SSEN) is responding to the above statutory consultation on behalf of its electricity distribution licensees Scottish Hydro Electric Power Distribution plc (SHEPD) and Southern Electric Power Distribution plc (SEPD).

We have provided input during the development of these changes and the accompanying guidance. As such, we have no further comments to add at this stage in the process.

Yours sincerely,

Gillian Hilton  
Regulation
