

Electricity distributors,
electricity suppliers and all
other interested parties

Making a positive difference
for energy consumers

Email: RIIO.ED1@ofgem.gov.uk

Date: 28 January 2019

To interested parties,

Statutory consultation on modifications to the Electricity Distribution Licence to recover the costs associated with appointing a Supplier of Last Resort

In cases where an existing supplier goes out of business, Ofgem appoints a Supplier of Last Resort (SoLR). Holders of electricity distribution licences face a number of issues with regards to the process governing the recovery of the costs associated with the appointment of a SoLR.

On 20 November 2018 we published an informal consultation on modifications to the Electricity Distribution Licence which aimed to address those issues.

This letter explains the relevant background, summarises responses to our informal consultation and, in light of having considered those responses, sets out a Statutory Consultation on modifications to the Electricity Distribution Licence.

1. Background

Electricity and gas is supplied through markets and on the basis of a competitive process in Great Britain. While competition has the potential to bring many benefits to consumers, a competitive process occasionally leads to companies failing. This applies as much in relation to the gas and electricity supply markets as it does to other markets.

Ofgem can ensure continuity of supply to the failed supplier's customers and prevent wider negative effects by appointing a SoLR to supply the failed supplier's customers at very short notice. This process also ensures that the credit balances of the failed supplier's residential customers are protected. Certain costs are incurred as part of this process, some of which fall on the DNOs.

These costs fall mainly into two categories:

- claim from an Ofgem appointed SoLR for a Last Resort Supply Payment (LRSP); and
- use of system (UoS) bad debts, i.e. the unpaid dues, to the DNOs, of one or more electricity suppliers that have had their electricity supply licence revoked.

Further details on these categories and the background to this issue can be found in our informal consultation¹.

2. Summary of proposed changes

In our Informal Consultation we proposed to make the following changes to the Electricity Distribution Licence:

- To amend 'SLC 38. Treatment of payment claims for last-resort supply' such that the condition would only apply to certain Valid Claims received before 31 March 2019.
- To introduce a new condition 'SLC 38A. Treatment of unresolved payment claims for last-resort supply where Valid Claim is received before 31 March 2019' to:
 - (1) distinguish between claims and how they are treated based on when they were received and the stage they have reached in the cost recovery process
 - (2) set out that any shortfall or excess should be dealt with via the pass-through term (PT_t) in CRC 2B.
- To introduce a new condition 'SLC 38B. Treatment of payment claims for last-resort supply where Valid Claim is received on or after 31 March 2019' to outline the treatment of such claims. The main component of this condition set out the basis of a materiality threshold which, if breached by the value of a single or aggregate claims, would allow the licensee to seek a derogation from the Authority to increase its UoS charges to recover the value of the claims within the relevant regulatory year.
- To introduce a new condition 'SLC 38C. Treatment of Valid Bad Debt Claims' to set out the basis on which the DNOs, on receipt of a Valid Bad Debt Claim, make payments to the claimant. This condition also outlined that, where there are cumulative claims in one year, these should be treated as a single aggregated figure for the purpose of calculating the total value of bad debt claims.
- To introduce a new condition 'BA5. Valid Bad Debt Claims' to enable IDNOs to make a bad debt claim to each relevant distributor. The purpose of this proposal was to ensure that IDNOs are treated on an equivalent basis to DNOs with respect to Bad Debt.
- To amend 'CRC 2B. Calculation of Allowed Pass-Through Items' to introduce a new 'SLR_t' term which would be included in the calculation of pass-through costs as part of the Allowed Pass-Through Items (PT_t) term and would allow for the pass-through of cost associated with Supplier of Last Resort Costs. In addition, a new 'EBD_t' term, included in the calculation of pass-through costs as part of the PT_t term, would allow for the pass-through of Eligible Bad Debt. We included more than one version of this condition as the existing conditions are different for SSEH and for all WPD licensees.
- To amend 'SLC1: Definitions for the standard condition' to include additional definitions and incorporate some that were moving from other conditions.

3. Respondents' views and Ofgem's responses

We received 13 responses to the informal consultation from stakeholders representing the network companies, suppliers and other interested parties.

All respondents agreed that it was important to address the above-mentioned points, particularly in view of recent supplier failures. However, not all respondents agreed with the proposals set out in the informal consultation. Overall, 9 out of the 13 respondents supported the proposed licence modifications. The 4 respondents that did not support the proposals were suppliers or related organisations.

Below we set out the key issues that have emerged from the responses to our informal consultation by summarising the respondents' views and then providing our response to each of them.

Notice period for obligation to Pay the Claimant

In our informal consultation, we set out in SLC 38B that "*where the licensee receives a Valid Claim, the licensee must make payments to the Claimant, by monthly instalments commencing 60 days after the date on which the Valid Claim was received...*"

Respondents' views

Five respondents considered that a 60-day notice period to commence payments to the Claimant would be insufficient and might be incompatible with the current procedure for revising distribution use of system (DUoS) charges in certain scenarios. They noted that it could result in a lag of up to four years before the DNOs could recover those costs.

Our view

We agree with the points made by the respondents. The introduction of a 60-day period could in some circumstances, given the 15-month requirement for changes to charges, result in a material delay to DNOs recovering those costs.

We have therefore revised the proposal for this consultation to include a notice period of three months between the receipt of a Valid Claim by a licensee and commencement of payments to the Claimant.

Amendment to provisions around Valid Bad Debt Claims

In our informal consultation we proposed a licence condition to govern the process of submission and payment of Valid Bad Debt Claims.

Respondents' view

A number of respondents raised the same two key points regarding these provisions. Firstly, they consider that these provisions should extend to the case of DNOs operating out of area². Secondly, they argued that bad debts arising from DUoS payments not yet due should also be included in the scope of Valid Bad Debt Claims.

² Some DNOs have networks that operate out of their respective licenced area.

Our view

Provided that the licence authorises the distribution of electricity out of area, we do not consider that CRC2B needs to be revised because any bad debt incurred in respect of out of area business will be bad debt incurred with respect to Use of System Charges as defined in CRC2B.

We agree with the second point regarding 'not yet due' bad debt in respect of DUoS charges overdue. We also agree that 100 per cent of the face value of any such bad debt should be recoverable. This will be consistent with the rules³ which determine the proportion of DUoS bad debt a licensee can recover, which is relative to the age of the debt at the time of insolvency.

To reflect this, we have added another category to the table in Appendix 7 of CRC2B and in Appendix 1 of Amended Standard Condition BA5.

Proposed changes introduce distortion between treatment of DNOs and IDNOs⁴

One of objectives, at which the drafting in the informal consultation aimed, was to ensure greater consistency in the treatment of DNOs and IDNOs with respect to SoLR claims and the associated treatment of bad debt. Some stakeholders raised concerns that the currently proposed changes create distortions between the treatment of DNOs and IDNOs.

Respondents' view

Two respondents do not support the proposed changes to allow IDNOs to recover Valid Bad Debt Claims resulting from unpaid use of system charges by a failed supplier. They argue that IDNOs have a choice regarding where to participate and as such, they are able to factor in the risk of any bad debts into their business plans either explicitly or in cost of capital assumptions.

Our view

We do not agree with the argument that the proposals favour IDNOs. Our view is that DNOs and IDNOs should be treated in the same way, in so far as it is practical to do so. Given DNOs already have a mechanism to recover bad debt, and IDNOs do not, we have proposed a way for IDNOs to do this.

We do not think that DNO's can factor any future UoS bad debt into their business model with any degree of precision, as required in a competitive market. The IDNO cannot influence a customer's choice of retail supplier (i.e. the party that will run up any bad debt). Moreover, there is no way of predicting whether a supplier will fail, and the supplier can change multiple times over the lifetime of an asset. Accordingly, we consider it appropriate to propose a mechanism for recovering DUoS bad debt by IDNOs.

³ [Best practice guidelines for gas and electricity network operator credit cover](#) and [DCUSA SCHEDULE 1-COVER](#)

⁴ Independent Distribution Network Operators. IDNOs are not subject to the same price control regulations as they are not incumbent monopoly networks and compete under open competitive market rules. [Info](#)

We do recognise that some parties retain concerns with respect to the overall treatment of IDNOs vs. DNOs. This was also expressed in responses to our recent consultation on licence applications from affiliates of existing licensees.⁵ We plan to make an information request to the relevant parties to allow us to better understand the issues and fill gaps in our understanding where they exist. This and other related work on the topic may lead to further changes in how we regulate independent networks in the future.

Concerns that proposed changes will undermine the 15-month notice for DUoS changes and are fundamentally at odds with the recent price cap setting methodology

Currently, DNOs are required to provide 15 months' notice to change DUoS charges for the next regulatory year. This was established under the Distribution Connection and Use of System Agreement (DCUSA)⁶. Some respondents have expressed concerns that our proposed changes would undermine the 15 month notice requirement and increase supplier risk, particularly in light of the imminent introduction of the default tariff cap.

Respondents' view

Four respondents argued that the proposals set out in the informal consultation would allow the DNOs to adjust network charges within the 15-month period, effectively breaching the notice period and reducing the time available to suppliers to adjust their tariffs accordingly. They noted that this would be further exacerbated in the case of fixed term tariffs and by the decision to introduce a retail tariff price cap ('price cap'). This could increase charging volatility and mean suppliers having to carry a proportion of SoLR claim costs for a period of time. Taken together, they argued our proposals would introduce hitherto unexpected risk into the supplier's business model.

All four respondents argued that derogations from the 15 month notice requirement should only be granted if a DNO could demonstrate that financing the SoLR claim would prevent it from maintaining an investment credit rating. One respondent argued that standard financial administration processes are more appropriate to deal with these circumstances.

Our view

We do not consider that the proposals outlined in the informal consultation went any further than current arrangements allow, in so far as the management of the 15-month notice period for changes to DUoS charges are concerned. We noted in our decision on DCP178 that the workgroup had considered the interactions between a LRSP and the 15-month notice period. Our view is that nothing within DCP178 removed the ability for a DNO to apply to the Authority for a derogation to the 15-month notice period requirement in order to adjust network charges. They have done so recently, directly in response to SoLR cases in order to recover any Valid Claim amounts paid to a Claimant.

What the proposals will do is create a Materiality Threshold. DNOs will be unable to amend DUoS charges at short notice where claims are below the Materiality Threshold. We accept that this will not be the case for claims which exceed the Materiality

⁵ <https://www.ofgem.gov.uk/publications-and-updates/independent-distribution-network-operators-licence-applications-affiliates-existing-licensees>

⁶ DCUSA [DCP178- Notification period for change to use of system charges](#)

Threshold. These may still be subject to a derogation on a similar basis to the current arrangements. As such, we do not consider that the proposals undermine the provisions in DCUSA. Indeed, if anything they reduce uncertainty about the potential impact on suppliers.

We appreciate that the upcoming price cap is a significant change in the retail markets and impacts on suppliers' business models. We note that Ofgem will undertake price cap revision biannually - in February (with effect from 1 April) and August (with effect from 1 October). On balance of risk, we feel that any changes to network charges should be able to be fed into the next revision of the price cap and thus allow suppliers to manage any associated cash flow risk. We recognise there are also fixed term tariffs, where suppliers cannot change their prices mid-contract. However, we consider this constitutes a lower level of risk and one that suppliers should be able to manage.

We note the view that derogations should only be granted a DNO's investment credit rating was threatened. We disagree with this view. This approach would result in a disproportionate level of risk being placed on network companies.

Finally, special administration arrangements do exist but for the purpose of significant failures. Ultimately, such arrangements are a matter for BEIS.

Limiting the risk exposure of network companies

The informal consultation included a number of mechanisms which influence the manner and timescales in which SoLR costs are passed through. A number of network companies expressed concerns with their risk exposure under these proposals.

Respondents' views

Among the proposals put forward by network companies to reduce their risk exposure were that:

- The Materiality Threshold in SLC 38B should apply to all liabilities including not just SoLR payment claims but also the companies own bad debt and relevant IDNO valid bad debt claims.
- In CRC 2B, the time period for Eligible Bad Debt being passed through to Allowed Revenue should be reduced from 3 years to 2 years.
- Potential liabilities should be managed by either: (1) DNO payments being made to the SoLR in the year that DNOs receive the amounts through increased charges; (2) DNOs being able to reflect a forecast LRSP amount when forecasting allowed revenue for the purpose of setting future DUoS prices; or (3) DNOs being able to revisit their current year and next year tariffs if and once the Materiality Threshold is breached.

Our view

While we understand the basis of a number of the concerns put forward by the network companies, we do not agree with the proposals as put forward by the respondents. The principal reason for this is the same as outlined in response to the concerns expressed by suppliers. It is important to achieve an appropriate balance of risk between network companies and suppliers. To adopt any of the proposals outlined above would put more risk on to suppliers which we do not consider to be appropriate.

Further issues highlighted by the consultation

The consultation highlighted two other issues:

- (1) whether to move the treatment of SoLR costs from 'UoS charges', which are defined in Standard Condition 1 as charges made by the licensee for the provision of Use of System to 'Other Charges' which are the categories of charges as defined within Section 2A of the DCUSA – the main difference being that it could allow changes to charges to occur more quickly; and
- (2) whether future Supplier of Last Resort cases could be addressed through the system operator and specifically SLC C24: Energy Administration and Energy Supply Company Administration: National Electricity Transmission System Operator Shortfall Contribution Obligations.

Respondents' views

Two respondents commented on whether to move from UoS charges to Other Charges. Both rejected the proposal on the basis that it would represent a deviation from well-established approaches.

In relation to whether future Supplier of Last Resort cases could be addressed through the system operator, again there was little support from respondents. One noted that there would be a number of practical differences with such an approach. However, another respondent did note that the current proposal should be a 'temporary solution' and considered Ofgem should design an enduring solution that minimises the role of DNOs in the SoLR cost recovery process.

Our views

We agree with the concerns expressed about cost recovery through 'Other Charges' and propose that cost recovery continues to be addressed through UoS Charges.

We agree that it is appropriate to streamline the SoLR cost recovery process in the short term until a more enduring solution can be found and that these proposals should be temporary. We will continue to review other options, including whether an approach based on the System Operator recovering costs could be made workable.

Drafting issues and other proposed changes

The majority of the other comments received related to drafting errors. These included corrections to erroneous numbering and cross-references, some suggested changes to the text to improve the readability and flow of the drafting or properly to reflect the intent of the drafting. Where these changes are straightforward and do not impact the policy intent, we have incorporated them into the Statutory Consultation in Annex 2 and do not provide an exhaustive list here.

Some of the more material drafting suggestions and our views and proposed approach are as follows:

- *Application of Energy Supply Company Administration Order* - One respondent considered that the current proposals did not explain clearly the scenario where an Energy Supply Company Administration Order (Special Administration

Regime- 'SAR') will apply and how this licence condition will interact in such a scenario. Similarly, another respondent sought clarity on what would happen if a bigger supplier ceased trading.

We think the drafting is sufficiently clear in that the relevant licence conditions will not apply in a case to which SAR applies. Regarding clarification of when such a SAR might apply, this is out of scope of this consultation and ultimately a matter for the government⁷ to decide within the parameters of the related legislative framework.

- *Definition of 'Excess Specified Amount'* – Three respondents considered that the definition of Excess Specified Amount did not reflect the policy intent in this area. All suggested different ways to address this.

We agree that the existing definition was not clear with respect to the impact of aggregate claims in any single year. We have proposed some changes to the definition to make this clearer.

- *Define 'interest' and 'relevant interest'* – One respondent considered that these should be defined terms.

We do not consider it is necessary to define 'interest' as the term it is widely used in other parts of the licence without definition. We have removed the references to 'relevant interest' as we do not consider these are required.

- *Define 'Materiality Threshold'* – one respondent considered that this should be a defined term in SLC 38B.

We agree and propose to add a definition.

- *Include new pass-through terms in the 'TRU' term* – one respondent noted that changes were required to another condition – CRC 2A – to ensure that the new pass-through items are included in the 'TRU' term, thereby ensuring they are treated in a similar way to other pass-through items.

We agree that this change is required to ensure all pass-through items are treated in the same way.

- *Include a table of worked examples* – one respondent supported a table to ensure that licence changes are applied consistently.

We do not consider that it would be appropriate to include a table of examples in the licence. However, we would be happy to work with licensees to provide guidance outside of the licence.

- *DCUSA modifications needed regarding changes to IDNO margins* - current proposals can potentially raise IDNO margins because the revision of DUoS charges will mean that IDNOs can also raise their charges as per the relative price control regime that they are regulated under.

We agree that certain modifications to the DCUSA will be needed to ensure that IDNOs do not receive any windfall margin increase as an unintended

⁷ Secretary of State of the Department of Business, Energy and Industrial Strategy

consequence of these proposals. We note that three modifications have been proposed and will be taken forward as part of a separate process. These will be concluded after this consultation process has concluded but should be completed before the changes set out in this consultation are applied.⁸

4. Changes to proposed licence drafting since the Informal Consultation

Having fully considered respondents views we propose to make a number of changes to the drafting that was set out in our informal consultation. The main changes are as follows:

- to include changes to another condition – CRC 2A – to ensure that the new pass-through items are included in the formulae for the 'TRU' term
- to paragraph 1 of SLC 38 to provide greater clarity as to when this condition applies
- to change the definition of 'Excess Specified Amount' in SLC 38B
- to change the period from which the licensee must make payment to the Claimant from 60 days after the date on which a Valid Claim is received to 3 months in SLC 38B
- to include a definition of 'Material Threshold' in SLC 38B
- to address erroneous cross-references, to improve the flow of the licence conditions and address other drafting errors.

5. Structure of this Statutory Consultation

There are two annexes to this letter:

- Annex 1 to this letter sets out our Notice of a statutory consultation on a proposal to modify the Electricity Distribution Licence to recover the costs associated with appointing a Supplier of Last Resort
- Annex 2 to this letter sets out the proposed changes to those licence conditions.

6. Views invited

Interested parties are requested to submit their views on or before **25 February 2019** to Grant McEachran at Ofgem, 10 South Colonnade, Canary Wharf, London, E14 4PU, or by email to RIIO.ED1@ofgem.gov.uk.

We normally publish all responses on our website. However, if you do not wish your response to be made public then please clearly mark it as confidential. We prefer to receive responses in an electronic form so that they can be placed easily on our website.

If you have any queries in relation to the issues raised in this letter, please feel free to contact Grant McEachran at RIIO.ED1@ofgem.gov.uk.

⁸ [DCP332 'Appropriate treatment and allocation of Last Resort Supply Payment claim costs'](#), [DCP333 'Appropriate treatment and allocation of eligible use of system bad debt costs'](#) and [DCP334 'Update to Schedule 15 \('Cost Information Table'\) to maintain alignment with the distribution licence'](#).

Yours sincerely,

Steve McMahon
Deputy Director, Electricity Distribution and Cross Sector Policy, Systems and Networks

Annex 1 – Notice of statutory consultation

To: All holders of an electricity distribution licence

Electricity Act 1989 Section 11A(2)

Notice of statutory consultation on a proposal to modify Standard Licence Conditions SLC 1 and SLC 38, Special Licence Condition CRC 2B and to introduce four new licence conditions – SLC 38A, SLC 38B, SLC 38C and Amended Standard Condition BA5 held by the above licensees

1. The Gas and Electricity Markets Authority ('the Authority')¹ proposes to modify:
 - (a) the electricity distribution licences granted or treated as granted under section 6(1)(c) of the Electricity Act 1989 ('the Act') to the above licensees by amending, in the manner set out in Annex 2:
 - Standard Licence Condition 1: Definitions for the standard conditions (SLC 1);
 - Standard Licence Condition 38: Treatment of payment claims for last-resort supply (SLC 38);
 - Special Licence Condition CRC 2A: Restriction of Allowed Distribution Network Revenue (CRC 2A);
 - Special Licence Condition CRC 2B: Calculation of Allowed Pass-Through Items (CRC 2B);
 - (b) the electricity distribution licences granted or treated as granted under section 6(1)(c) of the Act to the above licensees by adding four new licence conditions, as set out in Annex 2:
 - Standard Licence Condition 38A: Treatment of unresolved payment claims for last-resort supply where Valid Claim is received before 1 April 2019 (SLC 38A);
 - Standard Licence Condition 38B: Treatment of payment claims for last-resort supply where Valid Claim is received on or after 1 April 2019 (SLC 38B);
 - Standard Licence Condition 38C: Treatment of Valid Bad Debt Claims (SLC 38C); and
 - Amended Standard Condition BA5: Valid Bad Debt Claims.
2. The Authority considers that it is necessary to modify/ insert these conditions in the manner indicated to resolve the issues faced by DNOs with regards to the process for recovery of the costs associated with the appointment of a Supplier of Last Resort (SoLR) in cases where an existing supplier goes out of business. The proposed modifications also seek to ensure Independent Distribution Network Operators (IDNOs) are treated on an equivalent basis to DNOs.
3. The main effect of these proposed modifications is to:

- distinguish between claims and how they are treated based on when they were received and the stage DNOs are at in the process of recovering the claims;
 - establish a materiality threshold which, if breached by the aggregate value of claims, will allow the licensee to seek a derogation from the Authority to increase its UoS charges to recover the value of the claims within the relevant regulatory year;
 - ensure IDNOs are treated on an equivalent basis to DNOs with respect to Bad Debt; and
 - allow for the pass-through of cost associated with Supplier of Last Resort Costs and the pass-through of Eligible Bad Debt.
4. A copy of the proposed modification/modifications and other documents referred to in this Notice have been published on our website (www.ofgem.gov.uk). Alternatively they are available from our Research and Information Centre, (foi@ofgem.gov.uk)
 5. Any representations with respect to the proposed licence modifications must be made on or before **25 February 2019** to Grant McEachran at Ofgem, 10 South Colonnade, Canary Wharf, London, E14 4PU, or by email to RIIO.ED1@ofgem.gov.uk.
 6. We normally publish all responses on our website. However, if you do not wish your response to be made public then please clearly mark it as not for publication. We prefer to receive responses in an electronic form so they can be placed easily on our website.
 7. If we decide to make the proposed modification, it will take effect not less than 56 days after the decision is published.

.....
Steve McMahon
Deputy Director, Systems & Networks
Duly Authorised on behalf of the Gas and Electricity Markets Authority
28 January 2019

Annex 2 – Proposed modifications to the Electricity Distribution Licence relating to recovery of the costs associated with appointing a Supplier of the Last Resort

Table 1: Licence conditions covered by this consultation

STANDARD LICENCE CONDITIONS		Proposed change
SLC 1.	Definitions for the standard conditions	Amendments
SLC 38.	Treatment of payment claims for last-resort supply	Amendments
SLC 38A.	Treatment of unresolved payment claims for last-resort supply where Valid Claim is received before 1 April 2019	New
SLC 38B.	Treatment of payment claims for last-resort supply where Valid Claim is received on or after 1 April 2019	New

Condition 1. Definitions for the standard conditions

1. Introduction

- 1.1 This condition sets out most of the defined words and expressions (all of which begin with capital letters) that are used in the standard conditions of both Section A and Section B of this licence, and gives their definitions next to them.
- 1.2 But where defined words and expressions are used only in a particular standard condition, their definitions are included in that condition.

Definitions in alphabetical order

- 1.3 In the standard conditions of this licence, unless the context otherwise requires:

Act	means the Electricity Act 1989.
Affiliate	in relation to the licensee, means any Holding Company of the licensee, any Subsidiary of the licensee, or any Subsidiary of a Holding Company of the licensee.
Agency for the Cooperation of Energy Regulators	means the agency of that name established under Regulation 2009/713/EC of the European Parliament and of the Council of 13 July 2009 establishing an Agency for the Cooperation of Energy Regulators.
Agreed Upon Procedures	<p>means procedures from time to time agreed between the Authority, the Appropriate Auditor, and the licensee for the purpose of enabling the Appropriate Auditor to review and report to the Authority on matters relating to:</p> <p>(a) in the case of standard condition 44 (Regulatory Accounts), the licensee's compliance with the obligation to which Part E of that condition refers; and</p> <p>(b) in the case of standard condition 46 (Regulatory Instructions and Guidance), the licensee's provision of Specified Information (as defined in Part H of that condition).</p>
Application Regulations	means regulations made under section 6A of the Act that set out the form and manner in which applications for an Electricity Licence or any extension or restriction of such a licence are to be made.

Appropriate Auditor

means:

(a) in the case of a licensee that is a company within the meaning of section 1 of the Companies Act 2006, a person appointed as auditor under Chapter 2 of Part 16 of that Act;

(b) in the case of any other licensee that is required by the law of a country or territory within the European Economic Area to appoint an auditor under provisions analogous to those of Chapter 2 of Part 16 of that Act, a person so appointed; and

(c) in any other case, a person who is eligible for appointment as a company auditor under Part 42 of that Act.

Authorised

in relation to any business or activity, means authorised by licence granted or treated as granted under section 6 of the Act or, in any appropriate cases, by exemption granted under section 5 of the Act.

Authorised Electricity Operator

means any person (other than the licensee) who is Authorised to generate, participate in the transmission of, distribute, or supply electricity, participate in the operation of an Interconnector or provide a smart meter communication service, and includes any person who has made an application to be so Authorised which has not been refused and any person who transfers electricity to or from or across an Interconnector or has made an application for use of an Interconnector that has not been refused.

Authority

means the Gas and Electricity Markets Authority that is established under section 1 of the Utilities Act 2000.

Balancing and Settlement Code

means the Balancing and Settlement Code that is provided for in standard condition C3 (Balancing and Settlement Code) of the Transmission Licence.

Central Charge Database

means the database required to be established under the Master Registration Agreement to facilitate the validation of Green Deal Plans and the collection and remittance of Green Deal Charges as referred to and providing for such other matters as are set out in standard condition 35 (Central Charge Database) of a Supply Licence.

Charge Restriction Condition	means any condition of this licence the purpose of which (whether on its own or in combination with any other Charge Restriction Condition) is to provide for the determination of a maximum price that may be charged by the licensee or a maximum revenue that may be recovered by it.
Charging Methodology	<p>means a complete and documented explanation, presented in a coherent and consistent manner, of the methods, principles, and assumptions that apply:</p> <p>(a) in relation to Use of System, for determining the licensee's Use of System Charges; and</p> <p>(b) in relation to connections, for determining the licensee's Connection Charges,</p> <p>as approved by the Authority by virtue of the provisions of standard conditions 13, 13A, 13B and 22A (as the case may be).</p>
Citizens Advice	means the National Association of Citizens Advice Bureaux;
Citizens Advice Scotland	means the Scottish Association of the Citizens Advice Bureaux;
<u>Claimant</u>	<u>means an Electricity Supplier entitled to receive the benefit of a Last Resort Supply Payment.</u>
Competition and Markets Authority	means the Competition and Markets Authority established under the Enterprise and Regulatory Reform Act 2013.
Conditions	means all the conditions of the licence in question (which, for the purposes of this particular licence, means each standard condition, each Charge Restriction Condition that is not a standard condition, and any other condition however described that has effect in this licence).
Connection Charges	means charges made or levied, or to be made or levied, by the licensee for the provision, modification, or retention of connections to the licensee's Distribution System, whether or not such charges or any part of them are annualised, and may include, as appropriate, costs relating to any of the matters mentioned under paragraph A2 of Appendix 1 to standard condition 14 (Charges for Use of System and connection).
Connection Charging Statement	has the meaning given to that term in paragraph 14.1 of standard condition 14 (Charges for Use of System and connection)
Connection RIGs	means Regulatory Instructions and Guidance issued by the Authority under standard condition 15A (Connection Policy and Connection Performance) about Connection Policy and Connection Performance.

Connection Regulations	means regulations made in relation to connection standards of performance under section 39A of the Act.
Connection and Use of System Code	means the Connection and Use of System Code that is provided for in standard condition C10 (Connection and Use of System Code) of the Transmission Licence.
Customer	means any person who is supplied or requires to be supplied with electricity at any premises in Great Britain, but does not include any Authorised Electricity Operator in its capacity as such.
Data Aggregation	means services comprising any or all of the following: the collation and summation of Electricity Meter reading data (whether actual or estimated) and of data for the consumption of electricity at premises that receive an Unmetered Supply, and the delivery of such data to any person for Settlement Purposes.
Data Processing	means services comprising any or all of the following: the processing, validation, and estimation of Electricity Meter reading data, and the creation, processing, and validation of data for the consumption of electricity at premises that receive an Unmetered Supply, and the delivery of such data to any person for the purpose of Data Aggregation.
Data Retrieval	means services comprising any or all of the following: the retrieval and verification of Electricity Meter reading data from Electricity Meters and the delivery of such data to any person for the purpose of Data Processing.
Data Services	means and is to be understood as the totality of: <ul style="list-style-type: none"> (a) Metering Point Administration Services provided under and in accordance with the provisions of the Master Registration Agreement; and (b) Data Transfer Services provided by the Data Transfer Service.

Distribution Business	<p>means a business of the licensee (or, in relation to either of sub-paragraphs (a) and (c), a business of any Affiliate or Related Undertaking of the licensee) which, except to the extent otherwise specified by the Authority in a direction to the licensee, comprises any of the following activities:</p> <p>(a) the distribution of electricity through the licensee's Distribution System (including any business in providing connections to that system);</p> <p>(b) the provision of Metering Services and Metering Equipment (including the service of providing Legacy Metering Equipment within the meaning of standard condition 34); and</p> <p>(c) the provision of Data Services,</p> <p>and in each case includes any business that is ancillary to the business in question.</p>
Distribution Code	<p>means the Distribution Code approved by the Authority that the licensee is required to maintain in force under standard condition 21 (The Distribution Code) for the purposes set out in that condition.</p>
Distribution Connection and Use of System Agreement	<p>means the agreement of that name that the licensee is required to maintain in force in a form approved by the Authority under standard condition 22 (Distribution Connection and Use of System Agreement) for the purposes set out in that condition.</p>
Distribution Losses	<p>means Units lost while being transported through the licensee's Distribution System, including:</p> <p>(a) Units lost in the course of that process as a result of electrical impedance or the operation of that Distribution System; and</p> <p>(b) Units unaccounted for that can be attributed to Relevant Theft of Electricity, or to inaccuracies or errors in inventories of unmetered supplies.</p>

**Distribution
Services Area**

in relation to the licensee if it is a Distribution Services Provider, means the area specified as such by the Authority under:

(a) standard condition 2 (Application of Section C) of the licensee's Electricity Distribution Licence in the form in which that licence was in force on 31 May 2008; or

(b) standard condition 3 (Application of the Section B standard conditions) of the licensee's Electricity Distribution Licence in the form in which that licence was in force on 31 March 2015; or

(c) standard condition 3 (Application of the Section B standard conditions) of this licence on or after 1 April 2015.

**Distribution
Services
Direction**

in relation to the licensee if it is a Distribution Services Provider, means a direction given to the licensee by the Authority under, as may be appropriate:

(a) standard condition 2 (Application of Section C) of the licensee's Electricity Distribution Licence in the form in which that licence was in force at 31 May 2008; or

(b) standard condition 3 (Application of the Section B standard conditions) of this licence on or after 1 June 2008,

that specifies or describes the area within which, and the extent to which, the licensee will be obliged to comply with the requirements of the standard conditions of Section B of this licence.

**Distribution
Services Provider**

means any Electricity Distributor in whose Electricity Distribution Licence the requirements of Section B of the standard conditions of that licence have effect (whether in whole or in part).

Distribution System	means the system consisting (wholly or mainly) of electric lines owned or operated by an Authorised distributor that is used for the distribution of electricity from grid supply points or generation sets or other Entry Points to the points of delivery to Customers or Authorised Electricity Operators or any Transmission Licensee in its capacity as operator of that licensee's Transmission System or the GB Transmission System, and includes any Remote Transmission Assets (owned by a Transmission Licensee within England and Wales) that are operated by that Authorised distributor and any electrical plant, Electricity Meters, and Metering Equipment owned or operated by it in connection with the distribution of electricity, but does not include any part of the GB Transmission System.
Domestic Customer	means a Customer who is supplied or requires to be supplied with electricity at Domestic Premises (but excludes such Customer insofar as he is supplied or requires to be supplied at premises other than Domestic Premises).
Domestic Premises	means premises at which a supply of electricity is taken wholly or mainly for domestic purposes.
ED1 Final Determination	means: (a) in respect of the WPD Licensees, the document entitled "Decision to fast-track Western Power Distribution", together with all of the supporting, associated and other relevant documents referred to in that document, which was published by the Authority on 28 February 2014; and (b) in respect of all other Distribution Services Providers the documents comprising the Authority's determination of the restrictions to apply to that licensee's revenue for the period 1 April 2015 until 31 March 2023, as so designated by the Authority for the purpose of this definition.
Electricity Distribution Licence	means an electricity distribution licence granted or treated as granted under section 6(1)(c) of the Act that authorises an Electricity Distributor to distribute electricity.
Electricity Distributor	means any person who is Authorised by an Electricity Distribution Licence to distribute electricity.

Electricity Meter	means any meter which conforms to the requirements of paragraph 2 of Schedule 7 to the Act and is used for the purpose of measuring the quantity of electricity supplied to premises or, in any case other than that, any meter used for measurement purposes in connection with any of the activities of generating, transmitting, or distributing electricity.
Electricity Supplier	means any person who is Authorised to supply electricity.
Electronic Communication	means a message comprising text or an image of text that: <ul style="list-style-type: none"> (a) is sent over a Public Electronic Communications Network; (b) can be stored in that network or in the recipient's terminal equipment until it is collected by the recipient; and (c) is in a particular form and is used for a particular purpose and the recipient of it has expressed a willingness, to the sender, to receive it in that form and for that purpose.
Entry Point	means a point on the licensee's Distribution System at which units of electricity, whether metered or unmetered, enter that system.
Excluded Services	means those services which in accordance with the special conditions of this licence are treated as excluded services.
Exit Point	means a point on the licensee's Distribution System at which units of electricity, whether metered or unmetered, leave that system.
Export Charges	means Use of System Charges in relation to electricity generated and placed on a Distribution System via a direct connection to the source of generation
GB System Operator	means National Grid Electricity Transmission plc (which is the company incorporated in England and Wales under registered number 02366977) in its capacity as operator of the GB Transmission System.

GB Transmission System	means the system consisting (wholly or mainly) of high voltage electric lines owned or operated by Transmission Licensees within Great Britain that is used for the transmission of electricity from one generating station to a substation or to another generating station or between substations or to or from any Interconnector, and includes any electrical plant or Electricity Meters owned or operated by any Transmission Licensee within Great Britain in connection with the transmission of electricity, but does not include any Remote Transmission Assets.
Generation Licence	means an electricity generation licence granted or treated as granted under section 6(1)(a) of the Act that authorises a person to generate electricity.
Green Deal Arrangements Agreement	means the agreement providing for the entry of data relating to Green Deal Plans onto the Central Charge Database and the collection and remittance of Green Deal Charges, as referred to and providing for such other matters as are set out in standard condition 38 (Green Deal Arrangements Agreement) of a Supply Licence, in the form approved by the Secretary of State from time to time.
Green Deal Arrangements Data	has the meaning given to it in the Master Registration Agreement.
Green Deal Bill Payer	means a “bill payer” within the meaning of the Green Deal Regulations.
Green Deal Charges	means a payment required to be made under a Green Deal Plan by a Green Deal Bill Payer, as referred to in section 1(6) of the Energy Act 2011.
Green Deal Participant	means a party to the Green Deal Arrangements Agreement or a person identified by or pursuant to the Master Registration Agreement or the Green Deal Arrangements Agreement as an appropriate person to receive or send Green Deal Arrangements Data.
Green Deal Plan	has the meaning given to “green deal plan” in section 1(3) of the Energy Act 2011
Green Deal Premises	means a person who is authorised to act as a green deal provider under the Green Deal Regulations.

Green Deal Provider	has the meaning given to “green deal provider” in section 2(2) of the Energy Act 2011.
Grid Code	means the Grid Code that is required to be drawn up by the GB System Operator and approved by the Authority under standard condition 14 (Grid Code) of the Transmission Licence.
Holding Company	in relation to the licensee, means a holding company within the meaning of section 1159 of the Companies Act 2006.
Import Charges	means Use of System Charges in relation to electricity conveyed to any premises or to any other Distribution System
Indebtedness	means all liabilities that are now or hereafter due, owing, or incurred, whether actual or contingent, whether solely or jointly with any other person, and whether as principal or surety, together with any interest accruing on them and all costs, charges, penalties, and expenses incurred in connection with them.
Information	means information (other than information subject to legal privilege) in any form or medium and of any description specified by the Authority and includes any documents, accounts, estimates, returns, records, or reports and data of any kind, whether or not prepared specifically at the request of the Authority.
Interconnector	has the meaning given to “electricity interconnector” in section 4(3E) of the Act.
Interconnector Licence	means an electricity interconnector licence granted or treated as granted under section 6(1)(e) of the Act that authorises a person to participate in the operation of an Interconnector.
<u>Last Resort Supply Payment</u>	<u>means a sum of money payable to the Claimant to compensate for any additional costs that it has incurred as a result of complying with a direction from the Authority to supply electricity to premises in accordance with standard condition 8 (Obligations under Last Resort Supply Direction) of the Electricity Supply Licence.</u>
Legacy Metering Equipment	means Metering Equipment (whether owned by the licensee or not) provided by the licensee in respect of premises at which such equipment had been installed on or before 31 March 2007 and is of the same functionality as was being provided by the licensee at 1 June 2003.

Margin	means a monetary sum, forming part of a Connection Charge, that is in addition to the cost estimated to be incurred by the licensee in providing the Connection Activity that is the subject of that charge.
Master Registration Agreement	means the agreement of that name that the licensee is required to maintain in force in a form approved by the Authority under standard condition 23 (Master Registration Agreement) for the purpose of providing for the matters set out in that condition.
Metering Equipment	means an Electricity Meter and any associated equipment that materially affects its operation, and includes (if applicable) Legacy Metering Equipment within the meaning of standard condition 34 (Requirement to offer terms for the provision of Legacy Metering Equipment).
Metering Point	means the point, determined according to the principles and guidance given at Schedule 8 of the Master Registration Agreement, at which a supply of electricity taken into or conveyed from the licensee's Distribution System: <ul style="list-style-type: none"> (a) is or is intended to be measured; or (b) where Metering Equipment has been removed, was or was intended to be measured; or (c) in the case of an Unmetered Supply, is treated as measured.
Metering Point Administration Service	means the service of that name that the licensee must operate and maintain in accordance with the requirements of standard condition 18 (Provision of and charges for Metering Point Administration Services) for the purpose of providing Metering Point Administration Services.
Metering Point Administration Services	means the services to be provided by the Metering Point Administration Service as specified at Appendix 1 to standard condition 18 (Provision of and charges for Metering Point Administration Services).
Metering Services	means any of the services of installing, commissioning, testing, repairing, maintaining, removing, and replacing Metering Equipment.

National Consumer Council	means the body of that name established by section 1 of the Consumers, Estate Agents and Redress Act 2007 in the version before it was substituted by paragraph 12 of Part 1 (Amendments to Acts) of Schedule 1 of the Public Bodies (Abolition of the National Consumer Council and Transfer of the Office of Fair Trading's Functions in relation to Estate Agents etc.) Order 2014.
Non-Contestable Connection Services	means those services which, in accordance with the Connection Charging Statement prepared by the licensee under standard condition 14 (Charges for Use of System and connection), cannot be provided by a person other than the licensee.
Notice	means notice given directly to a person in Writing (and includes a notification).
Permitted Purpose	<p>means the purpose of any or all of the following:</p> <ul style="list-style-type: none"> (a) the licensee's Distribution Business; (b) any De Minimis Business of the licensee within the limits imposed by paragraphs 8 to 10 of standard condition 29 (Restriction of activity and financial ring-fencing of the Distribution Business); (c) any business or activity of the licensee to which the Authority has given its consent under paragraph 4 of standard condition 29; and (d) where appropriate, without prejudice to the generality of sub-paragraphs (a) to (c), any payment or transaction lawfully made or undertaken by the licensee in accordance with paragraph 3 of standard condition 41 (Restriction of Indebtedness and transfers of funds) or paragraph 1(b) of amended standard condition BA 4 (Indebtedness) of Section BA.
Priority Services Register	means the register containing details of certain Domestic Customers, known as Priority Services Register Customers, that must be established and maintained by the licensee in accordance with standard condition 10 (Special services and complaints procedure).

Priority Services Register Customers	means Domestic Customers at premises connected to the licensee's Distribution System who fall within the description set out at paragraph 3 of standard condition 10 (Special services and complaints procedure).
Public Electronic Communications Network	has the meaning given to that term in section 151 of the Communications Act 2003.
Regulation	means Regulation 2009/714/EC of the European Parliament and of the Council of 13 July 2009 on conditions for access to the network for cross-border exchange in electricity and repealing Regulation 2003/1228/EC
Regulatory Accounts	means the accounts of the licensee produced in accordance with standard condition 44 (Regulatory Accounts).
Regulatory Instructions and Guidance (RIGs)	means Regulatory Instructions and Guidance as provided for in standard condition 46 (Regulatory Instructions and Guidance).
Regulatory Year	means a period of twelve months beginning on 1 April in any calendar year and ending on 31 March of the next following calendar year.
Related Undertaking	in relation to the licensee, means any undertaking in which the licensee has a participating interest within the meaning of section 421A of the Financial Services and Markets Act 2000.
Relevant Asset	means any asset that for the time being forms part of the licensee's Distribution System, any control centre for use in conjunction with that asset, and any legal or beneficial interest in land (whether under the law of England and Wales or under the law of Scotland) upon, under, or over which any such asset or control centre is situated.
Relevant Connection	means any connection to the licensee's Distribution System other than an LVSSA connection or an LVSSB connection within the meaning given to those terms respectively in Part F of Charge Restriction Condition 2F (Time to Connect Incentive).

Relevant Theft of Electricity	<p>means the abstraction of electricity in circumstances where:</p> <p>(a) any person takes a supply of electricity that is in the course of being conveyed by the licensee; or</p> <p>(b) any person at premises at which a connection has been restored in contravention of paragraph 5(1) of Schedule 6 to the Act takes a supply of electricity that has been conveyed to those premises by the licensee, and the supply is taken otherwise than in pursuance of:</p> <p>(i) a contract made with an Electricity Supplier, or</p> <p>(ii) a contract deemed to have been made with an Electricity Supplier by virtue of paragraph 3 of Schedule 6 to the Act or paragraph 23 of Schedule 7 to the Utilities Act 2000; or</p> <p>(c) any person takes a supply of electricity at premises which have never been registered with an Electricity Supplier.</p>
Remote Transmission Assets	<p>means any electric lines, electrical plant, or Electricity Meters in England and Wales owned by a Transmission Licensee (“the owner transmission licensee”) which:</p> <p>(a) are embedded in the licensee’s Distribution System or the Distribution System of any Authorised distributor and are not directly connected by lines or plant owned by the owner transmission licensee to a substation owned by that licensee; and</p> <p>(b) are by agreement between the owner transmission licensee and the licensee or such Authorised distributor operated under the direction and control of the licensee or that distributor.</p>
Representative	means any person who is directly or indirectly authorised to represent the licensee in its dealings with Customers.
Settlement Purposes	means for the purposes of settlement as provided for in the Balancing and Settlement Code.
Smart Metering System	has the meaning given to it in standard condition 1 of the Standard Conditions of Electricity Supply Licences.
<u>Specified Amount</u>	<u>means the amount specified in a Valid Claim.</u>

Subsidiary	means a subsidiary within the meaning of section 1159 of the Companies Act 2006.
Supply Licence	means an electricity supply licence granted or treated as granted under section 6(1)(d) of the Act that authorises a person to supply electricity.
Transmission Licence	means an electricity transmission licence granted or treated as granted under section 6(1)(b) of the Act that authorises a person to participate in the transmission of electricity.
Transmission Licensee	means any person who is Authorised by a Transmission Licence to participate in the transmission of electricity.
Transmission System	means those parts of the GB Transmission System that are owned or operated by a Transmission Licensee within the transmission area specified in its Transmission Licence.
Ultimate Controller	<p>means any of the following:</p> <p>(a) a Holding Company of the licensee that is not itself a Subsidiary of another company; and</p> <p>(b) subject to notes 1 and 2 below, any person who (whether alone or with a person or persons connected with him) is in a position to control, or exercise significant influence over, the policy of the licensee or the policy of any Holding Company of the licensee by virtue of:</p> <p>(i) rights under contractual arrangements to which he is a party or of which he is a beneficiary, or</p> <p>(ii) rights of ownership (including rights attached to or deriving from securities or rights under a trust) which are held by him or of which he is a beneficiary.</p> <p>note 1: for the purposes of sub-paragraph (b), a person is connected with another person if he is a party to any arrangement regarding the exercise of any such rights as are described or referred to in that sub-paragraph.</p> <p>note 2: sub-paragraph (b) does not include any director or employee of a corporate body in his capacity as such.</p>
Unit	means a kilowatt hour of electricity.
Unmetered Supply	means a supply of electricity to premises that is not being measured by Metering Equipment for the purpose of calculating the charges for that supply.
Unregulated Margin	<p>means a Margin that:</p> <p>(a) becomes chargeable in relation to Connection Activities by the licensee in the circumstances set out in paragraph 14.16 of standard condition 14 (Charges for</p>

	<p>Use of System and connection) and Part A of Charge Restriction Condition 2K (Margins on licensee's Connection Activities); and</p> <p>(b) is not limited in its amount by any provision of this licence.</p>
Use of System	means use of the licensee's Distribution System for the distribution of electricity by the licensee on behalf of any person (and agreements for Use of System include all those provisions of the Distribution Connection and Use of System Agreement that relate to such use).
Use of System Charges	means charges made or levied, or to be made or levied, by the licensee for the provision of Use of System and certain other services as part of its Distribution Business to any person, but does not include Connection Charges.
Use of System Charging Statement	has the meaning given to that term in paragraph 14.1 of standard condition 14 (Charges for Use of System and connection).
<u>Valid Claim</u>	<u>means a claim for which the Claimant has received the Authority's consent under standard condition 9 (Claims for Last Resort Supply Payment) of the Electricity Supply Licence.</u>
Website	means a website controlled and used by the licensee to communicate with a Customer or any member of the public for reasons relating to the distribution of electricity.
Working Day	means any day other than a Saturday, a Sunday, Christmas Day, Good Friday, or a day that is a bank holiday within the meaning of the Banking and Financial Dealings Act 1971.
WPD Licensee	<p>means each of the following:</p> <ul style="list-style-type: none"> - Western Power Distribution (West Midlands) plc (registered number 3600574); - Western Power Distribution (East Midlands) plc (registered number 2366923); - Western Power Distribution (South Wales) plc (registered number 2366985); and - Western Power Distribution (South West) plc (registered number 2366894).
Writing	includes writing that is sent or received by Electronic Communication.

Some legislative definitions

Condition 38. Treatment of payment claims for last-resort supply where Valid Claim is received before 1 April 2019

Application of this condition

38.1 This condition applies if the licensee receives from any Claimant a Valid Claim for a Last Resort Supply Payment before 1 April 2019 and:

- (a) the licensee has commenced the process of recovering the Valid Claim through Use of System Charges in accordance with paragraph 38.2 of this condition, but the licensee has not yet increased or decreased its Use of System charges in accordance with paragraphs 38.4 or 38.5 of this condition to correct any shortfall or excess, in which case the licensee must:
 - (i) follow the process set out in paragraphs 38.2, 38.3, 38.7 and 38.9 of this condition in respect of the initial recovery of the Valid Claim;
and
 - (ii) follow the process set out in paragraphs 38A.1(b)(ii) and 38A.1(b)(iii) of standard condition 38A in respect of the treatment of any shortfall or excess.

or

- (b) the licensee has commenced the process of recovering the Valid Claim through Use of System Charges in accordance with paragraph 38.2 of this condition and has increased or decreased its Use of System charges in accordance with paragraphs 38.4 or 38.5 of this condition to correct any shortfall or excess, in which case the licensee must:
 - (i) follow the process set out in paragraphs 38.4 or 38.5 of this condition in respect of the treatment of any shortfall or excess; and
 - (ii) follow the process set out in paragraph 3 of standard condition 38A in respect of the treatment of any residual shortfall or excess which remains following the consequential increase or decrease in Use of

System charges once the process set out in paragraph 38.4 or 38.5 of this condition has been followed.

Obligation to increase Use of System Charges

- 38.2 Where the licensee receives a Valid Claim, it must, during the Relevant Regulatory Year, make an increase to its Use of System Charges relating to the distribution of electricity to premises in respect of that year to such an extent as it reasonably estimates is appropriate to ensure that the consequential increase in its Use of System revenue will equal the Specified Amount.
- 38.3 During, or as soon as practicable after the end of, the Relevant Regulatory Year, the licensee must pay to the Claimant by quarterly or monthly instalments (as specified in the Valid Claim) the amount of the consequential increase in its Use of System revenue mentioned in paragraph 38.2 of this condition, to the extent that it does not exceed the Specified Amount.

Treatment of any shortfall

- 38.4 If the amount paid to the Claimant under paragraph 38.3 of this condition is less than the Specified Amount, the licensee must in the next Regulatory Year:
- (a) pay to the Claimant (in accordance with any direction given to the licensee by the Authority) the amount of the shortfall plus 12 months' interest on that amount; and
 - (b) increase its Use of System Charges relating to the distribution of electricity to premises during the Regulatory Year that follows the Relevant Regulatory Year to such extent as it reasonably estimates is appropriate to ensure that the consequential increase in its Use of System revenue will equal the amount of the shortfall plus 12 months' interest on that amount.

Treatment of any excess

- 38.5 If the amount of the consequential increase in Use of System revenue mentioned in paragraph 38.3 of this condition exceeds the Specified Amount, the licensee must, during the year following the Relevant Regulatory Year, reduce its Use of System Charges relating to the distribution of electricity to premises to the extent that it reasonably estimates is necessary in order to reduce its Use of System revenue for that year by an amount equal to the excess plus 12 months' interest on that amount.

Questions for the Authority

- 38.6 Any question about the reasonableness of any estimate made for the purposes of paragraphs 38.2, 38.4, or 38.5 of this condition is to be resolved by the Authority.

Disregard of certain matters

- 38.7 In calculating the licensee's Use of System revenue during any period for the purposes of any Charge Restriction Condition that may be applicable to the licensee under this licence, any increase or decrease in Use of System revenue attributable to the licensee's compliance with this ~~standard~~ condition must be treated as if it had not occurred.
- 38.8 The provisions of this condition have effect even if the licensee has not provided the Notice required under paragraph ~~17~~ 11 of standard condition 14 (Charges for Use of System and connection).

Obligation to prepare and publish statement

- 38.9 The licensee must, in respect of each Regulatory Year in which it increases or reduces its Use of System Charges under paragraph 38.2, 38.4, or 38.5 of this condition:
- (a) prepare a statement that shows the matters detailed at paragraph 38.10 of this condition;
 - (b) give any such statement to the Authority within the first four months of

the Regulatory Year following that to which it relates; and

- (c) publish that statement in such manner as the licensee believes will ensure adequate publicity for it (including on the licensee's Website, if it has one).

38.10 The matters referred to in paragraph 38.9(a) of this condition are these:

- (a) in the case of an increase in the licensee's Use of System Charges under paragraph 38.2 of this condition, the total amount of its Use of System revenue derived from that increase;
- (b) in the case of an increase in the licensee's Use of System Charges under paragraph 38.4 of this condition, the total amount of its Use of System revenue derived from that increase;
- (c) in the case of a reduction in the licensee's Use of System Charges under paragraph 38.5 of this condition, the total amount of the decrease in its Use of System revenue resulting from that reduction; and
- (d) in the case of each Last Resort Supply Payment made in response to a Valid Claim, the total payments made to the relevant Claimant in respect of the Regulatory Year in question (whenever those payments were made).

Cumulative effect of separate claims

38.11 Where the licensee receives more than one Valid Claim for a Last Resort Supply Payment, such changes in its Use of System Charges as would result from the separate fulfilment of its obligations under this condition in relation to each such claim are to be given effect within the Relevant Regulatory Year as a single aggregated change in Use of System Charges.

Interpretation

38.12 For the purposes of this condition:

~~**Claimant** means an Electricity Supplier entitled to receive the benefit of a Last Resort Supply Payment.~~

~~**Last Resort Supply Payment** means a sum of money payable to the Claimant to compensate for any additional costs that it has incurred as a result of complying with a direction from the Authority to supply electricity to premises in accordance with standard condition 8 (Obligations under Last Resort Supply Direction) of the Electricity Supply Licence.~~

Relevant Regulatory Year means, in relation to any Valid Claim:

- (a) where the claim was received by the licensee at least 60 days before the beginning of a Regulatory Year, that Regulatory Year; or
- (b) where the claim was received by the licensee less than 60 days before the beginning of a Regulatory Year, the next Regulatory Year.

Specified Amount means the amount specified in a Valid Claim plus interest calculated as simple interest on that amount for the period beginning with the date on which the Valid Claim was received by the licensee and ending with the date that is 61 days before the start of the Relevant Regulatory Year (unless that period is of 30 days or less, in which case no interest will be payable).

~~**Valid Claim** means a claim for which the Claimant has received the Authority's consent under standard condition 9 (Claims for Last Resort Supply Payment) of the Electricity Supply Licence.~~

Condition 38A. Treatment of unresolved payment claims for last-resort supply where Valid Claim is received before 1 April 2019

Application of this condition

38A.1 This condition applies if the licensee receives from any Claimant a Valid Claim for a Last Resort Supply Payment before 1 April 2019 and:

- (a) the licensee has not yet commenced the process of recovering the Valid Claim through Use of System Charges in accordance with paragraph 2 of standard condition 38, in which case the licensee must follow the process set out in standard condition 38B; or
- (b) the licensee has commenced the process of recovering the Valid Claim through Use of System Charges in accordance with paragraph 2 of standard condition 38, but the licensee has not yet increased or decreased its Use of System charges in accordance with paragraphs 4 or 5 of that condition to correct any shortfall or excess, in which case it must:
 - (i) follow the process set out in paragraphs 2, 3, 7 and 9 of standard condition 38 in respect of the initial recovery of the Valid Claim;
 - (ii) in the event of a shortfall in recovery of the Valid Claim, pay to the Claimant the amount of the shortfall plus any interest on that amount; and
 - (iii) follow the process set out in paragraph 38A.3 of this condition in respect of the treatment of any shortfall or excess.

38A.2 Where the licensee received a Valid Claim before 1 April 2019 and the licensee has commenced the process of recovering the Valid Claim through Use of System Charges in accordance with paragraph 2 of standard condition 38 and has increased or decreased its Use of System charges in accordance with paragraphs 4 or 5 of that condition to correct any shortfall or excess it must:

- (a) follow the process set out in paragraphs 4 or 5 of standard condition 38 in respect of the treatment of any shortfall or excess; and
- (b) follow the process set out in paragraph 38A.3 of this condition in respect of the treatment of any residual shortfall or excess which remains following the consequential increase or decrease in Use of System charges once the process set out in paragraphs 4 or 5 of standard condition 38 has been followed.

Treatment of any shortfall or excess

38A.3 If the amount recovered through Use of System Charges on completion of the processes outlined in paragraphs 38A.1(b) or 38A.2 of this condition does not equal the Specified Amount, the licensee must include the shortfall or excess in SLRA_t, as defined in Licence Condition CRC 2B, Calculation of Allowed Pass-Through Items.

Interpretation

38A.4 For the purposes of this condition:

Specified Amount means the amount specified in a Valid Claim plus interest calculated as simple interest on that amount for the period beginning with the date on which the Valid Claim was received by the licensee and ending with the date that is 61 days before the start of the Relevant Regulatory Year (unless that period is of 30 days or less, in which case no interest will be payable).

Condition 38B. Treatment of payment claims for last-resort supply where Valid Claim is received on or after 1 April 2019

Application of this condition

- 38B.1 Subject to paragraph 38B.2, this condition applies if the licensee:
- (a) receives from any Claimant a Valid Claim for a Last Resort Supply Payment on or after 1 April 2019; or
 - (b) receives from any Claimant a Valid Claim for a Last Resort Supply Payment before 1 April 2019 and has not yet commenced the process of recovering the Valid Claim through Use of System Charges in accordance with standard condition 38A.1(a).
- 38B.2 This condition does not apply following a successful application for an Energy Supply Company Administration Order in accordance with section 96 Energy Act 2011.

Obligation to pay the Claimant

- 38B.3 Where the licensee receives a Valid Claim, the licensee must make payments to the Claimant, by monthly or quarterly instalments commencing three months after the date on which the Valid Claim was received, such three month period to include the date of receipt of the Valid Claim, so that the total Specified Amount has been paid in full in accordance with a schedule defined by the Authority, and in any event by no later than 15 months from the date on which the Valid Claim was received.

Cumulative effect of separate claims

- 38B.4 Where the licensee makes payments in respect of more than one Valid Claim within the Regulatory Year t , $SLRA_t$ (as defined in CRC 2B, Calculation of Allowed Pass-Through Items) shall be treated as a single aggregated figure representing the total

value of payments made to all Claimants in the Regulatory Year t, excluding Valid Claims subject to paragraph 38B.9 of this condition.

Application of Materiality Threshold

- 38B.5 If the value of aggregated payments to be made by a licensee in respect of Valid Claims, less the aggregated payments to be made by a licensee in respect of Valid Claims subject to paragraph 38B.9 of this condition, in any Regulatory Year would exceed the Materiality Threshold amount applicable to the licensee, as shown in Appendix 1 (the "Materiality Threshold"), the licensee may within 28 days of receipt of the Valid Claim that results in breach of the Materiality Threshold give notice to the Authority of its intention to increase its Use of System Charges for the Relevant Regulatory Year to the extent that the licensee reasonably estimates is necessary in order to recover the Excess Specified Amount as defined in 38B.7.
- 38B.6 Subject to paragraph 38B.5 of this condition, where the licensee requires a derogation in order to increase its Use of System Charges for the Relevant Regulatory Year, the Authority may, after consulting with the licensee, give a direction ("a derogation") to the licensee relieving it of its obligations under the relevant conditions to such extent, for such period of time, and subject to such conditions as may be specified in the derogation.
- 38B.7 Subject to paragraphs 38B.5 and 38B.6 of this condition, the Excess Specified Amount will equate to the aggregate value of Valid Claims received in a Regulatory Year that would cause the Materiality Threshold in any single Regulatory Year to be breached.
- 38B.8 Any Valid Claim received after paragraph 38B.7 of this condition has effect, in any Regulatory Year: (a) which does not result in the aggregate value of payments made in respect of Valid Claims exceeding the Materiality Threshold; or (b) in respect of which the licensee has not provided notice under paragraph 38B.5 of this condition; or (c) in relation to which a derogation required by the licensee is not

given by the Authority under paragraph 38B.6 of this condition, may not be included in the Excess Specified Amount. The aggregate value of payments made in respect of such Valid Claims shall be recovered in SLRA_t (as defined in CRC 2B, Calculation of Allowed Pass-Through Items) in accordance with paragraph 38B.4 of this condition.

38B.9 Where the licensee has given notice under 38B.5 of this condition and, if applicable, the Authority has given a derogation under paragraph 38B.6 of this condition, it must unless the Authority directs otherwise:

- (a) in the Relevant Regulatory Year, increase ESAt in accordance with paragraph 2B.35 of Licence Condition CRC 2B (or paragraph 2B.38 for SSEH), (Calculation of Allowed Pass-Through Items by the Excess Specified Amount); and
- (b) in the Relevant Regulatory Year, increase its Use of System Charges in accordance with the approved Use of System Charging Methodology in force under standard condition 13 (Charging Methodologies for Use of System and connection).

38B.10 The provisions of this condition have effect even if the licensee has not provided the Notice required under paragraph 11 of standard condition 14 (Charges for Use of System and connection).

Interpretation

38B.11 For the purposes of this condition:

Excess Specified Amount means the aggregate value of Valid Claims which, in any Regulatory Year, would cause a breach of the Materiality Threshold recovered in accordance with paragraph 38B.9 of this condition.

Materiality Threshold means the amount determined for each licensee in Appendix 1 of this condition.

Relevant Regulatory Year for this condition only means, in relation to any Valid Claim(s) resulting in breach of the Materiality Threshold:

- (a) where the claim was received by the licensee at least three months before the beginning of a Regulatory Year, that Regulatory Year; or
- (b) where the claim was received by the licensee less than three months before the beginning of a Regulatory Year, the next Regulatory Year.

APPENDIX 1:

Condition 38C. Treatment of Valid Bad Debt Claims

Application of this condition

38C.1 This condition applies if the licensee receives a Valid Bad Debt Claim from a Bad Debt Claimant.

Obligation to pay the Bad Debt Claimant

38C.2 Where the licensee receives a Valid Bad Debt Claim, it must, during or as soon as practicable after the end of the Applicable Regulatory Year, make payments to the Bad Debt Claimant, in instalments (12 monthly instalments unless otherwise agreed with the Bad Debt Claimant), until such a time as the total Specified Bad Debt Amount has been paid in full.

38C.3 Where the licensee receives an adjustment to a previous Valid Bad Debt Claim under paragraph 11 of standard condition BA5, Claims for Use of System Bad Debt, and where the licensee is required to make a further payment to the Bad Debt Claimant, the licensee shall pay the Bad Debt Claimant the amount of that adjustment plus any interest:

- (a) on the date of the first instalment following receipt of the adjusted claim, where that claim is received 30 days or more prior to the date on which that first instalment is due (including the date of receipt of that claim);
- (b) on the date of the second instalment following receipt of the adjusted claim, where that claim is received less than 30 days prior to the date on which that first instalment is due (including the date of receipt of that claim); or
- (c) within 30 days of receipt of the adjusted claim (including the date of receipt), where no further instalments are due.

Cumulative effect of separate claims

38C.4 Where the licensee receives more than one Valid Bad Debt Claim requiring payment in the Applicable Regulatory Year t, IBDAT (in CRC 2B, Calculation of Allowed Pass-Through Items) shall be treated as a single aggregated figure representing the total Specified Bad Debt Amount of all Valid Bad Debt Claims requiring payment in the Applicable Regulatory Year t, plus any adjustments to previous Valid Bad Debt Claims received in the Regulatory Year t.

Interpretation

38C.5 For the purposes of this condition:

Applicable Regulatory Year means, in relation to any Valid Bad Debt Claim, the next Regulatory Year in respect of which the licensee has not been required to publish its final Use of System Charges, (the “Next Regulatory Year”) unless the licensee is required to publish its final Use of System Charges within 40 days of the date on which the licensee received the Valid Bad Debt Claim in which case it shall be the Regulatory Year after the Next Regulatory Year.

Bad Debt Claimant means a Non-Distribution Services Provider entitled to receive payment for a Valid Bad Debt Claim.

Non-Distribution Services Provider means any Electricity Distributor in whose Electricity Distribution Licence the requirements of Section B of the standard conditions of that licence do not have effect (whether in whole or in part).

Specified Bad Debt Amount means the amount specified in a Valid Bad Debt Claim.

Valid Bad Debt Claim means a claim for bad debt incurred by a Non-Distribution Services Provider with respect to Use of System Charges as a result of the insolvency of one or more Electricity Suppliers whose Electricity Supply Licences have been revoked and in respect of which the Bad Debt Claimant has received the Authority's consent under standard condition BA5. Claims for Use of System Bad Debt.

Condition BA5. Valid Bad Debt Claims

Ability to make claim

- 1 If the licensee has received the Authority's consent under paragraph 5 of this condition, it may make a Valid Bad Debt Claim under standard condition 38C, Treatment of Valid Bad Debt Claims.
- 2 The licensee may make a Valid Bad Debt Claim to each Relevant Distributor in accordance with paragraphs 9, 11 and 13 of this condition.

Process for making claim

- 3 If the licensee intends to make a Bad Debt Claim in respect of bad debts incurred in a regulatory year not before 2018/19, no later than 60 days after the end of a Regulatory Year in respect of that Regulatory Year, it must:
 - (a) give Notice to the Authority of its claim; and
 - (b) in a statement in a form prescribed by the Authority, provide to the Authority the amount of the bad debt plus any interest.
- 4 If the licensee intends to make a Bad Debt Claim in respect of bad debts incurred in 2015/16, 2016/17 or 2017/18, it must no later than 30 June 2019:
 - (a) give Notice to the Authority of its claim; and
 - (b) in a statement in a form prescribed by the Authority, provide to the Authority the amount of the bad debt plus any interest.
- 5 If the Authority considers it appropriate in all the circumstances of the case for the licensee to make the Bad Debt Claim notified to it in accordance with paragraph 3 or paragraph 4 of this condition, the Authority shall, by Notice within three months of having received the claim, give its consent to the licensee for the licensee to make a Valid Bad Debt Claim and direct the amount to be included in the Valid Bad Debt Claim (the "Relevant Amount").
- 6 The Authority may only adjust the amount specified in the statement submitted by the licensee in accordance with paragraph 3 or paragraph 4 of this condition for: (a) any

amount of the bad debt that has arisen because of the licensee's failure to follow Schedule 1 ('Cover') of the Distribution Connection and Use of System Agreement ("the DCUSA"); and (b) the proportion of the value of bad debt relative to the age of that bad debt at the time of the Defaulting Electricity Supplier's insolvency, calculated as shown in Appendix 1 of this condition.

7 A direction issued by the Authority under paragraph 5 of this condition will be of no effect unless, before issuing it, the Authority has:

- (a) by Notice to each Relevant Distributor, set out the terms of the proposed direction;
- (b) specified in the Notice the reasons for the Authority's proposed modifications;
- (c) specified in the Notice the period (which may not be less than 14 days from the date of the Notice) within which the licensee may make representations to the Authority about its proposals; and
- (d) given due consideration to any representations received in response to the Notice.

8 If the Authority makes a direction under paragraph 5 of this condition, the amount specified by it must be treated as the Relevant Amount for the purpose of paragraph 9 of this condition.

Submissions to Distribution Services Providers

9 A Valid Bad Debt Claim by the licensee to each Relevant Distributor must specify:

- (a) the respective proportion of the Relevant Amount to be paid by the Relevant Distributor (being the bad debt incurred by the licensee relating to premises in the Relevant Distributor's Distribution Services Area supplied by the Electricity Supplier which has had its Electricity Supply Licence revoked);
- (b) any interest on the Relevant Amount calculated as simple interest

for the period beginning on the date of the Valid Bad Debt Claim and ending on the date that is 31 March of the Regulatory Year before the Valid Bad Debt Claim will be paid in accordance with paragraph 2 of standard condition 38C, Treatment of Valid Bad Debt Claims; and

- (c) the payment instalments that have been agreed with the Relevant Distributor. In the absence of such agreement, payments will be made in 12 monthly instalments.

- 10 Where the licensee intends to make a Valid Bad Debt Claim to a Relevant Distributor, it shall submit such claim within six months beginning with the date that the Authority gives its consent to the licensee pursuant to paragraph 5 of this condition.

Adjustment to previous claim

- 11 Within 60 days of receipt of the Final Reconciliation Settlement Run for the final day of supply by the Electricity Supplier which has had its Electricity Supply Licence revoked, the licensee must revise the Relevant Amount (the "Revised Relevant Amount") and, if the Revised Relevant Amount differs by more than or equal to 10% of the Relevant Amount, the licensee must:

- (a) give Notice to the Authority of the difference between the Revised Relevant Amount and the Relevant Amount;
- (b) give Notice to each Relevant Distributor of the respective proportion of the Revised Relevant Amount and the Relevant Amount;
- (c) where the Revised Relevant Amount is lower than the Relevant Amount, submit a further Valid Bad Debt Claim for the difference between the Revised Relevant Amount and the Relevant Amount (the "Lower Difference") plus any interest on the Lower Difference in accordance with paragraph 9 of this condition and pay the Lower Difference to the Relevant Distributor on the date of the next

payment instalment from the Relevant Distributor, providing that date is not less than 30 days from the date the licensee provided Notice to the Relevant Distributor, and where no further payment instalments are required shall be within 30 days; and

- (d) where the Revised Relevant Amount is higher than the Relevant Amount (the "Higher Difference"), submit a further Valid Bad Debt Claim for the Higher Difference plus any interest on the Higher Difference in accordance with paragraph 9 of this condition.

12 Any revision to a Valid Bad Debt Claim made in accordance with paragraph 11 of this condition must be made within 60 days of receipt of the Final Reconciliation Settlement Run for the final day of supply by the Electricity Supplier which has had its Electricity Supply Licence revoked.

13 If the licensee makes a successful claim to recover bad debts from the administrator of a Defaulting Electricity Supplier, within 60 days of recovering any bad debt ("the Recovered Amount"), the licensee must:

- (a) give Notice to the Authority of the value of the Recovered Amount;
- (b) give Notice to each Relevant Distributor of the amount to be returned, being the proportion of the Recovered Amount relative to the Relevant Amount paid by the Relevant Distributor to which the Recovered Amount relates; and
- (c) submit a further Valid Bad Debt Claim for the Recovered Amount plus any interest on this amount in accordance with paragraph 9 of this condition and pay the Recovered Amount to the Relevant Distributor on the date of the next payment instalment from the Relevant Distributor, providing that date is not less than 30 days from the date the licensee provided Notice to the Relevant Distributor, and where no further payment instalments are required shall be within 30 days.

Interpretation

14 For the purposes of this condition:

Bad Debt Claim means a claim for bad debt incurred after 1 April 2015 by a Non-Distribution Services Provider with respect to Use of System Charges as a result of the insolvency of one or more Electricity Suppliers whose Electricity Supply Licences have been revoked.

Defaulting Electricity Supplier means an Electricity Supplier whose insolvency has resulted in the licensee incurring bad debt. For the purposes of this condition the timing and definition of insolvency is as per the Insolvency Act 1986.

Final Reconciliation Settlement Run has the meaning given to that term in Section U2.3 of the Balancing and Settlement Code (BSC).

Non-Distribution Services Provider means any Electricity Distributor in whose Electricity Distribution Licence the requirements of Section B of the standard conditions of that licence do not have effect (whether in whole or in part).

Relevant Distributor means each Distribution Services Provider in whose Distribution Services Area the relevant Electricity Supplier, which has had its Electricity Supply Licence revoked, supplied electricity to premises connected to a Distribution System not owned by such Distribution Services Provider.

Valid Bad Debt Claim means a claim for bad debt incurred by a Non-Distribution Services Provider with respect to Use of System Charges as a result of the insolvency of one or more Electricity Suppliers whose Electricity Supply Licences have been

revoked and in respect of which the Bad Debt Claimant has received the Authority's consent under paragraph 5 of this condition.

APPENDIX 1

Proportion of recoverable bad debt in respect of use of system charges overdue for payment at the date of the Defaulting Electricity Supplier's insolvency

<u>No. of business days past due</u>	<u>Percentage of face value recoverable</u>

<u>>65</u>	<u>5</u>

CRC 2A. Restriction of Allowed Distribution Network Revenue

Introduction

2A.1 This condition:

- (a) establishes the charging restrictions that determine the level of Allowed Distribution Network Revenue that may be recovered by the licensee from Use of System Charges; and
- (b) sets out the obligation of the licensee in respect of those restrictions.

Part A: Licensee's obligation

2A.2 The licensee, in setting Use of System Charges, must use its reasonable endeavours to ensure that, in Regulatory Year t , Regulated Distribution Network Revenue does not exceed its Allowed Distribution Network Revenue.

Part B: Calculation of Allowed Distribution Network Revenue (AR_t)

2A.3 Allowed Distribution Network Revenue, in Regulatory Year t , is derived in accordance with the following formula (in this condition, the Principal Formula):

$$AR_t = BR_t + IP_t + PT_t + NIA_t + LCN_t - AUM_t + CGSRA_t + DLGT_t - K_t$$

2A.4 In the Principal Formula:

AR_t	means the amount of Allowed Distribution Network Revenue in Regulatory Year t .
BR_t	means the amount of Base Demand Revenue in Regulatory Year t , as derived in accordance with the formula set out in Part C of this condition.
IP_t	means the incentive revenue adjustment made in Regulatory Year t , as derived in accordance with the formula set out in Part D of this condition.
PT_t	means the Allowed Pass-Through Items revenue adjustment made in Regulatory Year t , as derived in accordance with CRC 2B (Calculation of Allowed Pass-Through Items).
NIA_t	means the Network Innovation Allowance revenue adjustment made in Regulatory Year t , as derived in accordance with CRC 2H (The Network Innovation Allowance).
LCN_t	means the low carbon networks fund revenue adjustment made in Regulatory Year t , as derived in accordance with CRC 2J (Low Carbon Networks Fund).
AUM_t	means the total amount of any sums remaining unpaid pursuant to the requirements of a Clawback Direction given in accordance with the provisions of Part B of CRC 2K (Margins on licensee's Connection Activities) one year after the licensee has received that direction.
$CGSRA_t$	means the adjustment for payments made by the licensee in respect of its failure to achieve connections performance standards, as derived in accordance with CRC 2L (Revenue adjustments in respect of performance failures).
$DLGT_t$	means the DPCR4 residual distribution losses incentive value and Growth Term revenue adjustment made in Regulatory Year t , as derived in accordance with CRC 2M (Adjustment of licensee's revenues for the residual distribution losses incentive).

K_t means the correction factor revenue adjustment made in Regulatory Year t , as derived in accordance with the formula set out in Part E of this condition.

Part C: Calculation of Base Demand Revenue (BR_t)

2A.5 For the purposes of the Principal Formula, the amount of BR_t is derived in accordance with the following formula:

$$BR_t = (PU_t + MOD_t + TRU_t) \times RPIF_t$$

2A.6 In the formula for the BR_t term above:

PU_t means the amount set against the licensee's name in Appendix 1 of this condition and represents the Opening Base Revenue Allowance for Regulatory Year t , as determined by the Authority in relation to the distribution of electricity to and from premises.

MOD_t is zero in Regulatory Year 2015/16 and in each subsequent Regulatory Year is the value of the incremental change for Regulatory Year t to the licensee's Opening Base Revenue Allowance, as derived in accordance with the Annual Iteration Process set out in Parts A and B of CRC 4B (Annual Iteration Process for the ED1 Price Control Financial Model).

TRU_t is zero in Regulatory Years 2015/16 and 2016/17 and in each subsequent Regulatory Year is the revenue adjustment made in Regulatory Year t in respect of the actual value of the Retail Prices Index in Regulatory Year $t-2$ minus the assumed value of the Retail Prices Index in Regulatory Year $t-2$, as derived in accordance with paragraph 2A.9.

$RPIF_t$ means the price index adjustment factor in Regulatory Year t , as derived in accordance with paragraph 2A.7.

2A.7 For the purposes of paragraph 2A.6, $RPIF_t$ is derived in accordance with the following formula:

$$RPIF_t = RPIA_{t-2} \times (1 + GRPIF_{t-1}) \times (1 + GRPIF_t)$$

2A.8 In the above formula for $RPIF_t$:

$RPIA_t$ means the arithmetic average of the Retail Prices Index published or determined with respect to each of the twelve months in Regulatory Year t divided by the arithmetic average of the Retail Prices Index published or determined with respect to each of the twelve months 1 April 2012 to 31 March 2013 as derived in accordance with the following formula:

$$RPIA_t = \frac{RPI_t}{RPI_{2012/13}}$$

where:

RPI_t means the arithmetic average of the Retail Prices Index published or determined with respect to each of the twelve months from 1 April to 31 March in Regulatory Year t .

$RPI_{2012/13}$ means the arithmetic average of the Retail Prices Index published or determined with respect to each of the twelve months from 1 April 2012 to 31 March 2013.

and:

$$GRPIF_t = (0.75 \times GRPIF_c) + (0.25 \times GRPIF_{c+1})$$

$$GRPIF_{t-1} = (0.75 \times GRPIF_{c-1}) + (0.25 \times GRPIF_c)$$

where:

GRPIF_c means the Retail Prices Index Forecast Growth Rate for calendar year c, where c denotes the calendar year in which Regulatory Year t begins and the expressions c-1 and c+1 are interpreted accordingly; and in each such case the Retail Prices Index Forecast Growth Rates for calendar years c-1, c and c+1 are taken from the November edition of the HM Treasury publication "Forecasts for the UK Economy", in Regulatory Year t-1.

2A.9 For the purposes of paragraph 2A.6, TRU_t is derived in accordance with the following formula:

$$TRU_t = \left(\frac{RPIA_{t-2} - RPIF_{t-2}}{RPIA_{t-2}} \right) \times REV_{t-2} \times PVF_{t-2} \times PVF_{t-1}$$

2A.10 In the above formula for TRU_t:

REV_{t-2} means the amount (in 2012/13 prices) in Regulatory Year t-2 of the combined value of all revenue adjustments for the licensee provided for in the provisions referred to in relevant Charge Restriction Conditions indexed by the Retail Prices Index as derived in accordance with the formula in paragraph 2A.11.

PVF_t means the present value adjustment term for Regulatory Year t and is calculated as one plus the Vanilla Weighted Average Cost of Capital for the licensee as derived by the Authority in accordance with the Annual Iteration Process, and the expressions PVF_{t-1} and PVF_{t-2} are to be interpreted accordingly.

2A.11 For the purposes of paragraph 2A.10, REV_{t-2} is derived in accordance with the following formula:

$$REV_{t-2} = \frac{BR_{t-2} + \cancel{LF_{t-2}} + \cancel{RB_{t-2}} + \cancel{TB_{t-2}} + \cancel{SMC_{t-2}} + \cancel{SMIT_{t-2}} + \cancel{RF_{t-2}} PT_{t-2} + GTA_{t-2} + IQ_{t-2} + LDR_{t-2}}{RPIF_{t-2}}$$

2A.12 In the above formula for REV_{t-2}:

BR_{t-2} means the amount of Base Demand Revenue in Regulatory Year t-2, as derived in accordance with the formula set out in paragraph 2A.5.

~~LF_{t-2} means the amount of the licence fee adjustment in Regulatory Year t-2 as derived in accordance with Part B of CRC 2B.~~

~~RB_{t-2} means the amount of the Business Rates adjustment in Regulatory Year t-2 as derived in accordance with Part C of CRC 2B.~~

~~TB_{t-2} means the amount of the Transmission Connection Point Charges adjustment in Regulatory Year t-2 as derived in accordance with Part D of CRC 2B.~~

~~SMC_{t-2} means the amount of the Smart Meter Communication Licensee Costs adjustment in Regulatory Year t-2 as derived in accordance with Part E of CRC 2B.~~

~~SMIT_{t-2} means the amount of the Smart Meter Information Technology Costs adjustment in Regulatory Year t-2 as derived in accordance with Part F of CRC 2B.~~

RF_{t-2}	means the amount of the Ring Fence Costs adjustment in Regulatory Year t-2 as derived in accordance with Part G of CRC 2B.
<u>PT_{t-2}</u>	<u>means the Pass Through Costs in Regulatory Year t-2, as derived in accordance with Part A of CRC 2B.</u>
IQ _{t-2}	means the interruptions-related quality of service incentive revenue adjustment made in Regulatory Year t-2, as derived in accordance with CRC 2D (Adjustment of licensee's revenues to reflect interruptions related quality of service performance), except in Regulatory Years t-2 beginning on 1 April 2015 and 1 April 2016 when IQ _{t-2} will be zero for the purposes of this calculation.
LDR _{t-2}	means the amount of the Losses Discretionary Reward scheme revenue adjustment made in Regulatory Year t-2, as derived in accordance with CRC 2G (The Losses Discretionary Reward).
GTA _{t-2}	means the amount of the Growth Term adjustment in Regulatory Year t-2, as derived in accordance with CRC 2M.

Part D: Calculation of the incentive revenue adjustment (IP_t)

- 2A.13 For the purposes of the Principal Formula, the amount of IP_t is derived in accordance with the following formula:

$$IP_t = BM_t + IQ_t + ICE_t + TTC_t + LDR_t$$

- 2A.14 In the above formula for IP_t:

BM _t	means the broad measure of customer service revenue adjustment made in Regulatory Year t, as derived in accordance with CRC 2C (Broad Measure of Customer Service Adjustment).
IQ _t	means the interruptions-related quality of service incentive revenue adjustment made in Regulatory Year t, as derived in accordance with CRC 2D.
ICE _t	means the incentive on connections engagement revenue adjustment made in Regulatory Year t, as derived in accordance with CRC 2E (Incentive on Connections Engagement).
TTC _t	means the Time to Connect Incentive revenue adjustment made in Regulatory Year t, as derived in accordance with CRC 2F (Time to Connect Incentive).
LDR _t	means the Losses Discretionary Reward scheme revenue adjustment made in Regulatory Year t, as derived in accordance with CRC 2G.

Part E: Calculation of the correction factor (K_t)

2A.15 For the purposes of the Principal Formula for the licensee, subject to paragraph 2A.16, K_t is derived in accordance with the following formula:

$$K_t = (RD_{t-2} - AR_{t-2}) \times \left(1 + \left(\frac{I_{t-2} + PR_{t-2}}{100}\right)\right) \times \left(1 + \left(\frac{I_{t-1} + 1.5}{100}\right)\right)$$

2A.16 For Regulatory Years 2015/16 and 2016/17 K_t is derived, respectively, in the following ways:

(a) For Regulatory Year 2015/16, K_t is derived in accordance with the following formula:

$$K_t = -ESTR \times \left(1 + \left(\frac{I_{t-2} + 1.5}{100}\right)\right) \times \left(1 + \left(\frac{I_{t-1} + 1.5}{100}\right)\right)$$

(b) For Regulatory Year 2016/17, K_t is derived in accordance with the following formula:

$$K_t = \left(RD_{t-2} - AR_{t-2} + \left(ESTR \times \left(1 + \frac{0.5}{100}\right)\right)\right) \times \left(1 + \left(\frac{I_{t-2} + PR_{t-2}}{100}\right)\right) \times \left(1 + \left(\frac{I_{t-1} + 1.5}{100}\right)\right)$$

2A.17 In the above formulae for K_t :

RD_{t-2}	means the Regulated Distribution Network Revenue in Regulatory Year t-2, except in the Regulatory Year beginning 1 April 2016 where RD_{t-2} is the Regulated Combined Distribution Network Revenue, as defined in CRC 2 (Definitions for the Charge Restriction Conditions) of this licence in the form in which it was in force at 31 March 2015.
AR_{t-2}	means the amount of the Allowed Distribution Network Revenue in Regulatory Year t-2, except in the Regulatory Year beginning 1 April 2016 where AR_{t-2} is the Combined Allowed Distribution Network Revenue, as derived in accordance with Part B of CRC 3 (Restriction of Distribution Charges: Use of System Charges) of this licence in the form in which it was in force at 31 March 2015.
ESTR	means the total value of the energy supplier temporary rebate undertaken in 2013/14, and takes the value £15.49m for NPgN and £13.06m for NPgY.
I_t	means the Average Specified Rate in Regulatory Year t.
PR_{t-2}	means the interest rate adjustment as derived in accordance with Part F of this condition.

Part F: Interest adjustment for over-recoveries and under-recoveries of revenue

2A.18 For the purposes of Part E of this condition, the value of the interest rate adjustment PR_{t-2} is derived as follows:

- (a) if, in respect of Regulatory Year $t-2$, RD_{t-2} exceeds 106 per cent of AR_{t-2} , PR_{t-2} will have the value of 3;
 - (b) if, in respect of Regulatory Year $t-2$, RD_{t-2} is less than 94 per cent of AR_{t-2} , PR_{t-2} will have the value of zero; and
 - (c) in all other cases PR_{t-2} will have the value of 1.5.
- 2A.19 This paragraph applies where the Authority, having due regard to the purpose of this condition and after consulting with the licensee, is satisfied that RD_{t-2} in respect of Regulatory Year $t-2$ has, for reasons outside the reasonable control of the licensee, either:
- (a) exceeded 106 per cent of AR_{t-2} ; or
 - (b) been less than 94 per cent of AR_{t-2} .
- 2A.20 Where paragraph 2A.19 applies, the Authority may direct the licensee to change the value of PR_{t-2} to a value which is not less than zero and not more than 3.

Part G: Treatment of charges in the event of over-recovery

- 2A.21 Paragraph 2A.22 applies from 1 April 2018.
- 2A.22 If, in respect of two successive Regulatory Years $t-2$ and $t-3$, the licensee's Regulated Distribution Network Revenue in each of those Regulatory Years exceeds 110 per cent of Allowed Distribution Network Revenue for those Regulatory Years, the licensee:
- (a) must provide an explanation for that event in writing to the Authority by 31 July in the associated Regulatory Year $t-1$; and
 - (b) must not increase its Use of System Charges for the Regulatory Year t except and to the extent that the Authority has consented to such an increase.

Part H: Treatment of charges in the event of under-recovery

- 2A.23 Paragraph 2A.24 applies from 1 April 2018.
- 2A.24 If, in respect of two successive Regulatory Years $t-2$ and $t-3$, the licensee's Regulated Distribution Network Revenue in each of those Regulatory Years is less than 90 per cent of the Allowed Distribution Network Revenue for those Regulatory Years, the licensee:
- (a) must provide an explanation for that event in writing to the Authority by 31 July in the associated Regulatory Year $t-1$; and
 - (b) must use its reasonable endeavours in setting Use of System Charges to recover the Allowed Distribution Network Revenue in Regulatory Year t .

Part I: Interpretation

- 2A.25 For the purposes of this condition:

**Regulated
Distribution
Network Revenue
Retail Prices Index**

means the revenue derived by the licensee from Use of System Charges made for the provision of Distribution Services to Customers in respect of a Regulatory Year.

means:

(a) the general index of retail prices published by the Office for National Statistics each month in respect of all items; or

(b) if that index in respect of any month relevant for the purposes of the Charge Restriction Conditions has not been published, such price index as the Authority may, after consultation with the licensee, determine to be appropriate in the circumstances; or

(c) if there is a material change in the basis of that index, such other index as the Authority may, after consultation with the licensee, determine to be appropriate in the circumstances (provided that any index so determined may not have a retroactive effect on any formula or other provision of the Charge Restriction Conditions).

**Retail Prices Index
Forecast Growth
Rate**

means:

(a) the growth rate (which is presented as a percentage) as defined as the "New forecasts (marked *)" in the HM Treasury document, "Forecasts for the UK Economy", published in November each year; or

(b) if that growth rate in respect of any year has not been published, such growth rate as the Authority may, after consultation with the licensee, determine to be appropriate in the circumstances; or

(c) if there is a material change in the basis of that growth rate, such other growth rate as the Authority may, after consultation with the licensee, determine to be appropriate in the circumstances (provided that any index so determined may not have a retroactive effect on any formula or other provision of the Charge Restriction Conditions).

**Vanilla Weighted
Average Cost of
Capital**

has the meaning given to that term in the glossary of the ED1 Price Control Financial Handbook.

CRC 2A. Restriction of Allowed Distribution Network Revenue

(SSEH only)

Introduction

2A.1 This condition:

- (a) establishes the charging restrictions that determine the level of Allowed Distribution Network Revenue that may be recovered by the licensee from Use of System Charges; and
- (b) sets out the obligation of the licensee in respect of those restrictions.

Part A: Licensee's obligation

2A.2 The licensee, in setting Use of System Charges, must use its reasonable endeavours to ensure that, in Regulatory Year t , Regulated Distribution Network Revenue does not exceed its Allowed Distribution Network Revenue.

Part B: Calculation of Allowed Distribution Network Revenue (AR_t)

2A.3 Allowed Distribution Network Revenue, in Regulatory Year t , is derived in accordance with the following formula (in this condition, the Principal Formula):

$$AR_t = BR_t + IP_t + PT_t + NIA_t + LCN_t - AUM_t + CGSRA_t + PPL_t - K_t$$

2A.4 In the Principal Formula:

AR_t	means the amount of Allowed Distribution Network Revenue in Regulatory Year t .
BR_t	means the amount of Base Demand Revenue in Regulatory Year t , as derived in accordance with the formula set out in Part C of this condition.
IP_t	means the incentive revenue adjustment made in Regulatory Year t , as derived in accordance with the formula set out in Part D of this condition.
PT_t	means the Allowed Pass-Through Items revenue adjustment made in Regulatory Year t , as derived in accordance with CRC 2B (Calculation of Allowed Pass-Through Items).
NIA_t	means the Network Innovation Allowance revenue adjustment made in Regulatory Year t , as derived in accordance with CRC 2H (The Network Innovation Allowance).
LCN_t	means the low carbon networks fund revenue adjustment made in Regulatory Year t , as derived in accordance with CRC 2J (Low Carbon Networks Fund).
AUM_t	means the total amount of any sums remaining unpaid pursuant to the requirements of a Clawback Direction given in accordance with the provisions of Part B of CRC 2K (Margins on licensee's Connection Activities) one year after the licensee has received that direction.
$CGSRA_t$	means the adjustment for payments made by the licensee in respect of its failure to achieve connections performance standards, as derived in accordance with CRC 2L (Revenue adjustments in respect of performance failures).
PPL_t	means the DPCR4 residual distribution losses incentive value revenue adjustment made in Regulatory Year t , as derived in accordance with

CRC 2M (Adjustment of licensee's revenues for the residual distribution losses incentive).

K_t means the correction factor revenue adjustment made in Regulatory Year t , as derived in accordance with the formula set out in Part E of this condition.

Part C: Calculation of Base Demand Revenue (BR_t)

2A.5 For the purposes of the Principal Formula, the amount of BR_t is derived in accordance with the following formula:

$$BR_t = (PU_t + MOD_t + TRU_t) \times RPIF_t$$

2A.6 In the formula for the BR_t term above:

PU_t means the amount set against the licensee's name in Appendix 1 of this condition and represents the Opening Base Revenue Allowance for Regulatory Year t , as determined by the Authority in relation to the distribution of electricity to and from premises.

MOD_t is zero in Regulatory Year 2015/16 and in each subsequent Regulatory Year is the value of the incremental change for Regulatory Year t to the licensee's Opening Base Revenue Allowance, as derived in accordance with the Annual Iteration Process set out in Parts A and B of CRC 4B (Annual Iteration Process for the ED1 Price Control Financial Model).

TRU_t is zero in Regulatory Years 2015/16 and 2016/17 and in each subsequent Regulatory Year is the revenue adjustment made in Regulatory Year t in respect of the actual value of the Retail Prices Index in Regulatory Year $t-2$ minus the assumed value of the Retail Prices Index in Regulatory Year $t-2$, as derived in accordance with paragraph 2A.9.

$RPIF_t$ means the price index adjustment factor in Regulatory Year t , as derived in accordance with paragraph 2A.7.

2A.7 For the purposes of paragraph 2A.6, $RPIF_t$ is derived in accordance with the following formula:

$$RPIF_t = RPIA_{t-2} \times (1 + GRPIF_{t-1}) \times (1 + GRPIF_t)$$

2A.8 In the above formula for $RPIF_t$:

$RPIA_t$ means the arithmetic average of the Retail Prices Index published or determined with respect to each of the twelve months in Regulatory Year t divided by the arithmetic average of the Retail Prices Index published or determined with respect to each of the twelve months 1 April 2012 to 31 March 2013 as derived in accordance with the following formula:

$$RPIA_t = \frac{RPI_t}{RPI_{2012/13}}$$

where:

RPI_t means the arithmetic average of the Retail Prices Index published or determined with respect to each of the twelve months from 1 April to 31 March in Regulatory Year t .

$RPI_{2012/13}$ means the arithmetic average of the Retail Prices Index published or determined with respect to each of the twelve months from 1 April 2012 to 31 March 2013.

and:

$$GRPIF_t = (0.75 \times GRPIF_c) + (0.25 \times GRPIF_{c+1})$$

$$GRPIF_{t-1} = (0.75 \times GRPIF_{c-1}) + (0.25 \times GRPIF_c)$$

where:

GRPIF_c means the Retail Prices Index Forecast Growth Rate for calendar year c, where c denotes the calendar year in which Regulatory Year t begins and the expressions c-1 and c+1 are interpreted accordingly; and in each such case the Retail Prices Index Forecast Growth Rates for calendar years c-1, c and c+1 are taken from the November edition of the HM Treasury publication "Forecasts for the UK Economy", in Regulatory Year t-1.

2A.9 For the purposes of paragraph 2A.6, TRU_t is derived in accordance with the following formula:

$$TRU_t = \left(\frac{RPIA_{t-2} - RPIF_{t-2}}{RPIA_{t-2}} \right) \times REV_{t-2} \times PVF_{t-2} \times PVF_{t-1}$$

2A.10 In the above formula for TRU_t:

REV_{t-2} means the amount (in 2012/13 prices) in Regulatory Year t-2 of the combined value of all revenue adjustments for the licensee provided for in the provisions referred to in relevant Charge Restriction Conditions indexed by the Retail Prices Index as derived in accordance with the formula in paragraph 2A.11.

2A.11 For the purposes of paragraph 2A.10, REV_{t-2} is derived in accordance with the following formula:

$$REV_{t-2} = \frac{BR_{t-2} + LF_{t-2} + RB_{t-2} + TB_{t-2} + SMC_{t-2} + SMIT_{t-2} + RF_{t-2} + SEC_{t-2} - HB_{t-2} - UNC_{t-2} + IQ_{t-2}}{RPIF_{t-2}}$$

2A.12 In the above formula for REV_{t-2}:

BR_{t-2} means the amount of Base Demand Revenue in Regulatory Year t-2, as derived in accordance with the formula set out in paragraph 2A.5.

~~LF_{t-2} means the amount of the licence fee adjustment in Regulatory Year t-2 as derived in accordance with Part B of CRC 2B.~~

~~RB_{t-2} means the amount of the Business Rates adjustment in Regulatory Year t-2 as derived in accordance with Part C of CRC 2B.~~

~~TB_{t-2} means the amount of the Transmission Connection Point Charges adjustment in Regulatory Year t-2 as derived in accordance with Part D of CRC 2B.~~

SMC_{t-2}	means the amount of the Smart Meter Communication Licensee Costs adjustment in Regulatory Year t-2 as derived in accordance with Part E of CRC 2B.
SMIT_{t-2}	means the amount of the Smart Meter Information Technology Costs adjustment in Regulatory Year t-2 as derived in accordance with Part F of CRC 2B.
RF_{t-2}	means the amount of the Ring Fence Costs adjustment in Regulatory Year t-2 as derived in accordance with Part G of CRC 2B.
SEC_{t-2}	means the Shetland Variable Energy Costs, in Regulatory Year t-2, as derived in accordance with Part H of CRC 2B.

<u>PT_{t-2}</u>	<u>means the amount of the Pass Through Costs in Regulatory Year t-2 as derived in accordance with Part A of CRC 2B.</u>
<u>HB_{t-2}</u>	<u>means the amount received by the licensee in Regulatory Year t-2 as the result of any direction given by the Secretary of State in accordance with section 184 of the Energy Act 2004 in relation to assistance for high-cost distributors (see also CRC 2N in connection with this).</u>
<u>UNC_{t-2}</u>	<u>means an amount in Regulatory Year t-2 representing a relevant adjustment to the calculation of Allowed Demand Revenue arising from the application of CRC 2Q (Arrangements for the recovery of costs for an integrated plan to manage supply and demand on Shetland). Uncertain costs may also be recovered under CRC 3F (Arrangements for the recovery of uncertain costs).</u>
<u>IQ_{t-2}</u>	<u>means the interruptions-related quality of service incentive revenue adjustment made in Regulatory Year t-2, as derived in accordance with CRC 2D (Adjustment of licensee's revenues to reflect interruptions related quality of service performance), except in Regulatory Years t-2 beginning on 1 April 2015 and 1 April 2016 when IQ_{t-2} will be zero for the purposes of this calculation.</u>
<u>LDR_{t-2}</u>	<u>means the amount of the Losses Discretionary Reward scheme revenue adjustment made in Regulatory Year t-2, as derived in accordance with CRC 2G (The Losses Discretionary Reward).</u>

Part D: Calculation of the incentive revenue adjustment (IP_t)

2A.15 For the purposes of the Principal Formula, the amount of IP_t is derived in accordance with the following formula:

$$IP_t = BM_t + IQ_t + ICE_t + TTC_t + LDR_t$$

2A.16 In the above formula for IP_t:

BM _t	means the broad measure of customer service revenue adjustment made in Regulatory Year t, as derived in accordance with CRC 2C (Broad Measure of Customer Service Adjustment).
IQ _t	means the interruptions-related quality of service incentive revenue adjustment made in Regulatory Year t, as derived in accordance with CRC 2D.
ICE _t	means the incentive on connections engagement revenue adjustment made in Regulatory Year t, as derived in accordance with CRC 2E (Incentive on Connections Engagement).
TTC _t	means the Time to Connect Incentive revenue adjustment made in Regulatory Year t, as derived in accordance with CRC 2F (Time to Connect Incentive).
LDR _t	means the Losses Discretionary Reward scheme revenue adjustment made in Regulatory Year t, as derived in accordance with CRC 2G.

Part E: Calculation of the correction factor (K_t)

2A.17 For the purposes of the Principal Formula for the licensee, subject to paragraph 2A.17, K_t is derived in accordance with the following formula:

$$K_t = (RD_{t-2} - AR_{t-2}) \times \left(1 + \left(\frac{I_{t-2} + PR_{t-2}}{100}\right)\right) \times \left(1 + \left(\frac{I_{t-1} + 1.5}{100}\right)\right)$$

2A.18 In the above formula for K_t :

- RD_{t-2} means the Regulated Distribution Network Revenue in Regulatory Year $t-2$, except in the Regulatory Year beginning 1 April 2016 where RD_{t-2} is the Regulated Combined Distribution Network Revenue, as defined in CRC 2 (Definitions for the Charge Restriction Conditions) of this licence in the form in which it was in force at 31 March 2015.
- AR_{t-2} means the amount of the Allowed Distribution Network Revenue in Regulatory Year $t-2$, except in the Regulatory Year beginning 1 April 2016 where AR_{t-2} is the Combined Allowed Distribution Network Revenue, as derived in accordance with Part B of CRC 3 (Restriction of Distribution Charges: Use of System Charges) of this licence in the form in which it was in force at 31 March 2015.
- I_t means the Average Specified Rate in Regulatory Year t .
- PR_{t-2} means the interest rate adjustment as derived in accordance with Part F of this condition.

2A.19 In Regulatory Year 2015/16, K_t will have the value of zero.

Part F: Interest adjustment for over-recoveries and under-recoveries of revenue

- 2A.20 For the purposes of Part E of this condition, the value of the interest rate adjustment PR_{t-2} is derived as follows:
- (a) if, in respect of Regulatory Year $t-2$, RD_{t-2} exceeds 106 per cent of AR_{t-2} , PR_{t-2} will have the value of 3;
 - (b) if, in respect of Regulatory Year $t-2$, RD_{t-2} is less than 94 per cent of AR_{t-2} , PR_{t-2} will have the value of zero; and
 - (c) in all other cases PR_{t-2} will have the value of 1.5.
- 2A.21 This paragraph applies where the Authority, having due regard to the purpose of this condition and after consulting with the licensee, is satisfied that RD_{t-2} in respect of Regulatory Year $t-2$ has, for reasons outside the reasonable control of the licensee, either:
- (a) exceeded 106 per cent of AR_{t-2} ; or
 - (b) been less than 94 per cent of AR_{t-2} .
- 2A.22 Where paragraph 2A.19 applies, the Authority may direct the licensee to change the value of PR_{t-2} to a value which is not less than zero and not more than 3.

Part G: Treatment of charges in the event of over-recovery

- 2A.23 Paragraph 2A.22 applies from 1 April 2018.
- 2A.24 If, in respect of two successive Regulatory Years $t-2$ and $t-3$, the licensee's Regulated Distribution Network Revenue in each of those Regulatory Years exceeds 110 per cent of Allowed Distribution Network Revenue for those Regulatory Years, the licensee:
- (a) must provide an explanation for that event in writing to the Authority by 31 July in the associated Regulatory Year $t-1$; and
 - (b) must not increase its Use of System Charges for the Regulatory Year t except and to the extent that the Authority has consented to such an increase.

Part H: Treatment of charges in the event of under-recovery

- 2A.25 Paragraph 2A.24 applies from 1 April 2018.
- 2A.26 If, in respect of two successive Regulatory Years $t-2$ and $t-3$, the licensee's Regulated Distribution Network Revenue in each of those Regulatory Years is less than 90 per cent of the Allowed Distribution Network Revenue for those Regulatory Years, the licensee:
- (a) must provide an explanation for that event in writing to the Authority by 31 July in the associated Regulatory Year $t-1$; and
 - (b) must use its reasonable endeavours in setting Use of System Charges to recover the Allowed Distribution Network Revenue in Regulatory Year t .

Part I: Interpretation

2A.27 For the purposes of this condition:

Regulated Distribution Network Revenue	means the revenue derived by the licensee from Use of System Charges made for the provision of Distribution Services to Customers in respect of a Regulatory Year.
Retail Prices Index	means: (a) the general index of retail prices published by the Office for National Statistics each month in respect of all items; or (b) if that index in respect of any month relevant for the purposes of the Charge Restriction Conditions has not been published, such price index as the Authority may, after consultation with the licensee, determine to be appropriate in the circumstances; or (c) if there is a material change in the basis of that index, such other index as the Authority may, after consultation with the licensee, determine to be appropriate in the circumstances (provided that any index so determined may not have a retroactive effect on any formula or other provision of the Charge Restriction Conditions).
Retail Prices Index Forecast Growth Rate	means: (a) the growth rate (which is presented as a percentage) as defined as the "New forecasts (marked *)" in the HM Treasury document, "Forecasts for the UK Economy", published in November each year; or (b) if that growth rate in respect of any year has not been published, such growth rate as the Authority may, after consultation with the licensee, determine to be appropriate in the circumstances; or (c) if there is a material change in the basis of that growth rate, such other growth rate as the Authority may, after consultation with the licensee, determine to be appropriate in the circumstances (provided that any index so determined may not have a retroactive effect on any formula or other provision of the Charge Restriction Conditions).
Vanilla Weighted Average Cost of Capital	has the meaning given to that term in the glossary of the ED1 Price Control Financial Handbook.

CRC 2A. Restriction of Allowed Distribution Network Revenue

(WPD licensees only)

Introduction

2A.1 This condition:

- (a) establishes the charging restrictions that determine the level of Allowed Distribution Network Revenue that may be recovered by the licensee from Use of System Charges; and
- (b) sets out the obligation of the licensee in respect of those restrictions.

Part A: Licensee's obligation

2A.2 The licensee, in setting Use of System Charges, must use its reasonable endeavours to ensure that, in Regulatory Year t , Regulated Distribution Network Revenue does not exceed its Allowed Distribution Network Revenue.

Part B: Calculation of Allowed Distribution Network Revenue (AR_t)

2A.3 Allowed Distribution Network Revenue, in Regulatory Year t , is derived in accordance with the following formula (in this condition, the Principal Formula):

$$AR_t = BR_t + IP_t + PT_t + NIA_t + LCN_t - AUM_t + CGSRA_t + PPL_t - K_t$$

2A.4 In the Principal Formula:

AR_t	means the amount of Allowed Distribution Network Revenue in Regulatory Year t .
BR_t	means the amount of Base Demand Revenue in Regulatory Year t , as derived in accordance with the formula set out in Part C of this condition.
IP_t	means the incentive revenue adjustment made in Regulatory Year t , as derived in accordance with the formula set out in Part D of this condition.
PT_t	means the Allowed Pass-Through Items revenue adjustment made in Regulatory Year t , as derived in accordance with CRC 2B (Calculation of Allowed Pass-Through Items).
NIA_t	means the Network Innovation Allowance revenue adjustment made in Regulatory Year t , as derived in accordance with CRC 2H (The Network Innovation Allowance).
LCN_t	means the low carbon networks fund revenue adjustment made in Regulatory Year t , as derived in accordance with CRC 2J (Low Carbon Networks Fund).
AUM_t	means the total amount of any sums remaining unpaid pursuant to the requirements of a Clawback Direction given in accordance with the provisions of Part B of CRC 2K (Margins on licensee's Connection Activities) one year after the licensee has received that direction.
$CGSRA_t$	means the adjustment for payments made by the licensee in respect of its failure to achieve connections performance standards, as derived in accordance with CRC 2L (Revenue adjustments in respect of performance failures).
PPL_t	means the DPCR4 residual distribution losses incentive value revenue adjustment made in Regulatory Year t , as derived in accordance with

CRC 2M (Adjustment of licensee's revenues for the residual distribution losses incentive).

K_t means the correction factor revenue adjustment made in Regulatory Year t , as derived in accordance with the formula set out in Part E of this condition.

Part C: Calculation of Base Demand Revenue (BR_t)

2A.5 For the purposes of the Principal Formula, the amount of BR_t is derived in accordance with the following formula:

$$BR_t = (PU_t + MOD_t + TRU_t) \times RPIF_t$$

2A.6 In the formula for the BR_t term above:

PU_t means the amount set against the licensee's name in Appendix 1 of this condition and represents the Opening Base Revenue Allowance for Regulatory Year t , as determined by the Authority in relation to the distribution of electricity to and from premises.

MOD_t is zero in Regulatory Year 2015/16 and in each subsequent Regulatory Year is the value of the incremental change for Regulatory Year t to the licensee's Opening Base Revenue Allowance, as derived in accordance with the Annual Iteration Process set out in Parts A and B of CRC 4B (Annual Iteration Process for the ED1 Price Control Financial Model).

TRU_t is zero in Regulatory Years 2015/16 and 2016/17 and in each subsequent Regulatory Year is the revenue adjustment made in Regulatory Year t in respect of the actual value of the Retail Prices Index in Regulatory Year $t-2$ minus the assumed value of the Retail Prices Index in Regulatory Year $t-2$, as derived in accordance with paragraph 2A.9.

$RPIF_t$ means the price index adjustment factor in Regulatory Year t , as derived in accordance with paragraph 2A.7.

2A.7 For the purposes of paragraph 2A.6, $RPIF_t$ is derived in accordance with the following formula:

$$RPIF_t = RPIA_{t-2} \times (1 + GRPIF_{t-1}) \times (1 + GRPIF_t)$$

2A.8 In the above formula for $RPIF_t$:

$RPIA_t$ means the arithmetic average of the Retail Prices Index published or determined with respect to each of the twelve months in Regulatory Year t divided by the arithmetic average of the Retail Prices Index published or determined with respect to each of the twelve months 1 April 2012 to 31 March 2013 as derived in accordance with the following formula:

$$RPIA_t = \frac{RPI_t}{RPI_{2012/13}}$$

where:

RPI_t means the arithmetic average of the Retail Prices Index published or determined with respect to each of the twelve months from 1 April to 31 March in Regulatory Year t .

$RPI_{2012/13}$ means the arithmetic average of the Retail Prices Index published or determined with respect to each of the twelve months from 1 April 2012 to 31 March 2013.

and:

$$GRPIF_t = (0.75 \times GRPIF_c) + (0.25 \times GRPIF_{c+1})$$

$$\text{GRPIF}_{t-1} = (0.75 \times \text{GRPIF}_{c-1}) + (0.25 \times \text{GRPIF}_c)$$

where:

GRPIF_c means the Retail Prices Index Forecast Growth Rate for calendar year c, where c denotes the calendar year in which Regulatory Year t begins and the expressions c-1 and c+1 are interpreted accordingly; and in each such case the Retail Prices Index Forecast Growth Rates for calendar years c-1, c and c+1 are taken from the November edition of the HM Treasury publication "Forecasts for the UK Economy", in Regulatory Year t-1.

2A.9 For the purposes of paragraph 2A.6, TRU_t is derived in accordance with the following formula:

$$\text{TRU}_t = \left(\frac{\text{RPIA}_{t-2} - \text{RPIF}_{t-2}}{\text{RPIA}_{t-2}} \right) \times \text{REV}_{t-2} \times \text{PVF}_{t-2} \times \text{PVF}_{t-1}$$

2A.10 In the above formula for TRU_t:

REV_{t-2} means the amount (in 2012/13 prices) in Regulatory Year t-2 of the combined value of all revenue adjustments for the licensee provided for in the provisions referred to in relevant Charge Restriction Conditions indexed by the Retail Prices Index as derived in accordance with the formula in paragraph 2A.11.

PVF_t means the present value adjustment term for Regulatory Year t and is calculated as one plus the Vanilla Weighted Average Cost of Capital for the licensee as derived by the Authority in accordance with the Annual Iteration Process, and the expressions PVF_{t-1} and PVF_{t-2} are to be interpreted accordingly.

2A.11 For the purposes of paragraph 2A.10, REV_{t-2} is derived in accordance with the following formula:

$$\text{REV}_{t-2} = \frac{\text{BR}_{t-2} + \text{LF}_{t-2} + \text{RB}_{t-2} + \text{TB}_{t-2} + \text{SMC}_{t-2} + \text{SMIT}_{t-2} + \text{RF}_{t-2} + \text{PT}_{t-2} + \text{IQ}_{t-2} + \text{LDR}_{t-2}}{\text{RPIF}_{t-2}}$$

2A.12 In the above formula for REV_{t-2}:

BR_{t-2} means the amount of Base Demand Revenue in Regulatory Year t-2, as derived in accordance with the formula set out in paragraph 2A.5.

~~LF_{t-2} means the amount of the licence fee adjustment in Regulatory Year t-2 as derived in accordance with Part B of CRC 2B.~~

~~RB_{t-2} means the amount of the Business Rates adjustment in Regulatory Year t-2 as derived in accordance with Part C of CRC 2B.~~

~~TB_{t-2} means the amount of the Transmission Connection Point Charges adjustment in Regulatory Year t-2 as derived in accordance with Part D of CRC 2B.~~

~~SMC_{t-2} means the amount of the Smart Meter Communication Licensee Costs adjustment in Regulatory Year t-2 as derived in accordance with Part E of CRC 2B.~~

SMIT_{t-2}	means the amount of the Smart Meter Information Technology Costs adjustment in Regulatory Year t-2 as derived in accordance with Part F of CRC 2B.
RF_{t-2}	means the amount of the Ring Fence Costs adjustment in Regulatory Year t-2 as derived in accordance with Part G of CRC 2B.
<u>PT_{t-2}</u>	<u>means the amount of the Pass Through Costs in Regulatory Year t-2 as derived in accordance with Part A of CRC 2B.</u>
IQ _{t-2}	means the interruptions-related quality of service incentive revenue adjustment made in Regulatory Year t-2, as derived in accordance with CRC 2D (Adjustment of licensee's revenues to reflect interruptions related quality of service performance), except in Regulatory Years t-2 beginning on 1 April 2015 and 1 April 2016 when IQ _{t-2} will be zero for the purposes of this calculation.
LDR _{t-2}	means the amount of the Losses Discretionary Reward scheme revenue adjustment made in Regulatory Year t-2, as derived in accordance with CRC 2G (The Losses Discretionary Reward).

Part D: Calculation of the incentive revenue adjustment (IP_t)

- 2A.13 For the purposes of the Principal Formula, the amount of IP_t is derived in accordance with the following formula:

$$IP_t = BM_t + IQ_t + ICE_t + TTC_t + LDR_t$$

- 2A.14 In the above formula for IP_t:

BM _t	means the broad measure of customer service revenue adjustment made in Regulatory Year t, as derived in accordance with CRC 2C (Broad Measure of Customer Service Adjustment).
IQ _t	means the interruptions-related quality of service incentive revenue adjustment made in Regulatory Year t, as derived in accordance with CRC 2D.
ICE _t	means the incentive on connections engagement revenue adjustment made in Regulatory Year t, as derived in accordance with CRC 2E (Incentive on Connections Engagement).
TTC _t	means the Time to Connect Incentive revenue adjustment made in Regulatory Year t, as derived in accordance with CRC 2F (Time to Connect Incentive).
LDR _t	means the losses discretionary reward scheme revenue adjustment made in Regulatory Year t, as derived in accordance with CRC 2G.

Part E: Calculation of the correction factor (K_t)

- 2A.15 For the purposes of the Principal Formula, subject to paragraph 2A.17, K_t is derived in accordance with the following formula:

$$K_t = (RD_{t-2} - AR_{t-2}) \times \left(1 + \left(\frac{I_{t-2} + PR_{t-2}}{100}\right)\right) \times \left(1 + \left(\frac{I_{t-1} + 1.5}{100}\right)\right)$$

- 2A.16 In the above formula for K_t:

RD _{t-2}	means the Regulated Distribution Network Revenue in Regulatory Year t-2, except in the Regulatory Year beginning 1 April 2016 where RD _{t-2} is the Regulated Distribution Network Revenue, as defined in
-------------------	--

CRC 2 (Definitions for the Charge Restriction Conditions) of this licence in the form in which it was in force at 31 March 2015.

AR_{t-2} means the amount of the Allowed Distribution Network Revenue in Regulatory Year t-2, except in the Regulatory Year beginning 1 April 2016 where AR_{t-2} is the Allowed Distribution Network Revenue, as derived in accordance with Part B of CRC 3 (Restriction of Distribution Charges: Use of System Charges) of this licence in the form in which it was in force at 31 March 2015.

I_t means the Average Specified Rate in Regulatory Year t.

PR_{t-2} means the interest rate adjustment as derived in accordance with Part F of this condition.

2A.17 In Regulatory Year 2015/16, K_t will have the value of zero.

Part F: Interest adjustment for over-recoveries and under-recoveries of revenue

2A.18 For the purposes of Part E of this condition, the value of the interest rate adjustment PR_{t-2} is derived as follows:

- (a) if, in respect of Regulatory Year t-2, Regulated Distribution Network Revenue exceeds 106 per cent of Allowed Distribution Network Revenue, PR_{t-2} will have the value of 3;
- (b) if, in respect of Regulatory Year t-2, Regulated Distribution Network Revenue is less than 94 per cent of Allowed Distribution Network Revenue, PR_{t-2} will have the value of zero; and
- (c) in all other cases PR_{t-2} will have the value of 1.5.

2A.19 This paragraph applies where the Authority, having due regard to the purpose of this condition and after consulting with the licensee, is satisfied that Regulated Distribution Network Revenue in respect of Regulatory Year t-2 has, for reasons outside the reasonable control of the licensee, either:

- (a) exceeded 106 per cent of Allowed Distribution Network Revenue; or
- (b) been less than 94 per cent of Allowed Distribution Network Revenue.

2A.20 Where paragraph 2A.19 applies, the Authority may direct the licensee to change the value of PR_{t-2} to a value which is not less than zero and not more than 3.

Part G: Treatment of charges in the event of over-recovery

2A.21 Paragraph 2A.22 applies from 1 April 2018.

2A.22 If, in respect of two successive Regulatory Years t-2 and t-3, the licensee's Regulated Distribution Network Revenue in each of those Regulatory Years exceeds 110 per cent of Allowed Distribution Network Revenue for those Regulatory Years, the licensee:

- (a) must provide an explanation for that event in writing to the Authority by 31 July in the associated Regulatory Year t-1; and
- (b) must not increase its Use of System Charges for the Regulatory Year t except and to the extent that the Authority has consented to such an increase.

Part H: Treatment of charges in the event of under-recovery

2A.23 Paragraph 2A.24 applies from 1 April 2018.

2A.24 If, in respect of two successive Regulatory Years t-2 and t-3, the licensee's Regulated Distribution Network Revenue in each of those Regulatory Years is less than 90 per cent of the Allowed Distribution Network Revenue for those Regulatory Years, the licensee:

- (a) must provide an explanation for that event in writing to the Authority by 31 July in the associated Regulatory Year t-1; and
- (b) must use its best endeavours in setting Use of System Charges to recover the Allowed Distribution Network Revenue in Regulatory Year t.

Part I: Interpretation

2A.25 For the purposes of this condition:

**Regulated
Distribution
Network Revenue**
Retail Prices Index

means the revenue derived by the licensee from Use of System Charges made for the provision of Distribution Services to Customers in respect of a Regulatory Year.

means:

- (a) the general index of retail prices published by the Office for National Statistics each month in respect of all items; or
- (b) if that index in respect of any month relevant for the purposes of the Charge Restriction Conditions has not been published, such price index as the Authority may, after consultation with the licensee, determine to be appropriate in the circumstances; or
- (c) if there is a material change in the basis of that index, such other index as the Authority may, after consultation with the licensee, determine to be appropriate in the circumstances (provided that any index so determined may not have a retroactive effect on any formula or other provision of the Charge Restriction Conditions).

**Retail Prices Index
Forecast Growth
Rate**

means:

- (a) the growth rate (which is presented as a percentage) as defined as the "New forecasts (marked *)" in the HM Treasury document, "Forecasts for the UK Economy", published in November each year; or
- (b) if that growth rate in respect of any year has not been published, such growth rate as the Authority may, after consultation with the licensee, determine to be appropriate in the circumstances; or
- (c) if there is a material change in the basis of that growth rate, such other growth rate as the Authority may, after consultation with the licensee, determine to be appropriate in the circumstances (provided that any index so determined may not have a retroactive effect on any formula or other provision of the Charge Restriction Conditions).

**Vanilla Weighted
Average Cost of
Capital**

has the meaning given to that term in the glossary of the ED1 Price Control Financial Handbook.

APPENDIX 1

CRC 2B. Calculation of Allowed Pass-Through Items

Introduction

- 2B.1 This condition sets out the calculation of the amount of the term PT (the allowed pass-through term) that applies in CRC 2A (restriction of Allowed Distribution Network Revenue).
- 2B.2 The allowed pass-through term in CRC 2A amends the licensee's Allowed Distribution Network Revenue so as to allow certain costs as specified below to be passed through to users of the licensee's Distribution System through Use of System Charges.

Part A: Calculation of Allowed Pass-Through Items (PT)

- 2B.3 For the purposes of Part B of CRC 2A, which establishes the calculation of Allowed Distribution Network Revenue, the total amount of the PT term is calculated in accordance with the following formula (in this condition, the Principal Formula):

$$PT_t = LF_t + RB_t + TB_t + SMC_t + SMIT_t + RF_t + \underline{SLR_t + EBD_t}$$

- 2B.4 In the Principal Formula:

LF_t means the licence fee adjustment in Regulatory Year t, as derived in accordance with the formula set out in Part B of this condition.

RB_t means the Business Rates adjustment in Regulatory Year t, as derived in accordance with the formula set out in Part C of this condition.

TB_t means the Transmission Connection Point Charges adjustment in Regulatory Year t, as derived in accordance with the formula set out in Part D of this condition.

SMC_t	means the Smart Meter Communication Licensee Costs adjustment in Regulatory Year t, as derived in accordance with the formula set out in Part E of this condition.
$SMIT_t$	means the Smart Meter Information Technology Costs adjustment in Regulatory Year t, as derived in accordance with the formula set out in Part F of this condition.
RF_t	means the Ring Fence Costs adjustment in Regulatory Year t, as derived in accordance with Part G of this condition.
<u>SLR_t</u>	<u>means the Supplier of Last Resort Costs adjustment in Regulatory Year t in accordance with Part H of this condition.</u>
<u>EBD_t</u>	<u>means the Eligible Bad Debt Costs adjustment in Regulatory Year t in accordance with Part I of this condition.</u>

Part B: Calculation of the licence fee adjustment (LF)

2B.5 For the purposes of the Principal Formula, and subject to paragraph 2B.7, LF_t is derived in accordance with the following formula:

$$LF_t = \left(\frac{LFA_{t-2}}{RPIA_{t-2}} - LFE_{t-2} \right) \times PVF_{t-2} \times PVF_{t-1} \times RPIF_t$$

2B.6 In the above formula for LF_t :

LFA_{t-2}	means the amount of licence fee payments, in Regulatory Year t-2, made by the licensee in accordance with its obligations under standard condition 5 (Licensee's payments to the Authority).
LFE_{t-2}	means the amount of the licence fee allowance, in Regulatory Year t-2, and is represented by the amount set out in Appendix 1 of this condition that applies to the licensee.
$RPIA_{t-2}$	has the value given to it by Part C of CRC 2A.
PVF_t	has the value given to it by Part C of CRC 2A.
$RPIF_t$	has the value given to it by Part C of CRC 2A.

2B.7 In the Regulatory Years 2015/16 and 2016/17, LF_t will have the value of zero.

Part C: Calculation of the Business Rates adjustment (RB)

2B.8 For the purposes of the Principal Formula, and subject to paragraphs 2B.10 and 2B.11, RB_t is derived in accordance with the following formula:

$$RB_t = \left(\frac{RBA_{t-2}}{RPIA_{t-2}} - RBE_{t-2} \right) \times PVF_{t-2} \times PVF_{t-1} \times RPIF_t$$

2B.9 In the above formula for RB_t :

- RBA_{t-2} means the amount, in Regulatory Year t-2, paid by the licensee in respect of Business Rates.
- RBE_{t-2} means the amount of the allowance in respect of Business Rates, in Regulatory Year t-2, and is represented by the amount set out in Appendix 2 of this condition that applies to the licensee.
- $RPIA_{t-2}$ has the value given to it by Part C of CRC 2A.
- PVF_t has the value given to it by Part C of CRC 2A.
- $RPIF_t$ has the value given to it by Part C of CRC 2A.

2B.10 In Regulatory Years 2015/16 and 2016/17, RB_t will have the value of zero.

2B.11 In paragraphs 2B.12 and 2B.13, the relevant valuation agency in England and Wales is the Valuation Office Agency and in Scotland is the Scottish Assessors Association.

2B.12 Paragraphs 2B.13 to 2B.16 apply if the relevant valuation agency revalues any of the licensee's assets for the purposes of setting Business Rates.

2B.13 If, after reviewing the licensee's engagement with the relevant valuation agency with respect to a particular revaluation, the Authority considers that the licensee has not used its reasonable endeavours to minimise the amount of the Business Rates to which it is liable, the Authority may, subject to paragraphs 2B.14 and 2B.15, by Notice to the licensee specify that any positive value for RB_t for one or more Regulatory Years derived under the formula set out in paragraph 2B.8 is to be changed to a different value.

2B.14 A Notice under paragraph 2B.13 is of no effect unless the Authority has first consulted with the licensee.

2B.15 A Notice under paragraph 2B.13:

- (a) may not specify a different value for RB_t for the Regulatory Year following the Regulatory Year in which the revaluation took place or for any earlier Regulatory Year; and
- (b) may not specify a different value for RB_t that is less than zero.

- 2B.16 At any time after giving a Notice under paragraph 2B.13, the Authority may by a further Notice to the licensee nullify the original Notice and its effects.

Part D: Calculation of the Transmission Connection Point Charges adjustment (TB)

- 2B.17 For the purposes of the Principal Formula, and subject to paragraph 2B.19, TB_t is derived in accordance with the following formula:

$$TB_t = \left(\frac{PTPA_{t-2}}{RPIA_{t-2}} - PTPE_{t-2} \right) \times PVF_{t-2} \times PVF_{t-1} \times RPIF_t$$

- 2B.18 In the above formula for TB_t :

$PTPA_{t-2}$	means the amount of Pass-through Transmission Connection Point Charges incurred by the licensee in Regulatory Year t-2.
$PTPE_{t-2}$	means the amount of the Pass-through Transmission Connection Point Charges allowance in Regulatory Year t-2, and is represented by the amount set out in Appendix 3 of this condition that applies to the licensee.
$RPIA_{t-2}$	has the value given to it by Part C of CRC 2A.
PVF_t	has the value given to it by Part C of CRC 2A.
$RPIF_t$	has the value given to it by Part C of CRC 2A.

- 2B.19 In the Regulatory Years 2015/16 and 2016/17, TB_t will have the value of zero.

Part E: Calculation of the Smart Meter Communication Licensee Costs adjustment (SMC)

- 2B.20 For the purposes of the Principal Formula, and subject to paragraph 2B.22, SMC_t is derived in accordance with the following formula:

$$SMC_t = \left(\frac{SMCA_{t-2}}{RPIA_{t-2}} - SMCE_{t-2} \right) \times PVF_{t-2} \times PVF_{t-1} \times RPIF_t$$

- 2B.21 In the above formula for SMC_t :

$SMCA_{t-2}$	means the amount of Smart Meter Communication Licensee Costs incurred by the licensee in Regulatory Year t-2.
$SMCE_{t-2}$	means the amount of the Smart Meter Communication Licensee Costs allowance in Regulatory Year t-2, and is represented by the amount set out in Appendix 4 of this condition that applies to the licensee.
$RPIA_{t-2}$	has the value given to it by Part C of CRC 2A.
PVF_t	has the value given to it by Part C of CRC 2A.
$RPIF_t$	has the value given to it by Part C of CRC 2A.

2B.22 In the Regulatory Years 2015/16, 2016/17, 2023/24 and 2024/25, SMC_t will have the value of zero.

Part F: Calculation of the Smart Meter Information Technology Costs adjustment (SMIT)

2B.23 For the purposes of the Principal Formula, and subject to paragraph 2B.25, $SMIT_t$ is derived in accordance with the following formula:

$$SMIT_t = \left(\frac{SMIA_{t-2}}{RPIA_{t-2}} - SMIE_{t-2} \right) \times PVF_{t-2} \times PVF_{t-1} \times RPIF_t + SMITR_t$$

2B.24 In the above formula for $SMIT_t$:

$SMIA_{t-2}$	means the amount of Smart Meter Information Technology Costs incurred by the licensee in Regulatory Year t-2.
$SMIE_{t-2}$	means the amount of the Smart Meter Information Technology Costs allowance in Regulatory Year t-2, and is represented by the amount set out in Appendix 5 of this condition that applies to the licensee.
$RPIA_{t-2}$	has the value given to it by Part C of CRC 2A.
PVF_t	has the value given to it by Part C of CRC 2A.
$RPIF_t$	has the value given to it by Part C of CRC 2A.
$SMITR_t$	means the adjustment to Smart Meter Information Technology Costs for the licensee in Regulatory Year t as a result of the SMIT review.

2B.25 In the Regulatory Years 2015/16, 2016/17, 2023/24 and 2024/25, $SMIT_t$ will have the value of zero.

2B.26 In 2020/21, the Authority will commence a review (the “SMIT review”) of the information technology costs that the licensee has incurred or plans to incur, during the Price Control Period, to enable it to use smart metering data for the operation and maintenance of its Distribution System.

2B.27 The SMIT review will determine whether the costs incurred or planned are falling or capable of falling within the definition of Smart Meter Information Technology Costs.

2B.28 Before making the determination referred to in paragraph 2B.27, the Authority will consult with the licensee and any other party that the Authority considers appropriate.

2B.29 A determination under this Part may:

- (a) set the value of $SMITR_t$ for any Regulatory Year, subject to paragraph 2B.30; and

- (b) impose conditions with respect to the amounts and circumstances in which future costs may be passed through under the $SMIT_t$ term.

2B.30 In the Regulatory Years before 2021/22, $SMITR_t$ will have the value of zero.

Part G: Calculation of the Ring Fence Costs adjustment (RF)

2B.31 For the purposes of the Principal Formula, and subject to paragraph 2B.33, RF_t is derived in accordance with the following formula:

$$RF_t = \left(\frac{RFA_{t-2}}{RPIA_{t-2}} - RFE_{t-2} \right) \times PVF_{t-2} \times PVF_{t-1} \times RPIF_t$$

2B.32 In the above formula for RF_t :

RFA_{t-2}	means the amount of Ring Fence Costs incurred by the licensee in Regulatory Year t-2.
RFE_{t-2}	means the amount of the Ring Fence Costs allowance in Regulatory Year t-2, and is represented by the amount set out in Appendix 6 of this condition that applies to the licensee.
$RPIA_{t-2}$	has the value given to it by Part C of CRC 2A.
PVF_t	has the value given to it by Part C of CRC 2A.
$RPIF_t$	has the value given to it by Part C of CRC 2A.

2B.33 In the Regulatory Years 2015/16 and 2016/17, RF_t will have the value of zero.

Part H: Calculation of the Supplier of Last Resort adjustment (SLR)

2B.34 For the purposes of the Principal Formula, and subject to paragraph 2B.36, SLR_t is derived in accordance with the following formula:

$$SLR_t = \frac{SLRA_{t-2}}{RPIA_{t-2}} \times PVF_{t-2} \times PVF_{t-1} \times RPIF_t + ESAt$$

2B.35 In the above formula for SLR_t :

$SLRA_{t-2}$

Means:

- (a) the amount of payments, in Regulatory Year t-2, made by the licensee to a Claimant in response to a Valid Claim, in accordance with its

obligations under paragraph 4 of standard condition 38B (Treatment of payment claims for last-resort supply where Valid Claim is received on or after 1 April 2019).

- (b) plus the correction of any shortfall or excess revenue recovery plus 12 months' interest relating to a Valid Claim recovered by the licensee under paragraph 3 of standard condition 38A (Treatment of unresolved payment claims for last-resort supply where Valid Claim is received before 1 April 2019);
- (c) less any costs received from a Claimant, in Regulatory Year t-2, credited by the administrator of a Former Electricity Supplier whose customers the Claimant has been appointed as Supplier of Last Resort for, and where the Claimant subsequently made a Valid Claim under standard condition 38B (Treatment of payment claims for last-resort supply where Valid Claim is received on or after 1 April 2019), standard condition 38A (Treatment of unresolved payment claims for last-resort supply where Valid Claim is received before 1 April 2019), or standard condition 38 (Treatment of payment claims for last-resort supply); and
- (d) plus any other reasonably incurred costs by the licensee as a result of conducting the processes set out in standard condition 38A (Treatment of unresolved payment claims for last-resort supply where Valid Claim is received before 1 April 2019) and standard condition 38B (Treatment of payment claims for last-resort supply where Valid Claim is received on or after 1 April 2019).

RPIA_{t-2} has the value given to it by Part C of CRC 2A.

PVF_t has the value given to it by Part C of CRC 2A.

RPIF_t has the value given to it by Part C of CRC 2A.

ESA_t means the Excess Specified Amount in accordance with paragraph 38B.7 of standard condition 38B, Treatment of payment claims for last-resort supply where Valid Claim is received on or after 1 April 2019.

2B.36 In the Regulatory Years 2015/16, 2016/17, 2017/18, 2018/19 and 2019/20, SLR_t will have the value of zero.

Part I: Calculation of the Eligible Bad Debt adjustment (EBD)

2B.37 For Regulatory Years 2021/22 and 2022/23 EBD_t is derived in accordance with the following formula:

$$EBD_t = \frac{(EBDA_{t-3} - RBD_{t-3})}{RPIA_{t-3}} \times PVF_{t-3} \times PVF_{t-2} \times PVF_{t-1} \times RPIF_t + IBDA_t$$

2B.38 For Regulatory Years 2015/16, 2016/17, 2017/18, 2018/19, 2019/20 and 2020/21, EBD_t is derived, respectively, in the following ways:

(a) For Regulatory Year 2021/22, EBD_t is derived in accordance with the following formula:

$$EBD_t = \left(HBD + \frac{(EBDA_{t-3} - RBD_{t-3})}{RPIA_{t-3}} \right) \times PVF_{t-3} \times PVF_{t-2} \times PVF_{t-1} \times RPIF_t + IBDA_t$$

(b) For Regulatory Years 2015/16, 2016/17, 2017/18, 2018/19, 2019/20 and 2020/21, EBD_t will have the value of zero.

2B.39 In the above formulae for EBD_t:

HBD Means the aggregate value directed by the Authority which the licensee has been directed to recover in respect of historic bad debts incurred between 1 April 2015 and 31 March 2018, which will be in 2012/13 prices and will include any interest.

EBDA_{t-3} Means the aggregate value directed by the Authority in accordance with paragraph 2B.40 below and that value shall be equal to the value of the bad debt

the licensee has incurred with respect to Use of System Charges owed to the licensee by one or more Defaulting Electricity Suppliers.

RBD_{t-3} Means the aggregate amount of debt recovered by the licensee, in Regulatory Year t-3, where the licensee has been credited by the administrator of a Defaulting Electricity Supplier, and where the licensee subsequently recovered the costs via the EBDA term.

RPIA_{t-3} has the value given to it by Part C of CRC 2A.

PVF_t has the value given to it by Part C of CRC 2A.

RPIF_t has the value given to it by Part C of CRC 2A.

IBDA_t Means the aggregate amount of Valid Bad Debt Claims requiring payment in the Regulatory Year t, in accordance the licensee's obligations under paragraph 4 of standard condition 38C. (Treatment of Valid Bad Debt Claims).

2B.40 Where the licensee has incurred bad debts with respect to Use of System Charges owed to the licensee by one or more Defaulting Electricity Suppliers within a given Regulatory Year, within 60 days of the end of that Regulatory Year the licensee shall submit to the Authority a statement in a form that has been prescribed by the Authority setting out the amount of the bad debt arising as a result of the Defaulting Electricity Supplier(s)' insolvency during that Regulatory Year, together with any prior year adjustments following receipt of the Final Reconciliation Settlement Run for the final day of supply by the Former Electricity Supplier.

2B.41 The Authority shall by Notice to the licensee direct the value of the EBDA term to be used in the calculation of the Eligible Bad Debt Cost adjustment set out in 2B.37 provided that the amount specified in the statement submitted in 2B.40 is adjusted only for any amount of the bad debt that has arisen because of the licensee's failure to follow good industry practice detailed in Schedule 1 ('Cover') of the Distribution

Connection and Use of System Agreement (“the DCUSA”) and proportion of the value of bad debt relative to the age of that bad debt at the time of the Defaulting Electricity Supplier’s insolvency, calculated as shown in Appendix 7 of this condition.

2B.42 If, within three months of receiving the statement from the licensee referred to in paragraph 2B.40, the Authority has not made a direction under that paragraph, the EBDA adjustment proposed by the licensee will be deemed to have been made.

2B.43 The licensee shall where relevant submit a statement under paragraph 2B.40 with respect to each Defaulting Electricity Supplier and, where more than one such statement is submitted in the Regulatory Year, the EBDA term shall reflect the cumulative effect of each statement and the requirements of paragraph 2B.44 will apply with respect to each such statement.

2B.44 A direction issued by the Authority under paragraph 2B.41 will be of no effect unless, before issuing it, the Authority has:

- (a) by Notice to the licensee, set out the terms of the proposed direction;
- (b) specified in the Notice the reasons for the Authority’s proposed adjustments;
- (c) specified in the Notice the period (which may not be less than 14 days from the date of the Notice) within which the licensee may make representations to the Authority about its proposals; and
- (d) given due consideration to any representations received in response to the Notice.

Part J: Interpretation

2B.45 For the purposes of this condition:

Business Rates	<p>means:</p> <p>(a) in England and Wales, the rates payable by the licensee in respect of hereditaments on the Central Rating Lists (England and Wales) compiled under section 52 of the Local Government Finance Act 1988 (or any legislation amending or replacing those enactments); or</p> <p>(b) in Scotland, the rates payable by the licensee in respect of any land and heritages on the Valuation Rolls compiled under the Local Government (Scotland) Act 1975 or the Local Government (Scotland) Act 1994 (or any legislation amending or replacing those enactments).</p>
Elective Communication Services	has the meaning given to that term in the Smart Energy Code.
<u>Defaulting Electricity Supplier</u>	<u>means an Electricity Supplier whose insolvency has resulted in the licensee incurring bad debt. The timing and definition of insolvency is as per the Insolvency Act 1986.</u>
<u>Final Reconciliation Settlement Run</u>	<u>has the meaning given to that term in Section U2.3 of the Balancing and Settlement Code (BSC).</u>
<u>Former Electricity Supply</u>	<u>means an Electricity Supplier whose supply licence has been revoked.</u>
Pass-through Transmission Connection Point Charges	means those elements of Transmission Connection Point Charges that do not qualify as New Transmission Capacity Charges.
Ring Fence Costs	<p>means the amount of the incremental costs necessarily incurred by the licensee in Regulatory Year t-2 as a direct result of complying with the additional regulatory requirements referred to in the Authority's letter dated 1 February 2013 entitled "Modifications to the ring fence conditions in network operator licences" and published on the Authority's Website, provided that those costs:</p> <p>(a) have been ascertained in accordance with the RIGs referred to in standard condition 46 (Regulatory Instructions and Guidance); and</p> <p>(b) have not been otherwise remunerated under any other provision of this licence.</p>
Smart Energy Code	means the document of that name referred to in standard condition 21A (The Smart Energy Code), that is maintained for the purposes of that condition and is subject to modification pursuant to Condition 23 (Change control for Smart Energy Code), of the Smart Meter Communication Licence.
Smart Meter Communication Licence	means the licences granted under section 6(1A) of the Act and section 7AB(2) of the Gas Act 1986.

**Smart Meter
Communication
Licensee Costs**

means charges payable by the licensee (by virtue of the requirement for it to be a party to the Smart Energy Code) to the holder of the Smart Meter Communication Licence in accordance with section J of the Smart Energy Code, excluding any charges in respect of Elective Communication Services.

**Smart Meter
Information
Technology Costs**

means any information technology costs that the licensee reasonably incurs that are necessary to enable the licensee to use data from Smart Meters (within the meaning given to that term in Condition 1 of the Smart Meter Communication Licence) effectively for the efficient and economic operation, maintenance and development of its Distribution System, as further clarified in the RIGs.

APPENDIX 1

CRC 2B. Calculation of Allowed Pass-Through Items (SSEH only)

Introduction

- 2B.1 This condition sets out the calculation of the amount of the term PT (the allowed pass-through term) that applies in CRC 2A (restriction of Allowed Distribution Network Revenue).
- 2B.2 The allowed pass-through term in CRC 2A amends the licensee's Allowed Distribution Network Revenue so as to allow certain costs as specified below to be passed through to users of the licensee's Distribution System through Use of System Charges.

Part A: Calculation of Allowed Pass-Through Items (PT)

- 2B.3 For the purposes of Part B of CRC 2A, which establishes the calculation of Allowed Distribution Network Revenue, the total amount of the PT term is calculated in accordance with the following formula (in this condition, the Principal Formula):

$$PT_t = LF_t + RB_t + TB_t - HB_t + SMC_t + SMT_t + RF_t + SEC_t + UNC_t + \underline{SLR_t} + \underline{EBD_t}$$

- 2B.4 In the Principal Formula:

LF_t means the licence fee adjustment in Regulatory Year t, as derived in accordance with the formula set out in Part B of this condition.

RB_t means the Business Rates adjustment in Regulatory Year t, as derived in accordance with the formula set out in Part C of this condition.

TB_t means the Transmission Connection Point Charges adjustment in Regulatory Year t, as derived in accordance with the formula set out in Part D of this condition.

HB _t	means the amount received by the licensee in Regulatory Year t as the result of any direction given by the Secretary of State in accordance with section 184 of the Energy Act 2004 in relation to assistance for high-cost distributors (see also CRC 2N in connection with this).
SMC _t	means the Smart Meter Communication Licensee Costs adjustment in Regulatory Year t, as derived in accordance with the formula set out in Part E of this condition.
SMIT _t	means the Smart Meter Information Technology Costs adjustment in Regulatory Year t, as derived in accordance with the formula set out in Part F of this condition.
RF _t	means the Ring Fence Costs adjustment in Regulatory Year t, as derived in accordance with Part G of this condition.
SEC _t	means the Shetland Variable Energy Costs, in Regulatory Year t, as derived in accordance with Part H of this condition.
UNC _t	means an amount in Regulatory Year t representing a relevant adjustment to the calculation of Allowed Demand Revenue arising from the application of CRC 2Q (Arrangements for the recovery of costs for an integrated plan to manage supply and demand on Shetland). Uncertain costs may also be recovered under CRC 3F (Arrangements for the recovery of uncertain costs).
<u>SLR_t</u>	<u>means the Supplier of Last Resort Costs adjustment in Regulatory Year t in accordance with Part H of this condition.</u>
<u>EBD_t</u>	<u>means the Eligible Bad Debt Costs adjustment in Regulatory Year t in accordance with Part I of this condition.</u>

Part B: Calculation of the licence fee adjustment (LF)

2B.5 For the purposes of the Principal Formula, and subject to paragraph 2B.7, LF_t is derived in accordance with the following formula:

$$LF_t = \left(\frac{LFA_{t-2}}{RPIA_{t-2}} - LFE_{t-2} \right) \times PVF_{t-2} \times PVF_{t-1} \times RPIF_t$$

2B.6 In the above formula for LF_t :

LFA_{t-2}	means the amount of licence fee payments, in Regulatory Year t-2, made by the licensee in accordance with its obligations under standard condition 5 (Licensee's payments to the Authority).
LFE_{t-2}	means the amount of the licence fee allowance, in Regulatory Year t-2, and is represented by the amount set out in Appendix 1 of this condition that applies to the licensee.
$RPIA_{t-2}$	has the value given to it by Part C of CRC 2A.
PVF_t	has the value given to it by Part C of CRC 2A.
$RPIF_t$	has the value given to it by Part C of CRC 2A.

2B.7 In the Regulatory Years 2015/16 and 2016/17, LF_t will have the value of zero.

Part C: Calculation of the Business Rates adjustment (RB)

2B.8 For the purposes of the Principal Formula, and subject to paragraphs 2B.10 and 2B.11, RB_t is derived in accordance with the following formula:

$$RB_t = \left(\frac{RBA_{t-2}}{RPIA_{t-2}} - RBE_{t-2} \right) \times PVF_{t-2} \times PVF_{t-1} \times RPIF_t$$

2B.9 In the above formula for RB_t :

RBA_{t-2}	means the amount, in Regulatory Year t-2, paid by the licensee in respect of Business Rates.
RBE_{t-2}	means the amount of the allowance in respect of Business Rates, in Regulatory Year t-2, and is represented by the amount set out in Appendix 2 of this condition that applies to the licensee.
$RPIA_{t-2}$	has the value given to it by Part C of CRC 2A.
PVF_t	has the value given to it by Part C of CRC 2A.
$RPIF_t$	has the value given to it by Part C of CRC 2A.

2B.10 In Regulatory Years 2015/16 and 2016/17, RB_t will have the value of zero.

- 2B.11 In paragraphs 2B.12 and 2B.13, the relevant valuation agency in England and Wales is the Valuation Office Agency and in Scotland is the Scottish Assessors Association.
- 2B.12 Paragraphs 2B.13 to 2B.16 apply if the relevant valuation agency revalues any of the licensee's assets for the purposes of setting Business Rates.
- 2B.13 If, after reviewing the licensee's engagement with the relevant valuation agency with respect to a particular revaluation, the Authority considers that the licensee has not used its reasonable endeavours to minimise the amount of the Business Rates to which it is liable, the Authority may, subject to paragraphs 2B.14 and 2B.15, by Notice to the licensee specify that any positive value for RB_t for one or more Regulatory Years derived under the formula set out in paragraph 2B.8 is to be changed to a different value.
- 2B.14 A Notice under paragraph 2B.13 is of no effect unless the Authority has first consulted with the licensee.
- 2B.15 A Notice under paragraph 2B.13:
- (a) may not specify a different value for RB_t for the Regulatory Year following the Regulatory Year in which the revaluation took place or for any earlier Regulatory Year; and
 - (b) may not specify a different value for RB_t that is less than zero.
- 2B.16 At any time after giving a Notice under paragraph 2B.13, the Authority may by a further Notice to the licensee nullify the original Notice and its effects.

Part D: Calculation of the Transmission Connection Point Charges adjustment (TB)

- 2B.17 For the purposes of the Principal Formula, and subject to paragraph 2B.19, TB_t is derived in accordance with the following formula:

$$TB_t = \left(\frac{PTPA_{t-2}}{RPIA_{t-2}} - PTPE_{t-2} \right) \times PVF_{t-2} \times PVF_{t-1} \times RPIF_t$$

- 2B.18 In the above formula for TB_t :

- $PTPA_{t-2}$ means the amount of Pass-through Transmission Connection Point Charges incurred by the licensee in Regulatory Year $t-2$.
- $PTPE_{t-2}$ means the amount of the Pass-through Transmission Connection Point Charges allowance in Regulatory Year $t-2$, and is represented by the amount set out in Appendix 3 of this condition that applies to the licensee.
- $RPIA_{t-2}$ has the value given to it by Part C of CRC 2A.
- PVF_t has the value given to it by Part C of CRC 2A.

RPIF_t has the value given to it by Part C of CRC 2A.

2B.19 In the Regulatory Years 2015/16 and 2016/17, TB_t will have the value of zero.

Part E: Calculation of the Smart Meter Communication Licensee Costs adjustment (SMC)

2B.20 For the purposes of the Principal Formula, and subject to paragraph 2B.22, SMC_t is derived in accordance with the following formula:

$$SMC_t = \left(\frac{SMCA_{t-2}}{RPIA_{t-2}} - SMCE_{t-2} \right) \times PVF_{t-2} \times PVF_{t-1} \times RPIF_t$$

2B.21 In the above formula for SMC_t:

- SMCA_{t-2} means the amount of Smart Meter Communication Licensee Costs incurred by the licensee in Regulatory Year t-2.
- SMCE_{t-2} means the amount of the Smart Meter Communication Licensee Costs allowance in Regulatory Year t-2, and is represented by the amount set out in Appendix 4 of this condition that applies to the licensee.
- RPIA_{t-2} has the value given to it by Part C of CRC 2A.
- PVF_t has the value given to it by Part C of CRC 2A.
- RPIF_t has the value given to it by Part C of CRC 2A.

2B.22 In the Regulatory Years 2015/16, 2016/17, 2023/24 and 2024/25, SMC_t will have the value of zero.

Part F: Calculation of the Smart Meter Information Technology Costs adjustment (SMIT)

2B.23 For the purposes of the Principal Formula, and subject to paragraph 2B.25, SMIT_t is derived in accordance with the following formula:

$$SMIT_t = \left(\frac{SMIA_{t-2}}{RPIA_{t-2}} - SMIE_{t-2} \right) \times PVF_{t-2} \times PVF_{t-1} \times RPIF_t + SMITR_t$$

2B.24 In the above formula for SMIT_t:

- SMIA_{t-2} means the amount of Smart Meter Information Technology Costs incurred by the licensee in Regulatory Year t-2.
- SMIE_{t-2} means the amount of the Smart Meter Information Technology Costs allowance in Regulatory Year t-2, and is represented by the amount set out in Appendix 5 of this condition that applies to the licensee.
- RPIA_{t-2} has the value given to it by Part C of CRC 2A.
- PVF_t has the value given to it by Part C of CRC 2A.

RPIF_t has the value given to it by Part C of CRC 2A.

SMITR_t means the adjustment to Smart Meter Information Technology Costs for the licensee in Regulatory Year t as a result of the SMIT review.

- 2B.25 In the Regulatory Years 2015/16, 2016/17, 2023/24 and 2024/25, SMIT_t will have the value of zero.
- 2B.26 In 2020/21, the Authority will commence a review (the “SMIT review”) of the information technology costs that the licensee has incurred or plans to incur, during the Price Control Period, to enable it to use smart metering data for the operation and maintenance of its Distribution System.
- 2B.27 The SMIT review will determine whether the costs incurred or planned are falling or capable of falling within the definition of Smart Meter Information Technology Costs.
- 2B.28 Before making the determination referred to in paragraph 2B.27, the Authority will consult with the licensee and any other party that the Authority considers appropriate.
- 2B.29 A determination under this Part may:
- (a) set the value of SMITR_t for any Regulatory Year, subject to paragraph 2B.30; and
 - (b) impose conditions with respect to the amounts and circumstances in which future costs may be passed through under the SMIT_t term.
- 2B.30 In the Regulatory Years before 2021/22, SMITR_t will have the value of zero.

Part G: Calculation of the Ring Fence Costs adjustment (RF)

- 2B.31 For the purposes of the Principal Formula, and subject to paragraph 2B.33, RF_t is derived in accordance with the following formula:

$$RF_t = \left(\frac{RFA_{t-2}}{RPIA_{t-2}} - RFE_{t-2} \right) \times PVF_{t-2} \times PVF_{t-1} \times RPIF_t$$

- 2B.32 In the above formula for RF_t:

RFA_{t-2} means the amount of Ring Fence Costs incurred by the licensee in Regulatory Year t-2.

RFE_{t-2} means the amount of the Ring Fence Costs allowance in Regulatory Year t-2, and is represented by the amount set out in Appendix 6 of this condition that applies to the licensee.

RPIA_{t-2} has the value given to it by Part C of CRC 2A.

PVF_t has the value given to it by Part C of CRC 2A.

RPIF_t has the value given to it by Part C of CRC 2A.

2B.33 In the Regulatory Years 2015/16 and 2016/17, RF_t will have the value of zero.

Part H: Calculation of the Shetland Variable Energy Costs adjustment (SEC)

2B.34 For the purposes of the Principal Formula, and subject to paragraph 2B.36, SEC_t is derived in accordance with the following formula:

$$SEC_t = \left(\frac{SECA_{t-2}}{RPIA_{t-2}} - SECE_{t-2} \right) \times PVF_{t-2} \times PVF_{t-1} \times RPIF_t$$

2B.35 In the above formula for SEC_t:

SECA_{t-2} means the amount of Shetland Variable Energy Costs incurred by the licensee in Regulatory Year t-2, in accordance with CRC 2P (Shetland Variable Energy Costs Pass-Through Items).
SECE_{t-2} means the amount of Shetland Variable Energy Costs allowance in Regulatory Year t-2, and is represented by the amount set out in Appendix 7 of this condition that applies to the licensee.
RPIA_{t-2} has the value given to it by Part C of CRC 2A.
PVF_t has the value given to it by Part C of CRC 2A.
RPIF_t has the value given to it by Part C of CRC 2A.

2B.36 In the Regulatory Years 2015/16 and 2016/17, SEC_t will have the value of zero.

Part I: Calculation of the Supplier of Last Resort adjustment (SLR)

2B.37 For the purposes of the Principal Formula, and subject to paragraph 2B.39, SLR_t is derived in accordance with the following formula:

$$SLR_t = \frac{SLRA_{t-2}}{RPIA_{t-2}} \times PVF_{t-2} \times PVF_{t-1} \times RPIF_t + ESA_t$$

2B.38 In the above formula for SLR_t:

SLRA_{t-2} Means:

- (a) the amount of payments, in Regulatory Year t-2, made by the licensee to a Claimant in response to a Valid Claim, in accordance with its obligations under paragraph 4 of standard condition 38B (Treatment of payment claims for last-resort supply where Valid Claim is received on or after 1 April 2019).
- (b) plus the correction of any shortfall or excess revenue recovery plus 12 months' interest relating to a Valid Claim recovered by the licensee under paragraph 3 of standard condition 38A (Treatment of unresolved payment claims for last-resort supply where Valid Claim is received before 1 April 2019);
- (c) less any costs received from a Claimant, in Regulatory Year t-2, credited by the administrator of a Former Electricity Supplier whose customers the Claimant has been appointed as Supplier of Last Resort for, and where the Claimant subsequently made a Valid Claim under standard condition 38B (Treatment of payment claims for last-resort supply where Valid Claim is received on or after 1 April 2019), standard condition 38A (Treatment of unresolved payment claims for last-resort supply where Valid Claim is received before 1 April 2019), and standard condition 38 (Treatment of payment claims for last-resort supply); and
- (d) plus any other reasonably incurred costs by the licensee as a result of conducting the processes set out in standard condition 38A (Treatment of unresolved payment claims for last-resort supply where Valid Claim is received before 1 April 2019) and standard condition 38B (Treatment of payment claims for last-resort supply where Valid Claim is received on or after 1 April 2019).

RPIA_{t-2}

has the value given to it by Part C of CRC 2A.

PVF_t has the value given to it by Part C of CRC 2A.

RPIF_t has the value given to it by Part C of CRC 2A.

ESA_t means the Excess Specified Amount in accordance with paragraph 38B.7 of standard condition 38B, Treatment of payment claims for last-resort supply where Valid Claim is received on or after 1 April 2019.

2B.39 In the Regulatory Years 2015/16, 2016/17, 2017/18, 2018/19 and 2019/20, SLR_t will have the value of zero.

Part J: Calculation of the Eligible Bad Debt adjustment (EBD)

2B.40 For the purposes of the Principal Formula, subject to paragraph 2B.41, EBD_t is derived in accordance with the following formula:

$$EBD_t = \frac{(EBDA_{t-3} - RBD_{t-3})}{RPIA_{t-3}} \times PVF_{t-3} \times PVF_{t-2} \times PVF_{t-1} \times RPIF_t + IBDA_t$$

2B.41 For Regulatory Years 2015/16, 2016/17, 2017/18, 2018/19, 2019/20, 2020/21 and 2021/22, EBD_t is derived, respectively, in the following ways:

(a) For Regulatory Year 2021/22, EBD_t is derived in accordance with the following formula:

$$EBD_t = \left(HBD + \frac{(EBDA_{t-3} - RBD_{t-3})}{RPIA_{t-3}} \right) \times PVF_{t-3} \times PVF_{t-2} \times PVF_{t-1} \times RPIF_t + IBDA_t$$

(b) For Regulatory Years 2015/16, 2016/17, 2017/18, 2018/19, 2019/20 and 2020/21, EBD_t will have the value of zero.

2B.42 In the above formulae for EBD_t:

HBD Means the aggregate value directed by the Authority which the licensee has been directed to recover in respect of historic bad debts incurred between 1

<u>EBDA_{t-3}</u>	<u>April 2015 and 31 March 2018, which will be in 2012/13 prices and will include any interest.</u>
	<u>Means the aggregate value directed by the Authority in accordance with paragraph 2B.43 below and that value shall be equal to the value of the bad debt the licensee has incurred with respect to Use of System Charges owed to the licensee by one or more Defaulting Electricity Suppliers.</u>
<u>RBD_{t-3}</u>	<u>Means the aggregate amount of debt recovered by the licensee, in Regulatory Year t-3, where the licensee has been credited by the administrator of a Defaulting Electricity Supplier, and where the licensee subsequently recovered the costs via the EBDA term.</u>
<u>RPIA_{t-3}</u>	<u>has the value given to it by Part C of CRC 2A.</u>
<u>PVF_t</u>	<u>has the value given to it by Part C of CRC 2A.</u>
<u>RPIF_t</u>	<u>has the value given to it by Part C of CRC 2A.</u>
<u>IBDA_t</u>	<u>Means the aggregate amount of Valid Bad Debt Claims requiring payment in the Regulatory Year t, in accordance the licensee's obligations under paragraph 4 of standard condition 38C. (Treatment of Valid Bad Debt Claims).</u>

2B.43 Where the licensee has incurred bad debts with respect to Use of System Charges owed to the licensee by one of more Defaulting Electricity Suppliers within a given Regulatory Year, within 60 days of the end of that Regulatory Year the licensee shall submit to the Authority a statement in a form that has been prescribed by the Authority setting out the amount of the bad debt arising as a result of the Defaulting Electricity Supplier(s)' insolvency during that Regulatory Year, together with any prior year adjustments following receipt of the Final Reconciliation Settlement Run for the final day of supply by the Former Electricity Supplier.

- 2B.44 The Authority shall by Notice to the licensee direct the value of the EBDA term to be used in the calculation of the Eligible Bad Debt Cost adjustment set out in 2B.40 provided that the amount specified in the statement submitted in 2B.43 is adjusted only for any amount of the bad debt that has arisen because of the licensee's failure to follow good industry practice detailed in Schedule 1 ('Cover') of the Distribution Connection and Use of System Agreement ("the DCUSA") and proportion of the value of bad debt relative to the age of that bad debt at the time of the Defaulting Electricity Supplier's insolvency, calculated as shown in Appendix 8 of this condition.
- 2B.45 If, within three months of receiving the statement from the licensee referred to in paragraph 2B.43, the Authority has not made a direction under that paragraph, the EBDA adjustment proposed by the licensee will be deemed to have been made.
- 2B.46 The licensee may submit a statement under paragraph 2B.43 with respect to each Defaulting Electricity Supplier and, where more than one such statement is submitted in the Regulatory Year, the EBDA term shall reflect the cumulative effect of each statement and the requirements of paragraph 2B.47 will apply with respect to each such statement.
- 2B.47 A direction issued by the Authority under paragraph 2B.44 will be of no effect unless, before issuing it, the Authority has:
- (a) by Notice to the licensee, set out the terms of the proposed direction;
 - (b) specified in the Notice the reasons for the Authority's proposed adjustments;
 - (c) specified in the Notice the period (which may not be less than 14 days from the date of the Notice) within which the licensee may

make representations to the Authority about its proposals; and

- (d) given due consideration to any representations received in response to the Notice.

Part K: Interpretation

2B.48 For the purposes of this condition:

Business Rates

means:

(a) in England and Wales, the rates payable by the licensee in respect of hereditaments on the Central Rating Lists (England and Wales) compiled under section 52 of the Local Government Finance Act 1988 (or any legislation amending or replacing those enactments); or

(b) in Scotland, the rates payable by the licensee in respect of any land and heritages on the Valuation Rolls compiled under the Local Government (Scotland) Act 1975 or the Local Government (Scotland) Act 1994 (or any legislation amending or replacing those enactments).

Elective Communication Services

has the meaning given to that term in the Smart Energy Code.

Defaulting Electricity Supplier

means an Electricity Supplier whose insolvency has resulted in the licensee incurring bad debt. The timing and definition of insolvency is as per the Insolvency Act 1986.

Final Reconciliation Settlement Run

has the meaning given to that term in Section U2.3 of the Balancing and Settlement Code (BSC).

Former Electricity Supply

means an Electricity Supplier whose supply licence has been revoked.

Pass-through Transmission Connection Point Charges

means those elements of Transmission Connection Point Charges that do not qualify as New Transmission Capacity Charges.

Ring Fence Costs

means the amount of the incremental costs necessarily incurred by the licensee in Regulatory Year t-2 as a direct result of complying with the additional regulatory requirements referred to in the Authority's letter dated 1 February 2013 entitled "Modifications to the ring fence conditions in network operator licences" and published on the Authority's Website, provided that those costs:

(a) have been ascertained in accordance with the RIGs referred to in standard condition 46 (Regulatory Instructions and Guidance); and

(b) have not been otherwise remunerated under any other provision of this licence.

Smart Energy Code	means the document of that name referred to in standard condition 21A (The Smart Energy Code), that is maintained for the purposes of that condition and is subject to modification pursuant to Condition 23 (Change control for Smart Energy Code), of the Smart Meter Communication Licence.
Smart Meter Communication Licence	means the licences granted under section 6(1A) of the Act and section 7AB(2) of the Gas Act 1986.
Smart Meter Communication Licensee Costs	means charges payable by the licensee (by virtue of the requirement for it to be a party to the Smart Energy Code) to the holder of the Smart Meter Communication Licence in accordance with section J of the Smart Energy Code, excluding any charges in respect of Elective Communication Services.
Smart Meter Information Technology Costs	means any information technology costs that the licensee reasonably incurs that are necessary to enable the licensee to use data from Smart Meters (within the meaning given to that term in Condition 1 of the Smart Meter Communication Licence) effectively for the efficient and economic operation, maintenance and development of its Distribution System, as further clarified in the RIGs.
Shetland Variable Energy Costs	means the pass through items applicable to SSEH as defined in CRC2P (Shetland Variable Energy Costs Pass-Through Items).

APPENDIX 1

Values for the LFE term (£m, 2012/13 prices) by licensee (see Part B of this condition)

	Regulatory Year							
Licensee	2015/16	2016/17	2017/18	2018/19	2019/20	2020/21	2021/22	2022/23

<u>>65</u>	<u>5</u>

CRC 2B. Calculation of Allowed Pass-Through Items [WPD

licensees only]

Introduction

- 2B.1 This condition sets out the calculation of the amount of the term PT (the allowed pass-through term) that applies in CRC 2A (restriction of Allowed Distribution Network Revenue).
- 2B.2 The allowed pass-through term in CRC 2A amends the licensee's Allowed Distribution Network Revenue so as to allow certain costs as specified below to be passed through to users of the licensee's Distribution System through Use of System Charges.

Part A: Calculation of Allowed Pass-Through Items (PT)

- 2B.3 For the purposes of Part B of CRC 2A, which establishes the calculation of Allowed Distribution Network Revenue, the total amount of the PT term is calculated in accordance with the following formula (in this condition, the Principal Formula):

$$PT_t = LF_t + RB_t + TB_t + SMC_t + SMIT_t + RF_t + \underline{SLR_t + EBD_t}$$

- 2B.4 In the Principal Formula:

LF_t means the licence fee adjustment in Regulatory Year t, as derived in accordance with the formula set out in Part B of this condition.

RB_t means the Business Rates adjustment in Regulatory Year t, as derived in accordance with the formula set out in Part C of this condition.

TB_t	means the Transmission Connection Point Charges adjustment in Regulatory Year t, as derived in accordance with the formula set out in Part D of this condition.
SMC_t	means the Smart Meter Communication Licensee Costs adjustment in Regulatory Year t, as derived in accordance with the formula set out in Part E of this condition.
$SMIT_t$	means the Smart Meter Information Technology Costs adjustment in Regulatory Year t, as derived in accordance with the formula set out in Part F of this condition.
RF_t	means the Ring Fence Costs adjustment in Regulatory Year t, as derived in accordance with Part G of this condition.
<u>SLR_t</u>	<u>means the Supplier of Last Resort Costs adjustment in Regulatory Year t in accordance with Part H of this condition.</u>
<u>EBD_t</u>	<u>means the Eligible Bad Debt Costs adjustment in Regulatory Year t in accordance with Part I of this condition.</u>

Part B: Calculation of the licence fee adjustment (LF)

2B.5 For the purposes of the Principal Formula, and subject to paragraph 2B.7, LF_t is derived in accordance with the following formula:

$$LF_t = \left(\frac{LFA_{t-2}}{RPIA_{t-2}} - LFE_{t-2} \right) \times PVF_{t-2} \times PVF_{t-1} \times RPIF_t$$

2B.6 In the above formula for LF_t :

LFA_{t-2}	means the amount of licence fee payments, in Regulatory Year t-2, made by the licensee in accordance with its obligations under standard condition 5 (Licensee's payments to the Authority).
LFE_{t-2}	means the amount of the licence fee allowance, in Regulatory Year t-2, and is represented by the amount set out in Appendix 1 of this condition that applies to the licensee.
$RPIA_{t-2}$	has the value given to it by Part C of CRC 2A.
PVF_t	has the value given to it by Part C of CRC 2A.

RPIF_t has the value given to it by Part C of CRC 2A.

2B.7 In the Regulatory Years 2015/16 and 2016/17, LF_t will have the value of zero.

Part C: Calculation of the Business Rates adjustment (RB)

2B.8 For the purposes of the Principal Formula, and subject to paragraphs 2B.10 and 2B.11, RB_t is derived in accordance with the following formula:

$$RB_t = \left(\frac{RBA_{t-2}}{RPIA_{t-2}} - RBE_{t-2} \right) \times PVF_{t-2} \times PVF_{t-1} \times RPIF_t$$

2B.9 In the above formula for RB_t:

RBA_{t-2} means the amount, in Regulatory Year t-2, paid by the licensee in respect of Business Rates.

RBE_{t-2} means the amount of the allowance in respect of Business Rates, in Regulatory Year t-2, and is represented by the amount set out in Appendix 2 of this condition that applies to the licensee.

RPIA_{t-2} has the value given to it by Part C of CRC 2A.

PVF_t has the value given to it by Part C of CRC 2A.

RPIF_t has the value given to it by Part C of CRC 2A.

2B.10 In Regulatory Years 2015/16 and 2016/17, RB_t will have the value of zero.

2B.11 In paragraphs 2B.12 and 2B.13, the relevant valuation agency in England and Wales is the Valuation Office Agency and in Scotland is the Scottish Assessors Association.

2B.12 Paragraphs 2B.13 to 2B.16 apply if the relevant valuation agency revalues any of the licensee's assets for the purposes of setting Business Rates.

2B.13 If, after reviewing the licensee's engagement with the relevant valuation agency with respect to a particular revaluation, the Authority considers that the licensee has not used its reasonable endeavours to minimise the amount of the Business Rates to which it is liable, the Authority may, subject to paragraphs 2B.14 and 2B.15, by Notice to the licensee specify that any positive value for RB_t for one or more Regulatory Years derived under the formula set out in paragraph 2B.8 is to be changed to a different value.

2B.14 A Notice under paragraph 2B.13 is of no effect unless the Authority has first consulted with the licensee.

2B.15 A Notice under paragraph 2B.13:

- (a) may not specify a different value for RB_t for the Regulatory Year following the Regulatory Year in which the revaluation took place or for any earlier Regulatory Year; and
- (b) may not specify a different value for RB_t that is less than zero.

2B.16 At any time after giving a Notice under paragraph 2B.13, the Authority may by a further Notice to the licensee nullify the original Notice and its effects.

Part D: Calculation of the Transmission Connection Point Charges adjustment (TB)

2B.17 For the purposes of the Principal Formula, and subject to paragraph 2B.19, TB_t is derived in accordance with the following formula:

$$TB_t = \left(\frac{PTPA_{t-2}}{RPIA_{t-2}} - PTPE_{t-2} \right) \times PVF_{t-2} \times PVF_{t-1} \times RPIF_t$$

2B.18 In the above formula for TB_t :

- $PTPA_{t-2}$ means the amount of Pass-through Transmission Connection Point Charges incurred by the licensee in Regulatory Year t-2.
- $PTPE_{t-2}$ means the amount of the Pass-through Transmission Connection Point Charges allowance in Regulatory Year t-2, and is represented by the amount set out in Appendix 3 of this condition that applies to the licensee.
- $RPIA_{t-2}$ has the value given to it by Part C of CRC 2A.
- PVF_t has the value given to it by Part C of CRC 2A.
- $RPIF_t$ has the value given to it by Part C of CRC 2A.

2B.19 In the Regulatory Years 2015/16 and 2016/17, TB_t will have the value of zero.

Part E: Calculation of the Smart Meter Communication Licensee Costs adjustment (SMC)

2B.20 For the purposes of the Principal Formula, and subject to paragraph 2B.22, SMC_t is derived in accordance with the following formula:

$$SMC_t = \left(\frac{SMCA_{t-2}}{RPIA_{t-2}} - SMCE_{t-2} \right) \times PVF_{t-2} \times PVF_{t-1} \times RPIF_t$$

2B.21 In the above formula for SMC_t :

- $SMCA_{t-2}$ means the amount of Smart Meter Communication Licensee Costs incurred by the licensee in Regulatory Year t-2.
- $SMCE_{t-2}$ means the amount of the Smart Meter Communication Licensee Costs allowance in Regulatory Year t-2, and is represented by the amount set out in Appendix 4 of this condition that applies to the licensee.
- $RPIA_{t-2}$ has the value given to it by Part C of CRC 2A.

PVF_t has the value given to it by Part C of CRC 2A.

RPIF_t has the value given to it by Part C of CRC 2A.

2B.22 In the Regulatory Years 2015/16, 2016/17, 2023/24 and 2024/25, SMC_t will have the value of zero.

Part F: Calculation of the Smart Meter Information Technology Costs adjustment (SMIT)

2B.23 For the purposes of the Principal Formula, and subject to paragraph 2B.25, SMIT_t is derived in accordance with the following formula:

$$\text{SMIT}_t = \left(\frac{\text{SMIA}_{t-2}}{\text{RPIA}_{t-2}} - \text{SMIE}_{t-2} \right) \times \text{PVF}_{t-2} \times \text{PVF}_{t-1} \times \text{RPIF}_t + \text{SMITR}_t$$

2B.24 In the above formula for SMIT_t:

SMIA_{t-2} means the amount of Smart Meter Information Technology Costs incurred by the licensee in Regulatory Year t-2.

SMIE_{t-2} means the amount of the Smart Meter Information Technology Costs allowance in Regulatory Year t-2, and is represented by the amount set out in Appendix 5 of this condition that applies to the licensee.

RPIA_{t-2} has the value given to it by Part C of CRC 2A.

PVF_t has the value given to it by Part C of CRC 2A.

RPIF_t has the value given to it by Part C of CRC 2A.

SMITR_t means the adjustment to Smart Meter Information Technology Costs for the licensee in Regulatory Year t as a result of the SMIT review.

2B.25 In the Regulatory Years 2015/16, 2016/17, 2023/24 and 2024/25, SMIT_t will have the value of zero.

2B.26 In 2020/21, the Authority will commence a review (the “SMIT review”) of the information technology costs that the licensee has incurred or plans to incur, during the Price Control Period, to enable it to use smart metering data for the operation and maintenance of its Distribution System.

2B.27 The SMIT review will determine whether the costs incurred or planned are falling or capable of falling within the definition of Smart Meter Information Technology Costs.

2B.28 Before making the determination referred to in paragraph 2B.27, the Authority will consult with the licensee and any other party that the Authority considers appropriate.

2B.29 A determination under this Part may:

- (a) set the value of $SMITR_t$ for any Regulatory Year, subject to paragraph 2B.30; and
- (b) impose conditions with respect to the amounts and circumstances in which future costs may be passed through under the $SMIT_t$ term.

2B.30 In the Regulatory Years before 2021/22, $SMITR_t$ will have the value of zero.

Part G: Calculation of the Ring Fence Costs adjustment (RF)

2B.31 For the purposes of the Principal Formula, and subject to paragraph 2B.33, RF_t is derived in accordance with the following formula:

$$RF_t = \left(\frac{RFA_{t-2}}{RPIA_{t-2}} - RFE_{t-2} \right) \times PVF_{t-2} \times PVF_{t-1} \times RPIF_t$$

2B.32 In the above formula for RF_t :

- RFA_{t-2} means the amount of Ring Fence Costs incurred by the licensee in Regulatory Year t-2.
- RFE_{t-2} means the amount of the Ring Fence Costs allowance in Regulatory Year t-2, and is represented by the amount set out in Appendix 6 of this condition that applies to the licensee.
- $RPIA_{t-2}$ has the value given to it by Part C of CRC 2A.
- PVF_t has the value given to it by Part C of CRC 2A.
- $RPIF_t$ has the value given to it by Part C of CRC 2A.

2B.33 In the Regulatory Years 2015/16 and 2016/17, RF_t will have the value of zero.

Part H: Calculation of the Supplier of Last Resort adjustment (SLR)

2B.34 For the purposes of the Principal Formula, and subject to paragraph 2B.36, SLR_t is derived in accordance with the following formula:

$$SLR_t = \frac{SLRA_{t-2}}{RPIA_{t-2}} \times PVF_{t-2} \times PVF_{t-1} \times RPIF_t + ESA_t$$

2B.35 In the above formula for SLR_t :

$SLRA_{t-2}$

Means:

- (a) the amount of payments, in Regulatory Year t-2, made by the licensee

to a Claimant in response to a Valid Claim, in accordance with its obligations under paragraph 4 of standard condition 38B (Treatment of payment claims for last-resort supply where Valid Claim is received on or after 1 April 2019).

- (b) plus the correction of any shortfall or excess revenue recovery plus 12 months' interest relating to a Valid Claim recovered by the licensee under paragraph 3 of standard condition 38A (Treatment of unresolved payment claims for last-resort supply where Valid Claim is received before 1 April 2019);
- (c) less any costs received from a Claimant, in Regulatory Year t-2, credited by the administrator of a Former Electricity Supplier whose customers the Claimant has been appointed as Supplier of Last Resort for, and where the Claimant subsequently made a Valid Claim under standard condition 38B (Treatment of payment claims for last-resort supply where Valid Claim is received on or after 1 April 2019), standard condition 38A (Treatment of unresolved payment claims for last-resort supply where Valid Claim is received before 1 April 2019), and standard condition 38 (Treatment of payment claims for last-resort supply); and
- (d) plus any other reasonably incurred costs by the licensee as a result of conducting the processes set out in standard condition 38A (Treatment of unresolved payment claims for last-resort supply where Valid Claim is received before 1 April 2019) and standard condition 38B (Treatment of payment claims for last-resort supply where Valid Claim is received on or after 1 April 2019).

RPIA_{t-2} has the value given to it by Part C of CRC 2A.

PVF_t has the value given to it by Part C of CRC 2A.

RPIF_t has the value given to it by Part C of CRC 2A.

ESA_t means the Excess Specified Amount in accordance with paragraph 38B.7 of standard condition 38B, Treatment of payment claims for last-resort supply where Valid Claim is received on or after 1 April 2019.

2B.36 In the Regulatory Years 2015/16, 2016/17, 2017/18, 2018/19 and 2019/20, SLR_t will have the value of zero.

Part I: Calculation of the Eligible Bad Debt adjustment (EBD)

2B.37 For the purposes of the Principal Formula, subject to paragraph 2B.38, EBD_t is derived in accordance with the following formula:

$$EBD_t = \frac{(EBDA_{t-3} - RBD_{t-3})}{RPIA_{t-3}} \times PVF_{t-3} \times PVF_{t-2} \times PVF_{t-1} \times RPIF_t + IBDA_t$$

2B.38 For Regulatory Years 2015/16, 2016/17, 2017/18, 2018/19, 2019/20, 2020/21 and 2021/22, EBD_t is derived, respectively, in the following ways:

(a) For Regulatory Year 2021/22, EBD_t is derived in accordance with the following formula:

$$EBD_t = \left(HBD + \frac{(EBDA_{t-3} - RBD_{t-3})}{RPIA_{t-3}} \right) \times PVF_{t-3} \times PVF_{t-2} \times PVF_{t-1} \times RPIF_t + LBDA_t$$

(b) For Regulatory Years 2015/16, 2016/17, 2017/18, 2018/19, 2019/20 and 2020/21, EBD_t will have the value of zero.

2B.39 In the above formulae for EBD_t:

HBD Means the aggregate value directed by the Authority which the licensee has been directed to recover in respect of historic bad debts incurred between 1 April 2015 and 31 March 2018, which will be in 2012/13 prices and will include any interest.

EBDA_{t-3} Means the aggregate value directed by the Authority in accordance with paragraph 2B.40 below and that value shall be equal to the value of the bad debt the licensee has incurred with respect to Use of System Charges owed to the licensee by one or more Defaulting Electricity Suppliers.

RBD_{t-3} Means the aggregate amount of debt recovered by the licensee, in Regulatory Year t-3, where the licensee has been credited by the administrator of a Defaulting Electricity Supplier, and where the licensee subsequently recovered the costs via the EBDA term.

RPIA_{t-3} has the value given to it by Part C of CRC 2A.

PVF_t has the value given to it by Part C of CRC 2A.

RPIF_t has the value given to it by Part C of CRC 2A.

IBDA_t Means the aggregate amount of Valid Bad Debt Claims requiring payment in the Regulatory Year t, in accordance the licensee's obligations under paragraph 4 of standard condition 38C. (Treatment of Valid Bad Debt Claims).

2B.40 Where the licensee has incurred bad debts with respect to Use of System Charges owed to the licensee by one of more Defaulting Electricity Suppliers within a given Regulatory Year, within 60 days of the end of that Regulatory Year the licensee shall submit to the Authority a statement in a form that has been prescribed by the Authority setting out the amount of the bad debt arising as a result of the Defaulting Electricity Supplier(s)' insolvency during that Regulatory Year, together with any prior year adjustments following receipt of the Final Reconciliation Settlement Run for the final day of supply by the Former Electricity Supplier.

2B.41 The Authority shall by Notice to the licensee direct the value of the EBDA term to be used in the calculation of the Eligible Bad Debt Cost adjustment set out in 2B.37 provided that the amount specified in the statement submitted in 2B.40 is adjusted

only for any amount of the bad debt that has arisen because of the licensee's failure to follow good industry practice detailed in Schedule 1 ('Cover') of the Distribution Connection and Use of System Agreement ("the DCUSA") and proportion of the value of bad debt relative to the age of that bad debt at the time of the Defaulting Electricity Supplier's insolvency, calculated as shown in Appendix 7 of this condition.

2B.42 If, within three months of receiving the statement from the licensee referred to in paragraph 2B.40, the Authority has not made a direction under that paragraph, the EBDA adjustment proposed by the licensee will be deemed to have been made.

2B.43 The licensee may submit a statement under paragraph 2B.40 with respect to each Defaulting Electricity Supplier and, where more than one such statement is submitted in the Regulatory Year, the EBDA term shall reflect the cumulative effect of each statement and the requirements of paragraph 2B.44 will apply with respect to each such statement.

2B.44 A direction issued by the Authority under paragraph 2B.41 will be of no effect unless, before issuing it, the Authority has:

- (a) by Notice to the licensee, set out the terms of the proposed direction;
- (b) specified in the Notice the reasons for the Authority's proposed adjustments;
- (c) specified in the Notice the period (which may not be less than 14 days from the date of the Notice) within which the licensee may make representations to the Authority about its proposals; and
- (d) given due consideration to any representations received in response to the Notice.

Part J: Interpretation

2B.45 For the purposes of this condition:

Business Rates	means: (a) in England and Wales, the rates payable by the licensee in respect of hereditaments on the Central Rating Lists (England and Wales) compiled under section 52 of the Local Government Finance Act 1988 (or any legislation amending or replacing those enactments); or (b) in Scotland, the rates payable by the licensee in respect of any land and heritages on the Valuation Rolls compiled under the Local Government (Scotland) Act 1975 or the Local Government (Scotland) Act 1994 (or any legislation amending or replacing those enactments).
Elective Communication Services	has the meaning given to that term in the Smart Energy Code.
<u>Defaulting Electricity Supplier</u>	<u>means an Electricity Supplier whose insolvency has resulted in the licensee incurring bad debt. The timing and definition of insolvency is as per the Insolvency Act 1986.</u>
<u>Final Reconciliation Settlement Run</u>	<u>has the meaning given to that term in Section U2.3 of the Balancing and Settlement Code (BSC).</u>
<u>Former Electricity Supply</u>	<u>means an Electricity Supplier whose supply licence has been revoked.</u>
Pass-through Transmission Connection Point Charges	means those elements of Transmission Connection Point Charges that do not qualify as New Transmission Capacity Charges.
Ring Fence Costs	means the amount of the incremental costs necessarily incurred by the licensee in Regulatory Year t-2 as a direct result of complying with the additional regulatory requirements referred to in the Authority's letter dated 1 February 2013 entitled "Modifications to the ring fence conditions in network operator licences" and published on the Authority's Website, provided that those costs: (a) have been ascertained in accordance with the RIGs referred to in standard condition 46 (Regulatory Instructions and Guidance); and (b) have not been otherwise remunerated under any other provision of this licence.
Smart Energy Code	means the document of that name referred to in standard condition 21A (The Smart Energy Code), that is maintained for the purposes of that condition and is subject to modification pursuant to Condition 23 (Change control for Smart Energy Code), of the Smart Meter Communication Licence.

**Smart Meter
Communication
Licence**

means the licences granted under section 6(1A) of the Act and section 7AB(2) of the Gas Act 1986.

**Smart Meter
Communication
Licensee Costs**

means charges payable by the licensee (by virtue of the requirement for it to be a party to the Smart Energy Code) to the holder of the Smart Meter Communication Licence in accordance with section J of the Smart Energy Code, excluding any charges in respect of Elective Communication Services.

**Smart Meter
Information
Technology Costs**

means any information technology costs that the licensee reasonably incurs that are necessary to enable the licensee to use data from Smart Meters (within the meaning given to that term in Condition 1 of the Smart Meter Communication Licence) effectively for the efficient and economic operation, maintenance and development of its Distribution System, as further clarified in the RIGs.
