Dear David,

Informal consultation on proposed modifications to the Electricity Distribution Licence

Thank you for the opportunity to respond to this informal consultation.

We believe that the proposed changes are appropriate. They strengthen the Competition Act provisions within the licence to ensure that consumers are adequately protected from any market distortions that could arise from DNOs sharing information with AIDNOs and also to ensure that there is no inappropriate sharing of confidential information between these parties.

It is our opinion that the proposed wording fulfils its objectives. We do not propose any further modifications to the distribution licence conditions.

Yours sincerely

Ross Bibby
