KEY - Indicated Permit Scheme Review (& Status)	
Yes =	Lancashire has formally advised that they are undertaking a scheme review (Nov 2018) and that with effect 1/4/19 revised permit fees will apply (the fee matrix has been updated accordingly)
No indication =	No information received from HA to indicate a scheme review is planned
Not eligible =	Scheme review cannot be undertaken as scheme has not yet operated for at least 12 months
GMRAPS =	As a "common scheme" any review has to consult with all 10 separate HAs (plus TIGM). Although we have been advised a review is pending it has not formally commenced and is not expected to be completed until April 2020 at the earliest

KEY - Indicated Lane Rental Intentions	
No current intention =	HA responded in writing to ENWL request for policy information and indicated no imminent or pending intentions to introduce Lane Rental
GMRAPS =	All GMRAPS HAs were contacted separately by ENWL. The majority responded and indicated no imminent or pending move to introduce lane rental. As GMRAPS is a common permit scheme any policies re lane rental would have to consult with all 10 separate HAs (plus TIGM). There is support in the local media for lane rental primarily from the Mayor of Manchester and senior members of Manchester City Council and TIGM to cover what is termed the "key route network" in and out of Manchester city centre
Not eligible =	Lane Rental cannot be considered as permit scheme has not yet operated for 12 months
