Re the proposed Transmission link to Shetland. [REDACTED]
[REDACTED]

28/4/19

Dear Sir,
I live [REDACTED] away from the proposed windfarm, and i am extremely concerned on the impact, visual, physical and Mental, that the Development will have on me and my Family. It is a huge Development which the people of Shetland will have to live with for generations to come. I am a Crofter, and i think the whole of Central Shetland will be ruined and will never recover to its previous state.
The people of Shetland have never had the opportunity to make their views known at a Public Enquiry. I think our pleas have been ignored.
No one is against Renewable Energy, but the destruction of our Island community to the benefit of large Multi National Companies, whose only care is to their shareholders, is abhorrent.
I think Shetland would be far better served by a Renewable scheme constructed to serve the people of Shetland.
We do not need a Cable. The costs, Monetary and Socially, far outweigh the benefits.
And let us get on with our lives without this shadow hanging over us.

Yours Faithfully,
[REDACTED]
