Dear Eleanor

Statutory consultation on a proposal to modify the special conditions of the electricity transmission licence held by National Grid Electricity System Operator Limited

Thank you for the opportunity to respond to this consultation. Please find our comments below.

Recovery of Year T incentive reconciliation in Y+1:

We are fully supportive of the proposed licence modification to recover BSUoS incentive reconciliations in the following year. This will reduce the cost of BSUoS movements through the final reconciliation run.

We welcome any proposal to provide more certainty over BSUoS costs which are increasing and becoming more volatile, due to the shift away from legacy thermal plant and moving towards large scale renewable generation.

Yours sincerely,

William Jago
