Dear Abu

Re: Statutory Consultation on the proposed modification of Special Condition 8I of National Grid Gas plc's Gas Transporter Licence to amend all references to 'Gas Deficit Warning' (GDW) to 'Gas Balancing Notification' (GBN)

Thank you for the opportunity to respond to this consultation.

As proposer of UNC Modification 0685, which implemented the change of name of the GDW to GBN, National Grid supports this subsequent proposed amendment to its GT Licence to align the terminology with that now contained in the UNC.

Yours sincerely

(by e-mail)
