

Please note my objection to transmission link and Viking energy wind farm for Shetland

We have a wonderful environment and way of life in this unique place, please don't destroy it with a link and windfarms. This will mean digging up all our wonderful peat banks

Bad for the environment, harm all our wildlife and flora and fauna.

Makes our lives unbearable with these massive wind turbines, far too large and too many for our islands.

We have a the second lowest unemployment in uk, so don't need the jobs

We have a great deal of tourist coming every year, which of course bring lots of money, they will stop coming with all the upheaval the turbines will cause our lovely way of life will change drastically with the disturbance and destruction they will cause and my family and my wonderful granddaughter will have to move away, as it will just be horrendous to live a decent life anymore.

Please don't let Shetland be destroyed, just to make money for a few.

It will change our lives forever badly.
