

To whoever this may concern

This cable does not guarantee security of supply to Shetland due to risk of breakages.

A proposed LNG power station replacing the Lerwick diesel station would guarantee supply at a fraction of the cost of the cable and the proposed Viking Energy Windfarm.

The continual cost of constraint payments to windfarms puts huge pressure on the consumers electricity bills and is a disgrace.

The environmental destruction of the windfarm and loss of biodiversity is inexcusable in a time of climate and Biodiversity crises.

This cable and windfarm are not green.

Please cancel viking and go for the safe and cheaper route of an LGN power station instead.

Yours
