

To whom it may concern,

I object very strongly to the proposed wind farm being built in Shetland.

The scale of the undertaking is extremely detrimental to the Shetland Isles and will have a huge impact on the environment not to mention the people who live nearby.

Shetland is an exceptional place of beauty and tranquility and is in the main unspoiled. We attract many thousands of tourist who visit here for that very reason which in my opinion will cease if this monstrosity goes ahead.

The impact this will have on our way of life is catastrophic and will certainly never be paid back by big business or the promises they make.

I live in Lerwick but the whole of Shetland is my back garden. I have lived here my whole life and never have I been so utterly in despair at what is happening to our isles.

Please please stop this desecration of my home.

Yours faithfully
