

Dear Sir/ Madam

I would like formally object to the proposed transmission link from mainland Scotland to Kergord, Shetland.

My objections are based on 3 factors:

1. This project does not offer consumers the best financial solution to meet Shetlands energy needs.
2. This project does not offer a secure and reliable link to meet Shetlands energy needs, i.e potential for damage to cable resulting in compromised energy supplies to Shetland for a sustained period of time.
3. Alternative energy proposals, such as a gas power station, have not been properly scrutinised.

Kind regards
