

I feel compelled to write this email to protest against this project. The approval of this project will damage the sensitive natural environment beyond recognition. The majority of people of Shetland communities bar the ones that are actually going to make personal gain from this project do not want this massive industrial landscape.

The communities directly affected have suffered for the last 10 + years fighting for answers and tried to have their voices heard but have been swept aside, those who will continue to suffer the mental mental anguish.

I urge you to reconsider this application.

Sincerely
