

Hello. I am a concerned citizen of Shetland and I would like to voice my objection to the creation of the Viking Energy wind farm in Shetland and your companies' approval of the undersea cable that would make this windfarm a possibility. The construction of such a massive industrial wind farm will be destructive to our natural environment and incredibly energy inefficient and will likely cost the bill payer across Shetland (and indeed the rest of Scotland) a huge sum of money to maintain. Scotland already has enough turbines to power itself three times over and yet it still finds itself having to turn them off to save the power grid which costs a great deal of money in government subsidies (which come from the taxpayers pocket). I urge you to reconsider this decision as it is an injustice against the people of Shetland and Scotland and will lead to environmental disaster for our islands.

Yours,
