

To whom it may concern.

I object to the proposed Windfarm being built in Shetland.

The negative impact that this will have on the area where there are valuable peat bogs, rare and red listed birds, nesting sites and all flora and fauna, that will be destroyed.

This is a disgrace and not good value for money for the consumer.

For security of supply, Shetland should have the LNG, at a fraction of the cost and being better for the consumer.

Also there would be no chance of a cable being damaged and more costs for maintenance.

Please reconsider the decision for this destructive plan.

Yours sincerely
