

Hello

As a Shetland resident all my life, I wish to lodge my objections to permission being granted to an inter connector cable or anything that enables large scale wind farm projects.

I have many concerns over the impact on the environment, the Economy and Shetland as a desirable place to live and visit.

Other less environmentally damaging projects should be looked at such as wave or tidal energy.

I Also feel no consideration has been given to the decommissioning of the project.

I feel it will not benefit Shetland In any way.

Yours Faithfully
