Dear Anna

CONSULTATION ON RIIO-2 ENVIRONMENTAL REPORTING GUIDANCE

We support the stated intent of ensuring that the Annual Environment Report meets the needs of wider stakeholders. The guidance provided by Ofgem appears reasonable and appropriately calibrated to provide information that stakeholders would value and that Ofgem will find useful when monitoring progress throughout the price control periods.

We have no specific comments to make on any of Ofgem's consultation questions. However, we believe that further definition and guidance is needed for application of this approach in electricity distribution in the ED2 price control period. We look forward to working with Ofgem to engage in that process.

Yours sincerely
