Dear Saffron

**Consultation on Ofgem's assessment of proposals for reducing visual amenity impacts the Loch Lomond and the Trossachs National Park**

I am pleased to enclose a response from SSEN Transmission to Ofgem's consultation on the above proposals.

We support the outcome of Ofgem's assessment, which determined that our project costs are economical, efficient, and justified based on evidence provided and Ofgem's internal benchmarking exercise. We are also grateful that Ofgem has recognised that we have worked closely with our stakeholders in regular forums to reflect their views on project identification, selection and development.

We look forward to engaging with you going forward as development progresses on this project

Yours sincerely

David Howie  
Senior Regulation Analyst
