

*Electricity Network Innovation Competition Full Submission*  
**Supplementary Answer Form**

**Project: EVOLUTION**

Tick if this answer has been provided verbally: ☐

Project code	SPD/EN/01	Question Number	9
Question date	18 AUGUST 2015	Answer date	20 AUGUST 2015
Submission section question relates to	2		
Topic	Work Packages		
Question	On page 9 it states that the market design will be analysed using competition techniques already in use. Can you provide details of them?		
Notes on question			
Answer	<p>Computation analysis is concerned with using and constructing mathematical models and qualitative analysis techniques to simulate how a proposed market may be constructed and operated. Through modelling of what we propose to implement during the market design phase we will typically seek to use computer simulation and other forms of computation, based upon existing market data, trends and response services in existence.</p> <p>This will enable the team to understand the key processes, interactions and potential outcomes of any proposed market design.</p>
