

Electricity Network Innovation Competition Full Submission
Supplementary Answer Form

Project: EVOLUTION

Tick if this answer has been provided verbally: ☐

Project code	SPD/EN/01	Question Number	28
Question date	10 September 2015	Answer date	11 September 2015
Submission section question relates to	Page 55		
Topic	Benefits		
Question	Results are extrapolated nationally based upon on assuming the SPD proportion of 19% as exporting with high DG penetration. What is the basis for this assumption?		
Notes on question			
Answer	<p>Within the distribution electricity franchise area of SP Distribution we have 80 Grid Supply Points. Of these, 15 have a high penetration of distributed generation equating to 19% as a proportion of the total population of GSPs.</p> <p>Therefore based upon this fact within SP Distribution's electricity franchise area we have applied a similar figure to that of the total GSPs that are currently live within the GB wide network.</p>
