Project code	NGGTGN03	Question Number	5
Question date	25/08/2015	Answer date	27/08/2015
Submission section question relates to	Section 3 – Project Business case		
Topic			
Question	If the predicted connections are achieved is it possible to quantify the potential savings to the gas customer?		
Notes on question	N/A		
Answer	<p>At this stage it is not possible to quantify direct savings to the gas customer.</p> <p>We would expect savings achieved by any developer to be passed through to the end consumer. Based on our proposal the savings would account for £100m over 20 years, this should flow through to end consumers.</p> <p>In additional, having further indigenous gas supplies should stabilise gas prices and improve the security of supply in the UK.</p> <p>We can also see the dramatic reduction in gas prices in the US off the back of unconventional gas production.</p>
